<i>Preface</i>	<i>xi</i>
Part I Introduction	1
1 Theory Really Matters: Philosophy of Biology and Social Issues	
1.1 The Science of Life Itself	3
1.2 Is There an Essential Human Nature?	7
1.3 Is Genuine Altruism Possible?	10
1.4 Are Human Beings Programmed by Their Genes?	13
1.5 Biology and the Pre-emption of Social Science	17
1.6 What Should Conservationists Conserve?	19
2 The Received View of Evolution	
2.1 The Diversity of Life	22
2.2 Evolution and Natural Selection	31
2.3 The Received View and Its Challenges	38
Part II Genes, Molecules, and Organisms	53
3 The Gene's Eye View of Evolution	
3.1 Replicators and Interactors	55
3.2 The Special Status of Replicators	61
3.3 The Bookkeeping Argument	66
3.4 The Extended Phenotype	70
4 The Organism Strikes Back	
4.1 What Is a Gene?	77
4.2 Genes Are Active Germ Line Replicators	82
4.3 Genes Are Difference Makers	87

5 The Developmental Systems Alternative

5.1 Gene Selectionism and Development	94
5.2 Epigenetic Inheritance and Beyond	95
5.3 The Interactionist Consensus	97
5.4 Information in Development	100
5.5 Other Grounds for Privileging Genes	106
5.6 Developmental Systems and Extended Replicators	107
5.7 One True Story?	109

6 Mendel and Molecules

6.1 How Theories Relate: Displacement, Incorporation, and Integration	112
6.2 What Is Mendelian Genetics?	121
6.3 Molecular Genetics: Transcription and Translation	124
6.4 Gene Regulation	128
6.5 Are Genes Protein Makers?	132

7 Reduction: For and Against

7.1 The Antireductionist Consensus	137
7.2 Reduction by Degrees?	139
7.3 Are Genes DNA Sequences Plus Contexts?	141
7.4 The Reductionist Anticonsensus	142

Part III Organisms, Groups, and Species 149

8 Organisms, Groups, and Superorganisms

8.1 Interactors	151
8.2 The Challenge of Altruism	153
8.3 Group Selection: Take 1	156
8.4 Group Selection: Take 2	160
8.5 Population-Structured Evolution	166
8.6 Organisms and Superorganisms	172

9 Species

9.1 Are Species Real?	180
9.2 The Nature of Species	184
9.3 The One True Tree of Life	194
9.4 Species Selection	201

Part IV Evolutionary Explanations	215
10 Adaptation, Perfection, Function	
10.1 Adaptation	217
10.2 Function	220
10.3 The Attack on Adaptationism	224
10.4 What Is Adaptationism?	226
10.5 Structuralism and the <i>Bauplan</i>	228
10.6 Optimality and Falsifiability	234
10.7 Adaptation and the Comparative Method	241
11 Adaptation, Ecology, and the Environment	
11.1 The Received View in Ecology	253
11.2 History and Theory in Ecology	258
11.3 The Balance of Nature	266
11.4 Niches and Organisms	268
11.5 Reconstructing Niches	272
11.6 Unfinished Business	276
12 Life on Earth: The Big Picture	
12.1 The Arrow of Time and the Ladder of Progress	280
12.2 Gould's Challenge	287
12.3 What Is Disparity?	291
12.4 Contingency and Its Consequences	296
12.5 Mass Extinction and the History of Life	302
12.6 Conclusions	306
Part V Evolution and Human Nature	311
13 From Sociobiology to Evolutionary Psychology	
13.1 1975 and All That	313
13.2 The Wilson Program	318
13.3 From Darwinian Behaviorism to Darwinian Psychology	321
13.4 Evolutionary Psychology and Its Promise	324
13.5 Evolutionary Psychology and Its Problems	328
13.6 Memes and Cultural Evolution	332
14 A Case Study: Evolutionary Theories of Emotion	
14.1 Darwin on the Emotions	337
14.2 Sociobiology and Evolutionary Psychology on the Emotions	341

x Contents

14.3	The Modular Emotions	344
14.4	Beyond the Modular Emotions	348
14.5	Emotion, Evolution, and Evolved Psychology	352

Part VI Concluding Thoughts 355

15 What Is Life?

15.1	Defining Life	357
15.2	Universal Biology	364
15.3	Simulation and Emergence	370

<i>Final Thoughts</i>	379
