List of Figures viii
Preface xi
Acknowledgements xxvi

1. Mind and Self 1

1.1. Can it be so easy? 1
1.2. Psychological continuity 6
1.3. First doubts 11
1.4. Some varieties of virtual life 14
1.5. Strands untangled 21

2. Phenomenal Unity 28

2.1. Experience 28
2.2. Phenomenal space 34
2.3. Self and awareness 39
2.4. A superfluous self 42
2.5. Simplicity and unity 46

3. Phenomenal Continuity 51

3.1. A constraint 51
3.2. Memory 53
3.3. Chunks, apprehensions and representations 56
3.4. Overlap and flow 63
3.5. Phenomenal cuts 68
3.6. The one experience view 71
3.7. Streamal unity 73

4. Powers and Subjects 75

4.1. Bridge building 75
4.2. Experience-machines and beyond 81
4.3. Power structures 88
4.4. The C-theory 111
4.5. Powers in general 114
4.6. Projection and production 131

5. Alternatives 135

5.1. The self in experience 135
5.2. Bridges of resemblance 148
5.3. Fundamentalism 151
5.4. Foster's modal bridge 153
5.5. Unger's material bridge 161

6. Minds and Mental Integration 170

6.1. From C-systems to minds 170
6.2. Aspects of mind 171
6.3. Psycho-phenomenal integration 175
6.4. C-relations and P-relations 178
6.5. From a functional perspective 181
6.6. Non-phenomenal selves 188
6.7. What matters 192

7. Embodiment 201

7.1. A blurring 201
7.2. Four grades of embodiment 203
7.3. Phenomenal embodiment 206
7.4. Effective embodiment 209
7.5. Boundary disputes 215
7.6. Monist alternatives 224
7.7. Minimalism and possession 227

8. Simple Selves 236

8.1. Simplicity and isolation 236
8.2. Isolation: strands of a defence 238
8.3. Reductio? 245
8.4. Minimal subjects 249
8.5. A minimal modification, and a moral 251
8.6. Weak unity 254

9. Holism 264

9.1. Unity and interdependence 264
9.2. Interdependent potentials 266
9.3. Phenomenal interdependence 272
9.4. Organization and interference 273
9.5. C-holism 277

9.6. From C-holism to power holism 289
9.7. Power systematicity 300
9.8. Simplicity 307

10. Modes of Incapacitation 311
10.1. Absoluteness 311
10.2. Some varieties of incapacitation 313
10.3. Brains 316
10.4. Cyclical subjects 319
10.5. Congenial decomposition 321
10.6. Assessments 325
10.7. Deviancy 331
10.8. Teleportation revisited 336
10.9. From Egos to C-systems 338

11. Objections and Replies 341
11.1. Ontological qualms 341
11.2. Issues of substance 342
11.3. Unity and independence 344
11.4. Menacing circularities 348
11.5. Ownership, isolation and holism 354
11.6. Power worlds 359

12. The Topology of the Self 364
12.1. Fission 364
12.2. Fission as fatal 368
12.3. Can consciousness divide? 370
12.4. Overlap to the rescue? 373
12.5. Time travel and double existence 378
12.6. Personal and phenomenal time 381
12.7. Non-linearity 385
12.8. Time and times 389
12.9. Issues and objections 393
12.10. Fusion 400
12.11. The many shapes of life 406

13. Appendix: Reductionism 409

Bibliography 418
Index 427

List of Figures

1.1.	Attempting the impossible	26
3.1.	Streamal structure: the pulse view	56
3.2.	The momentary awareness + extended contents model	60
3.3.	Broad's version	60
3.4.	The representational conception	62
3.5.	The overlap model (in schematic form)	65
3.6.	A more realistic depiction of the overlap model: incorporating phenomenal flow and more densley packed specious presents	67
3.7.	Phenomenal connections unconfined (on the left) and confined (on the right)	70
3.8.	Three brief stream-phases, revealing (in a partial way) the pervasive character of the co-consciousness relationship	74
4.1.	A collection of experience-machines with a distinctive feature: the ability to contribute to unified streams of consciousness	83
4.2.	Indirect streamal relatedness	85
4.3.	Both active and dormant powers can be DPC_D- and IPC_D-related. The dotted figures in the upper level represent the experiences which would have been produced if the powers shown on the lower level had been active rather than dormant	92
4.4.	Not all DPC_D-related powers are succession-related	94
4.5.	The threads of a life: a simple way of defining the conditions under which *persisting* powers are consubjective	98
4.6.	Opposed powers can be consubjective by virtue of belonging to a chain of synchronically DPC-related powers (as shown on the left), or by virtue of being able to produce experiences that are diachronically co-conscious (as shown on the right)	105
4.7.	A network of IPC_S-related powers	108
4.8.	Maggot's post-accident C-system: several DPC_S-links have been severed	109
4.9.	A single C-system can possess different depths of synchronic integration	110
6.1.	A mind of the familiar kind: a phenomenal core fully integrated into a psychological system	178
6.2.	A novel form of fission: mind-machines split a normal subject into phenomenal and non-phenomenal parts	191
8.1.	If partial unity is possible, so too are peculiar experiential structures	255
8.2.(a)	Mild disunity	256

8.2.(b) Extreme disassociation 256
8.3. The consequences of co-consciousness: each part of the phenomenal expanse is phenomenally connected to every other part 261
9.1. A simple total experience 272
9.2. Two complete but different visual fields 274
9.3. The rotating disk illusion 276
9.4. Kanisza's triangle 277
9.5. Kanisza's triangle—minimalist version 277
9.6. A C-system with less than maximal synchronic integration 294
9.7. A pattern *of* experiences 303
9.8. A pattern *in* experiences 303
9.9. A visual field with a hole: region r_2 is blind 304
9.10. Differently holed: region r_3 is blind 304
9.11. A taxonomy of interdependencies 308
12.1. A branching stream of consciousness 364
12.2. A radically asymmetrical bifurcation 366
12.3. Fission construed as potential overlap 375
12.4. A branching in phenomenal time. Phases not linked by horizontal arrows are non-simultaneous 386
12.5. Non-linear lives can come in many forms 407
