<i>Preface</i>	viii
Introduction	1
The argument	1
Plan	3
Background	5
About this book	9
<b>Part I The Mechanism</b>	
1 Perception as causal inference	13
Constraints on perceptual inference	14
Perception and Bayes' rule	15
Perceptual inference and binocular rivalry	19
How do neurons know Bayes?	23
From inference to phenomenology	25
A hierarchy of causal regularities	27
Perceptual variance and invariance	28
Message passing between hierarchical levels	31
Additional constraints on hierarchical inference	32
On Bayes' rule	34
Summary: hierarchical neuronal inferential mechanisms	37
Notes	38
2 Prediction error minimization	41
A statistical illustration	42
Reconceiving the relation to the world	46
Being supervised by the world	48
A deeper perspective	51
Recognition and model inversion	53
Summary: perception in prediction	55
Notes	56
3 Prediction error, context, and precision	59
Context and uncertainty	60
Plugging the leaky dam	62
Expected precisions	64
Precisions and prediction error gain	66
The basic mechanism: matters arising	67
Summary: passive perceivers?	73
Notes	74

4	Action and expected experience	75
	Active inference in perception	76
	Modelling the agent, and acting	81
	Bounding surprise	84
	Active inference: matters arising	89
	Prediction error minimization: challenges	92
	Summary: tooling up for understanding the mind	95
	Notes	96

## Part II The World

5	Binding is inference	101
	The binding problem and causal inference	102
	Initial pleas for the Bayesian story	106
	From common cause to sensory binding	110
	Binding, attention, and precision	111
	Summary: binding in error minimization	115
	Notes	115
6	Is predicting seeing?	117
	Cognitive penetrability: initial moves	118
	Cognitive penetrability under mounting uncertainty	122
	Making room for cognitive impenetrability	124
	Possible cases of cognitive penetrability	129
	Summary: a balanced notion of cognitive penetrability	137
	Notes	138
7	Precarious prediction	140
	Trading off perception and misperception	141
	Accuracy and noise	143
	Precisions, sampling, and prior belief	145
	Reality testing	147
	The courtroom of perception	152
	Mental illness and prediction error	156
	Delusions and expected precisions	157
	Autism and expected precisions	161
	Balancing passive and active inference	165
	Summary: prediction error failures in illness and health	168
	Notes	169
8	Surprise and misrepresentation	172
	Misperception as failure of prediction error minimization	174
	Misperception and rule-following	179
	Hierarchical modes of presentation	181
	In the Bayesian room	185
	Summary: a mechanism for representation	187
	Notes	188

### Part III The Mind

9	Precision, attention, and consciousness	191
	From mental searchlight to precision expectations	192
	Learning patterns of noise and uncertainty	194
	Patterns of expected precisions in attention	195
	Volitional attention as active inference	197
	Inattentional blindness as low gain and prior	199
	Endogenous and exogenous attention	200
	Attention and conscious perception	201
	Summary: statistical aspects of attention and consciousness	205
	Notes	206
10	Perceptual unity in action	207
	From causal inference to consciousness?	207
	Perceptual unity	209
	Unity, and ignition of the global neuronal workspace	211
	Ignition, active inference, and unity	214
	Action-based unity and indirectness	219
	Summary: unity and causal seclusion	221
	Notes	221
11	The fragile mirror of nature	224
	Truth trackers or just a penchant for error minimization?	224
	Is perception indirect?	227
	The Bayesian body	230
	Fragility, internality, and situatedness	237
	Summary: a disconcerting and comforting perceptual relation?	240
	Notes	241
12	Into the predictive mind	242
	Emotions and bodily sensations	242
	Introspection is inference on mental causes	245
	The private mind in interaction	249
	The self as a sensory trajectory	254
	Summary: the probabilistic and causal mind	256
	Notes	257
	Concluding remarks: The mind in prediction	258
