Preface	5*
Contents	7*
PART I - PETER OF AUVERGNE, COMMENTATOR ON ARISTOTLE'S <i>DE CAELO</i>	15*
Chapter I – Peter of Auvergne's Questions on <i>De Caelo</i> in Context	17*
I. Peter of Auvergne	17*
1. Biography	17*
2. Works	18*
II. The Reception of <i>De Caelo</i> in the Thirteenth Century	24*
1. The Importance of <i>De Caelo</i> for Medieval Cosmology	24*
2. Latin Translations of <i>De Caelo</i> and of Commentaries on <i>De Caelo</i>	26*
3. <i>De Caelo</i> in the Curriculum of the Paris Arts Faculty	31*
4. List of Thirteenth-century Treatises on <i>De Caelo</i>	35*
4.1. England	37*
4.2. European Mainland	41*
III. Commentaries on <i>De Caelo</i> Attributed to Peter of Auvergne	45*
1. The Commentary on Books III and IV of <i>De Caelo</i>	45*
1.1. Description	45*
1.2. Author: Peter of Auvergne	46*
1.3. Date	47*
2. Questions on <i>De Caelo</i>	49*
2.1. The CEK-questions on <i>De Caelo</i>	50*
2.1.1. Description	50*
2.1.2. Author: Peter of Auvergne (?)	51*
2.1.3. Date	52*
2.2. The WP-questions on <i>De Caelo</i>	55*
2.2.1. Description	55*
2.2.2. Author	58*
2.2.2.1. Peter of Auvergne	58*
2.2.2.2. Reportatio	60*
2.2.3. Date	63*
2.3. The LR-questions on <i>De Caelo</i>	68*

2.3.1. Description	68*
2.3.2. Author: an anonymous compiler	68*
2.3.2.1. Comparison between the LR- and the WP-questions	69*
2.3.2.2. Comparison between the LR-questions and Albert's commentary on <i>De Caelo</i>	72*
2.3.2.3. Hypotheses concerning the composition of the LR-questions	74*
2.3.3. Date	79*
Scheme: The Relation between the Different Sets of Questions on <i>De Caelo</i> Attributed to Peter of Auvergne	81*
IV. The WP-Questions on <i>De Caelo</i> : Composition and Sources	83*
1. Quaestiones disputatae	83*
1.1. Selected topics	83*
1.2. Structure	90*
2. Sources	93*
2.1. Aristotle	93*
2.2. The <i>Auctoritates Aristotelis</i>	97*
2.3. Neoplatonic influences	98*
2.4. Influence of Christian doctrine	102*
2.5. The CEK-questions on <i>De Caelo</i> (comparison between the CEK- and WP-questions)	102*
2.6. Averroes' commentary on <i>De Caelo</i>	105*
2.7. Albert's commentary on <i>De Caelo</i>	107*
2.8. Aquinas' commentary on <i>De Caelo</i> I - III, 3	108*
2.9. Simplicius' commentary on <i>De Caelo</i>	111*
2.10. Other sources	114*
 Chapter II – Interpretative Study	117*
I. Knowledge and the Division of the Sciences	119*
1. The Division of the Sciences	119*
2. The Subject Matter of Natural Science and of <i>De Caelo</i>	137*
2.1. Natural science investigates bodies and magnitudes	137*
2.2. <i>De Caelo</i> investigates the body that is mobile according to place	138*
3. Knowledge is not the Substantial Form of the Soul	142*
Scheme of the Classification of the Sciences	143*

II. The Universe	145*
1. The Perfection of the Universe	145*
1.1. The universe is perfect according to its nature	145*
1.2. There is no extracosmic void	149*
2. The Unicity of the World	153*
3. The (Un)generability and (Im)perishability of the World	156*
III. The Heavens	167*
1. The Heavens as Different from the Sublunary World	167*
1.1. The heavens and their bodies have a different nature than the sublunary bodies	167*
1.2. The heavens are neither heavy nor light	172*
1.3. The heavens have no matter in the proper sense	175*
1.4. The heavens have no contrary in the proper sense	180*
1.5. The heavens are ungenerated and imperishable in the proper sense	184*
1.6. The heavens are qualitatively unalterable in the proper sense	184*
2. Positional Differences in the Heavens	187*
2.1. Positional differences of animated beings	187*
2.2. Positional differences are present in the heavens	188*
2.3. Right and left are not really distinct in the heavens	190*
3. The Celestial Orbs	192*
3.1. The number of orbs	193*
3.2. The celestial bodies are contiguous	195*
3.3. The celestial orbs do not belong to the same species	197*
3.4. The celestial bodies belong to the same species as their orb	200*
4. The Movers and the Motions of the Heavens	202*
4.1. The movers of the celestial orbs	202*
4.1.1. The celestial orbs are moved by the first mover and by their proper movers	202*
4.1.2. The first mover	205*
4.1.2.1. The first mover is immaterial	205*
4.1.2.2. The relation between the first mover and the <i>primum mobile</i>	206*
4.1.3. The proper movers	208*
4.1.3.1. The separate substances are one in their species	208*
4.1.3.2. The different movers cannot desire the first principle in like manner	210*

4.1.3.3. Are the movers souls ?	213*
4.2. The motions of the heavens	221*
4.2.1. The motion of the heavens is natural	221*
4.2.2. The direction of the celestial motions	224*
4.2.2.1. The heavens are moved to a determined region from east to west	224*
4.2.2.2. The inferior orbs are moved with a motion contrary to the motion of the <i>primum mobile</i>	226*
4.2.3. The relative speeds of the motions	228*
4.2.4. The heavens are only secondarily moved for the sake of the sublunary bodies	231*
5. The Celestial Bodies	234*
5.1. The sun illuminates all celestial bodies	234*
5.2. The celestial bodies generate heat by their light	235*
5.3. The moon	238*
5.3.1. The spot on the moon	238*
5.3.2. The crescents that appear on the moon	240*
IV. The Earth	242*
1. The Cosmological Relations of the Earth: its Place, Function, Rest and Potential Mobility	242*
1.1. The earth naturally at rest in the 'central place' of the universe	242*
1.2. The earth's function with respect to the motion of the heavens	243*
1.3. The potential mobility of bodies in the centre of the universe	245*
1.3.1. The potential mobility of the earth as a whole	245*
1.3.2. The motion of a hypothetical fire placed in the centre of the universe	248*
2. The Habitability of the Earth	250*
V. The Sublunary Bodies	254*
1. <i>Gravitas</i>	254*
1.1. Heaviness and lightness	254*
1.1.1. Heaviness and lightness precede heat and cold according to perfection	254*
1.1.2. Heaviness does not have the same <i>ratio</i> in earth and in water	255*
1.1.3. Does air possess heaviness in its natural place?	257*
1.2. Every heavy thing is heavy relatively	260*

1.3. The thing possessing weight is (not) composed of weightless things	261*
2. The Shape and Place of the Elements	262*
2.1. The circular shape of the elements	262*
2.2. The intrinsic perfection of the 'located' body: to be in its place	263*
2.3. The place and perfection of water	264*
2.3.1. The surface of the earth is the natural place of water	264*
2.3.2. Earth is not the perfection of water	265*
2.3.3. If earth in its totality were withdrawn, water would enter into the earth's place	267*
2.4. The candle experiment: the ascent of water in a heated vessel	269*
3. The Relation between the Elements	271*
3.1. Contraries have an equal power	272*
3.2. The elements considered in their totality are equal in power	273*
3.3. If earth exists, fire also exists	275*
3.4. Fire elicited from the human body	275*
4. Sensible Qualities	277*
4.1. Sensible qualities are not the essential differences of the elements	278*
4.2. Sensible qualities are not actually infinite in number and in species	279*
VI. Topics in Natural Philosophy	282*
1. Nature, Dimensions and Bodies	282*
1.1. <i>Naturale</i> and <i>violentum</i>	282*
1.2. Three dimensions	283*
1.3. A body is (not) composed of surfaces	284*
2. Infinite Divisibility and the Infinite	287*
2.1. The infinite divisibility of a continuum and the <i>minima naturalia</i>	287*
2.2. The infinite	291*
2.2.1. The first cause is infinite according to its substance	292*
2.2.2. There is no actually infinite body	295*
2.2.3. There is no actually infinite multitude	296*
2.2.4. The infinite as a principle	299*

3. Motion	300*
3.1. Change	300*
3.1.1. Nothing attains the simple good without action	300*
3.1.2. Change and having been changed	301*
3.1.3. Is corruption against nature?	302*
3.2. Local motion	302*
3.2.1. Simple and mixed motions	303*
3.2.1.1. Simple motion	303*
3.2.1.2. Mixed motion	306*
3.2.2. Everything is moved in a limited time	308*
3.2.3. Natural and violent motions	309*
3.2.3.1. The sublunary bodies are naturally moved by themselves	309*
3.2.3.2. Many violent motions can(not) be contrary to one natural motion	315*
3.2.3.3. The motion of projectiles	316*
3.2.4. Local motion accidentally causes heat	323*
3.2.5. An image in flowing water	330*
 Chapter III – Introduction to the Edition	 331*
I. The Manuscripts	331*
1. The Manuscripts Wien, Dominikanerkonvent 150/120 and Paris, Bibliothèque Mazarine 3493	332*
1.1. Wien, Dominikanerkonvent 150/120 (= W)	332*
1.2. Paris, Bibliothèque Mazarine 3493 (= P)	338*
2. The Manuscripts Leipzig, Universitätsbibliothek 1386 and Praha, Knihovny Metropolitní 1320	339*
2.1. Leipzig, Universitätsbibliothek 1386 (= L)	340*
2.2. Praha, Knihovny Metropolitní 1320 (= R)	342*
3. The Manuscripts Paris, Bibliothèque Mazarine 3484 (= S) and 3485 (= T)	344*
II. Relation between the Manuscripts	345*
1. Relation between the Text in W, fols. 47 ^{ra} -68 ^{vb} and in P, fols. 95 ^{ra} -136 ^{rb}	345*
2. Relation between the Text in L, fols. 91 ^{va} -102 ^{vb} and in R, fols. 43 ^{rb} -52 ^{vb}	350*
III. Principles of Edition	353*

	13*
Appendices	357*
Appendix I - A Comparison between the Titles of the LR- and WP-Questions (and Some Passages of Albert the Great's Commentary on <i>De Caelo</i>)	357*
Appendix II - <i>De Caelo</i> and Peter's WP-Questions on <i>De Caelo</i>	363*
Appendix III – Tables of Questions	368*
I. Table of the WP-Questions on <i>De Caelo</i>	368*
II. Table of the LR-Questions on <i>De Caelo</i>	371*
PART II - EDITIONS	1
Sigla et Compendia	3
Petri de Alvernia <i>Quaestiones supra librum De Caelo et Mundo</i>	5
Anonymi <i>Quaestiones supra librum De Caelo et Mundo</i>	377
Petri de Alvernia <i>Expositio in librum De Caelo et Mundo III, 1-3. Excerpta</i>	561
BIBLIOGRAPHY	575
Primary Sources	575
Secondary Literature	584
INDEX AUCTORUM	613
