<i>Introduction</i>	I
1. Ontological Preliminaries	8
1.1 Questions	8
1.2 Objects, properties, and relations	11
1.3 Determining what there is	13
1.4 An objection considered	17
1.5 A response begun	18
1.6 The response completed	19
1.7 Frege's problem: the concept <i>horse</i>	21
1.8 Frege's response	25
1.9 Kerry <i>redux</i> ?	29
1.10 Frege revised	31
1.11 Frege further revised	34
1.12 The bearable lightness of being	36
Appendix: Inferential tests for singular terms	40
2. The Indispensability of Logical Necessity	47
2.1 Overview	47
2.2 McFetridge's argument expounded	48
2.3 A sceptical objection, and a response to it begun	51
2.4 Wright's anti-Quine argument expounded, some objections considered, and its principal conclusion upheld	54
2.5 McFetridge's argument refurbished and the response to the sceptic completed	59
2.5 Basic logical necessities	60
3. Modality—Fundamental and Irreducible	63
3.1 Introductory remarks	63
3.2 Reductive explanation—what is required for success?	63
3.3 Worldly reduction—can modality be reductively explained in terms of possible worlds?	69
3.4 Supervenience without reduction? Do modal facts always depend upon more basic non-modal facts?	81
3.5 Projectivism and non-cognitivism	89
3.6 Conclusions	97
4. Absolute Modality	98
4.1 McFetridge's proposal extended—a counterfactual definition of absolute necessity	98
4.2 Absolute necessity as the limit of relative necessity	100

4.3	Absolute necessity as absence of competing possibility	103
4.4	The three conceptions of absolute necessity compared	110
4.5	Logical and metaphysical modalities	112
5.	The Source of Logical Necessities	116
5.1	Introductory remarks	116
5.2	Conventionalism	117
5.3	Truth in virtue of meaning	124
5.4	The necessity of necessities	127
5.5	Non-transmissive explanations of necessity	131
5.6	Intermediate conclusions	143
6.	Metaphysical Necessities	145
6.1	Introductory remarks	145
6.2	Non-logical necessities	145
6.3	Arithmetic necessities	147
6.4	An essentialist theory of necessity	150
6.5	Some questions of scope and adequacy	157
6.6	Circles and regresses	157
	Appendix 1: Kinds of necessity and kinds of truth	162
	Appendix 2: Defining the cardinal numbers	164
7.	Necessary Beings: Properties and Numbers	165
7.1	Introductory remarks	165
7.2	Properties and relations	165
7.3	Functions	170
7.4	Objects	175
	Appendix: Arithmetic and truths of logic	178
8.	Higher-order Logics	180
8.1	Introductory remarks	180
8.2	Set-theory in sheep's clothing	182
8.3	No entity without identity	186
8.4	The interpretation of higher-order logic: standard and non-standard semantics	189
8.5	An alternative second-order semantics	193
8.6	Impredicativity and abstraction	199
	Appendix: Proof sketches	203
9.	Contingent Beings	206
9.1	Introductory remarks	206
9.2	Absolute necessity and existence	207
9.3	Individual natures and necessity	211
9.4	Essentialist possibilities	218
9.5	Conclusion	226
10.	Possibilities	228
10.1	Introductory remarks	228
10.2	Ways for things to be	228

10.3	Semantics without worlds	230
10.4	Kinds of incompleteness	232
10.5	Two ways of handling incompleteness	234
10.6	Possibility semantics outlined	235
10.7	Essential incompleteness and the key assumption	242
10.8	Borderline colours	243
10.9	Vagueness and supervaluations	244
10.10	Future contingents	245
10.11	Quantum indeterminacy	247
II.	Essential Knowledge	252
11.1	The problem of modal knowledge	252
11.2	A priori knowledge of essence	254
11.3	A posteriori knowledge of essence	259
	<i>Bibliography</i>	283
	<i>Index of Names</i>	293
	<i>Index of Subjects</i>	295
