CONTENTS

PREFACE v

PROGRAMME OF THE COLLOQUIUM vii

Á. SZABÓ: GREEK DIALECTIC AND EUCLID'S AXIOMATICS 1

DISCUSSION:

W. C. KNEALE: Priority in the use of *reductio ad absurdum* . . 9
L. KALMÁR: The Greeks and the excluded third 10
A. ROBINSON: The Greeks and the excluded third 11
J. R. LUCAS: Plato and the axiomatic method 11
P. BERNAYS: Some doubts about the Eleatic origin of Euclid's axiomatics 14
G. J. WHITROW: The mythical origins of Euclidean geometry . 16
K. R. POPPER: The cosmological origins of Euclidean geometry . 18
Á. SZABÓ: Reply 20

A. ROBINSON: THE METAPHYSICS OF THE CALCULUS . . 28

DISCUSSION:

P. GEACH: Infinity in scholastic philosophy 41
H. FREUDENTHAL: Technique versus metaphysics in the calculus 42
A. HEYTING: Technique versus metaphysics in the calculus . . 43
Y. BAR-HILLEL: The irrelevance of ontology to mathematics . 44
M. BUNGE: Non-standard analysis and the conscience of the physicist 44
A. ROBINSON: Reply 45

F. SOMMERS: ON A FREGEAN DOGMA 47

DISCUSSION:

L. KALMÁR: Not Fregean and not a dogma 63
M. DUMMETT: A comment on 'On a Fregean dogma' 63
C. LEJEWSKI: The logical form of singular and general statements 68
W. V. QUINE: Three remarks 70
F. SOMMERS: Reply 71

A. MOSTOWSKI: RECENT RESULTS IN SET THEORY . . 82

DISCUSSION:

G. KREISEL: Comments 97
A. ROBINSON: Comments 103
L. KALMÁR: On the role of second order theories 104
A. MOSTOWSKI: Reply 105

P. BERNAYS: WHAT DO SOME RECENT RESULTS IN SET THEORY SUGGEST? 109

DISCUSSION:

A. MOSTOWSKI: Cohen's independence proof and second order formalisation 113
Y. BAR-HILLEL: The dangers of Platonistic modes of speech . 114
P. SUPPES: After set theory, what? 115
P. BERNAYS: Reply 116

S. KÖRNER: ON THE RELEVANCE OF POST-GÖDELIAN MATHEMATICS TO PHILOSOPHY 118

DISCUSSION:

G. H. MÜLLER: An old philosophical question – and the recent results in the foundations of mathematics 133
Y. BAR-HILLEL: On a neglected ontology-free philosophy of mathematics 136
S. KÖRNER: Reply 136

G. KREISEL: INFORMAL RIGOUR AND COMPLETENESS PROOFS 138

DISCUSSION:

Y. BAR-HILLEL: Obtaining axioms by reflection 172
A. HEYTING: Informal rigour and intuitionism 172
J. MYHILL: Remarks on continuity and the thinking subject . 173
G. KREISEL: Reply 175

L. KALMÁR: FOUNDATIONS OF MATHEMATICS – WHITHER NOW? 187

DISCUSSION:

A. HEYTING: Weyl on experimental testing of mathematics . . 195
S. C. KLEENE: Empirical mathematics? 195
P. BERNAYS: Mathematics and mental experience 196
Y. BAR-HILLEL: Is mathematical empiricism still alive? . . 197
I. LAKATOS: A renaissance of empiricism in the recent philosophy of mathematics? 199
L. KALMÁR: Reply 203

J. A. EASLEY, JR: LOGIC AND HEURISTIC IN MATHEMATICS CURRICULUM REFORM 208

DISCUSSION:

P. SUPPES: The central role of empirical knowledge in curriculum reform 231
L. KALMÁR: Mathematics teaching experiments in Hungary . . 233
J. A. EASLEY, JR.: Reply 238
