Volume 8

BOOK IV: OF OPERATIONS SUBSIDIARY TO INDUCTION

CHAPTER I. Of Observation and Description	641
§ 1. Observation, how far a subject of logic, 641	
2. A great part of what seems observation is really inference, 641	
3. The description of an observation affirms more than is contained in the observation, 644	
4. —namely, an agreement among phenomena; and ^f the ^f comparison of phenomena to ascertain such agreements is a preliminary to induction, 647	
CHAPTER II. Of Abstraction, or the Formation of Conceptions	649
§ 1. The comparison which is a preliminary to induction implies general conceptions, 649	
2. —but these need not be pre-existent, 650	
3. A general conception, originally the result of a comparison, becomes itself the type of comparison, 653	
4. What is meant by appropriate conceptions, 656	
5. —and by clear conceptions, 658	
6. ^g Further illustration of the subject ^g , 659	

^{f-f}+43, 46, 51, 56, 62, 65, 68, 72

^{g-g}MS, 43, 46, 51, 56 Cases in which the conception must pre-exist

CHAPTER III. Of Naming, as subsidiary to Induction	663
§ 1. The fundamental property of names as an instrument of thought, 663	
2. Names are not indispensable to induction, 664	
3. In what manner subservient to it, 665	
4. General names not a mere contrivance to economize the use of language, 666	
CHAPTER IV. Of the Requisites of a Philosophical Language, and the Principles of Definition	668
§ 1. First requisite of philosophical language, a steady and determinate meaning for every general name, 668	
2. Names in common use have often a loose connotation, 668	
3. —which the logician should fix, with as little alteration as possible, 670	
4. Why definition is often a question not of words but of things, 672	
5. How the logician should deal with the transitive applications of words, 675	
6. Evil consequences of casting off any portion of the customary connotation of words, 679	
CHAPTER V. ^h On ^h the Natural History of the Variations in the Meaning of Terms	686
§ 1. How circumstances originally accidental become incorporated into the meaning of words, 686	
2. —and sometimes become the whole meaning, 688	
3. Tendency of words to become generalized, 689	
4. —and to become specialized, 693	
CHAPTER VI. The Principles of a Philosophical Language further considered	698
§ 1. Second requisite of philosophical language, a name for every important meaning, 698	
2. —viz. first, an accurate descriptive terminology, 698	
3. —secondly, a name for each of the more important results of scientific abstraction, 701	
4. —thirdly, a nomenclature, or system of the names of Kinds, 703	
5. Peculiar nature of the connotation of names which belong to a nomenclature, 705	
6. In what cases language may, and may not, be used mechanically, 707	
CHAPTER VII. Of Classification, as subsidiary to Induction	712
§ 1. Classification as here treated of, wherein different from the classification implied in naming, 712	
2. Theory of natural groups, 713	
3. Are natural groups given by type, or by definition? 717	

4. Kinds are natural groups, 718	
5. How the names of Kinds should be constructed, 723	
CHAPTER VIII. Of Classification by Series	726
§ 1. Natural groups should be arranged in a natural series, 726	
2. The arrangement should follow the degrees of the main phenomenon, 727	
3. —which implies the assumption of a type-species, 728	
4. How the divisions of the series should be determined, 729	
5. Zoology affords the completest type of scientific classification, 731	
BOOK V: ON FALLACIES	
CHAPTER I. Of Fallacies in General	735
§ 1. Theory of fallacies a necessary part of logic, 735	
2. Casual mistakes are not fallacies, 736	
3. The moral sources of erroneous opinion, how related to the intellectual, 737	
CHAPTER II. Classification of Fallacies	740
§ 1. On what criteria a classification of fallacies should be grounded, 740	
2. The five classes of fallacies, 741	
3. The reference of a fallacy to one or 'another' class is sometimes arbitrary, 744	
CHAPTER III. Fallacies of Simple Inspection, or à priori Fallacies	746
§ 1. Character of this class of Fallacies, 746	
2. Natural prejudice of mistaking subjective laws for objective, exemplified in popular superstitions, 747	
3. Natural prejudices, that things which we think of together must exist together, and that what is inconceivable must be false, 750	
4. Natural prejudice, of ascribing objective existence to abstractions, 756	
5. Fallacy of the Sufficient Reason, 757	
6. Natural prejudice, that the differences in nature correspond to the distinctions in language, 760	
7. Prejudice, that a phenomenon cannot have more than one cause, 763.	
8. Prejudice, that the conditions of a phenomenon must resemble the phenomenon, 765	
CHAPTER IV. Fallacies of Observation	773
§ 1. Non-observation, and Mal-observation, 773	
2. Non-observation of instances, and non-observation of circumstances, 773	

3. Examples of the former, 774	
4. —and of the latter, 778	
5. Mal-observation characterized and exemplified, 782	
CHAPTER V. Fallacies of Generalization	785
§ 1. Character of the class, 785	
2. Certain kinds of generalization ^j must always be groundless, 785	
3. Attempts to resolve ^k phenomena radically different ^k into the same, 786	
4. Fallacy of mistaking empirical for causal laws, 788	
5. <i>Post hoc, ergo propter hoc</i> ; and the deductive fallacy corresponding to it, 792	
6. Fallacy of False Analogies, 794	
7. Function of metaphors in reasoning, 799	
8. How fallacies of generalization grow out of bad classification, 801	
CHAPTER VI. Fallacies of Ratiocination	803
§ 1. Introductory Remarks, 803	
2. Fallacies in the conversion and æquipollency of propositions, 803	
3. Fallacies in the syllogistic process, 804	
4. Fallacy of changing the premises, 805	
CHAPTER VII. Fallacies of Confusion	809
§ 1. Fallacy of Ambiguous Terms, 809	
2. Fallacy of <i>Petitio Principii</i> , 819	
3. Fallacy of <i>Ignoratio Elenchi</i> , 827	
BOOK VI: ON THE LOGIC OF THE MORAL SCIENCES	
CHAPTER I. Introductory Remarks	833
§ 1. The backward state of the Moral Sciences can only be remedied by applying to them the methods of Physical Science, duly extended and generalized, 833	
2. How far this can be attempted in the present work, 834	
CHAPTER II. Of Liberty and Necessity	836
§ 1. Are human actions subject to the law of causality? 836	
2. The doctrine commonly called Philosophical Necessity, in what sense true, 836	
3. Inappropriateness and pernicious effect of the term Necessity, 839	
4. A motive not always the anticipation of a pleasure or a pain, 842	

^jMS which^{k-k}MS, 43, 46 radically different phenomena

CHAPTER III. That there is, or may be, a Science of Human Nature	844
§ 1. There may be sciences which are not exact sciences, 844	
2. To what scientific type the Science of Human Nature corresponds, 846	
CHAPTER IV. Of the Laws of Mind	849
§ 1. What is meant by Laws of Mind, 849	
2. Is there a science of Psychology? 849	
3. The principal investigations of Psychology characterized, 852	
4. Relation of mental facts to physical conditions, 856	
CHAPTER V. Of Ethology, or the Science of the Formation of Character	861
§ 1. The Empirical Laws of Human Nature, 861	
2. —are merely approximate generalizations. The universal laws are those of the formation of character, 863	
3. The laws of the formation of character cannot be ascertained by observation and experiment, 865	
4. —but must be studied deductively, 868	
5. The principles of Ethology are the <i>axiomata media</i> of mental science, 870	
6. Ethology characterized, 872	
CHAPTER VI. General Considerations on the Social Science	875
§ 1. Are Social Phenomena a subject of Science? 875	
2. Of what nature the Social Science must be, 877	
CHAPTER VII. Of the Chemical, or Experimental, Method in the Social Science	879
§ 1. Characters of the mode of thinking which deduces political doctrines from specific experience, 879	
2. In the Social Science experiments are impossible, 881	
3. —the Method of Difference inapplicable, 881	
4. —and the Methods of Agreement, and of Concomitant Variations, inconclusive, 883	
5. The Method of Residues 'also inconclusive, and' presupposes Deduction, 884	
CHAPTER VIII. Of the Geometrical, or Abstract Method	887
§ 1. Characters of this mode of thinking, 887	
2. Examples of the Geometrical Method, 888	
3. The interest-philosophy of the Bentham School, 889	
CHAPTER IX. Of the Physical, or Concrete Deductive Method	895
§ 1. The Direct and Inverse Deductive Methods, 895	
2. Difficulties of the Direct Deductive Method in the Social Science, 898	

3.	To what extent the different branches of sociological speculation can be studied apart. Political Economy characterized, 900	
4.	Political Ethology, or the science of national character, 904	
5.	The Empirical Laws of the Social Science, 907	
6.	The Verification of the Social Science, 908	
CHAPTER X.	Of the Inverse Deductive, or Historical Method	911
§ 1.	Distinction between the general Science of Society, and special sociological inquiries, 911	
2.	What is meant by a State of Society? 911	
3.	The Progressiveness of Man and Society, 913	
4.	The laws of the succession of states of society can only be ascertained by the Inverse-Deductive Method, 915	
5.	Social Statics, or the science of the Coexistences of Social Phenomena, 917	
6.	Social Dynamics, or the science of the Successions of Social Phenomena, 924	
7.	Outlines of the Historical Method, 925	
8.	Future prospects of Sociological Inquiry, 928	
^m CHAPTER XI.	Additional Elucidations of the Science of History	931
§ 1.	The subjection of historical facts to uniform laws is verified by statistics, 931	
2.	—does not imply the insignificance of moral causes, 934	
3.	—nor the inefficacy of the characters of individuals and of the acts of governments, 936	
4.	The historical importance of eminent men and of the policy of governments illustrated ^m , 939	
CHAPTER "XII."	Of the Logic of Practice, or Art; including Morality and Policy	943
§ 1.	Morality not a Science, but an Art, 943	
2.	Relation between rules of art and the theorems of the corresponding science, 943	
3.	What is the proper function of rules of art? 945	
4.	Art cannot be Deductive, 946	
5.	°Every Art consists of° truths of Science, arranged in the order suitable for ^p some ^p practical use, 947	
6.	^q Teleology, or the Doctrine of Ends ^q , 949	
^r 7.	Necessity of an ultimate standard, or first principle of Teleology ^r , 951	
^s 8. ^s	Conclusion, 952	
^{m-m}	+62, 65, 68, 72	
ⁿ⁻ⁿ	MS, 43, 46, 51, 56 xi.	
^{o-o}	MS, 43, 46 Art consists of the	
^{p-p}	+51, 56, 62, 65, 68, 72	
^{q-q}	MS, 43, 46 Application of the preceding principles to Morality	
^{r-r}	+51, 56, 62, 65, 68, 72	
^{s-s}	MS, 43, 46 § 7.	

APPENDICES

APPENDIX A. The Early Draft of the <i>Logic</i>	955
Introductory Matter, 961	
Statement of the Problem, 969	
Of Names, 974	
Classification of Things, 989	
Of Predication, 1005	
Of the Predicables or Universals, 1030	
Of Definition, 1040	
Of Inference, or Reasoning, 1053	
Of Ratiocination, or Syllogism, 1057	
Of Trains of Reasoning, 1079	
Of Deductive Sciences, 1083	
Of Demonstration; and Necessary Truths, 1088	
Of Induction in General, 1099	
Of the Various Grounds of Induction, 1103	
Of the Uniformity in the Course of Nature, 1106	
APPENDIX B. Supplementary Note to Book II, Chapter iii, 4th edition, with variant notes to the 3rd and 5th to 8th editions.	1111
APPENDIX C. Book III, Chapter v, § 9, 2nd edition, with variant notes to the MS and 1st editions.	1118
APPENDIX D. Book III, Chapter x, § 4, variant ^a , 7th edition, with variant notes to the 4th to 6th editions.	1120
APPENDIX E. Book III, Chapter xiii, §§ 1–3, 5th edition, with variant notes to the MS and 1st to 4th editions.	1132
APPENDIX F. Book III, Chapter xviii, 1st edition, with variant notes to the MS	1140
APPENDIX G. Book III, Chapter xxv, § 5, 1st edition, with variant notes to the MS	1151
APPENDIX H. Book VI, Chapter xi, § 6, 2nd edition, with variant notes to the MS and 1st edition.	1154
APPENDIX I. Typographical errors in the 8th edition.	1156
APPENDIX J. Description of the Press-copy Manuscript.	1161
APPENDIX K. Bibliographic Index of persons and works cited in the <i>Logic</i> , with variants and notes.	1170
INDEX	1243
