

Contents

Translator's Note	xv
Preface	1
1 Democratic materialism and materialist dialectic	1
2 For a didactics of eternal truths	9
3 Mathematical example: numbers	10
4 Artistic example: horses	16
5 Political example: the state revolutionary (equality and terror)	20
6 Amorous example: from Virgil to Berlioz	28
7 Distinctive features of truths, persuasive features of freedom	33
8 Body, appearing, Greater Logic	35
Technical Note	41
Book I <i>Formal Theory of the Subject (Meta-physics)</i>	43
1 Introduction	45
2 Referents and operations of the faithful subject	50
3 Deduction of the reactive subject: reactionary novelties	54
4 The obscure subject: full body and occultation of the present	58

LOGICS OF WORLDS

5	The four subjective destinations	62
6	The final question	67
7	Truth-procedures and figures of the subject	69
8	Typology	72
Scholium: A Musical Variant of the Metaphysics of the Subject		79
Foreword to Books II, III and IV: The Greater Logic		91
Book II <i>Greater Logic</i>, 1. <i>The Transcendental</i>		97
Introduction		99
1	Necessity of a transcendental organization of the situations of being	101
2	Exposition of the transcendental	102
3	The origin of negation	104
Section 1 The Concept of Transcendental		109
1	Inexistence of the Whole	109
2	Derivation of the thinking of a multiple on the basis of that of another multiple	111
3	A being is thinkable only insofar as it belongs to a world	113
4	Appearing and the transcendental	118
5	It must be possible to think, in a world, what does not appear within that world	122
6	The conjunction of two apparents in a world	125
7	Regional stability of worlds: the envelope	128
8	The conjunction between a being-there and a region of its world	131
9	Dependence: the measure of the link between two beings in a world	133
10	The reverse of an apparent in the world	135
11	There exists a maximal degree of appearance in a world	138
12	What is the reverse of a maximal degree of appearance?	139

Section 2 Hegel	141
1 Hegel and the question of the Whole	141
2 Being-there and logic of the world	144
3 Hegel cannot allow a minimal determination	147
4 The appearing of negation	149
Section 3 Algebra of the Transcendental	153
1 Inexistence of the Whole: to affirm the existence of a set of all sets is intrinsically contradictory	153
2 Function of appearing and formal definition of the transcendental	155
3 Equivalence-structure and order-structure	157
4 First transcendental operation: the minimum or zero	159
5 Second transcendental operation: conjunction	160
6 Third transcendental operation: the envelope	163
7 Conjunction of a being-there and an envelope: distributivity of \cap with regard to Σ	165
8 Transcendental algebra	166
9 Definitions and properties of the reverse of a transcendental degree	167
10 In every transcendental, the reverse of the minimum μ is a maximal degree of appearance (M) for the world whose logic is governed by that transcendental	169
11 Definition and properties of the dependence of one transcendental on another	171
Section 4 Greater Logic and Ordinary Logic	173
1 Semantics: truth-values	175
2 Syntax: conjunction ('and'), implication ('if . . . then'), negation, alternative ('or')	176
3 The existential quantifier	178
4 The universal quantifier	180

Section 5 Classical Worlds	183
1 What is a classical world?	183
2 Transcendental properties of the world of ontology	185
3 Formal properties of classical worlds	187
Appendix: Demonstration of the Equivalence of the Three Characteristic Properties of a Classical World	189
Book III <i>Greater Logic</i>, 2. <i>The Object</i>	191
Introduction	193
Section 1 For a New Thinking of the Object	199
1 Transcendental indexing: the phenomenon	199
2 The phenomenon: second approach	204
3 Existence	207
4 Analytic of phenomena: component and atom of appearing	211
5 Real atoms	217
6 Definition of an object	220
7 Atomic logic, 1: the localization of the One	221
8 Atomic logic, 2: compatibility and order	225
9 Atomic logic, 3: real synthesis	229
Section 2 Kant	231
Section 3 Atomic Logic	243
1 Function of appearing	243
2 The phenomenon	245
3 Existence	246
4 Phenomenal component and atom of appearing	247
5 Real atom and postulate of materialism	250
6 Definition of the object	251
7 Atomic logic, 1: localizations	252
8 Atomic logic, 2: compatibility	255
9 Atomic logic, 3: order	257

10	Atomic logic, 4: the relation between relations	259
11	Atomic logic, 5: real synthesis	261
Section 4 Existence and Death		267
1	Existence and death according to phenomenology and vitalism	267
2	Axiomatic of existence and logic of death	269
Appendix: Three Demonstrations		271
1	On compatibility: algebraic and topological definitions	271
2	Topological definition of the onto-logical order $<$	273
3	Demonstration of proposition P.6	275
A Scholium as Impressive as it is Subtle: The Transcendental Functor		277
1	Objective phenomenology of the existential analysis of an object and of the construction of the transcendental functor	277
2	Example of a functor: logical evaluation of a battle	280
3	Formal demonstration: existence of the transcendental functor	289
Book IV <i>Greater Logic</i>, 3. <i>Relation</i>		297
Introduction		299
Section 1 Worlds and Relations		303
1	The double determination of a world: ontology and logic	303
2	Every world is infinite, and its type of infinity is inaccessible	306
3	What is a relation between objects?	310
4	Logical completeness of a world	313
5	The second constitutive thesis of materialism: subordination of logical completeness to ontological closure	317
6	The inexistent	321

Section 2 Leibniz	325
Section 3 Diagrams	331
1 Ontology of worlds: inaccessible closure	331
2 Formal definition of a relation between objects in a world	335
3 Second fundamental thesis of materialism: every relation is universally exposed	340
4 The inexistent	341
Appendix: Demonstration of the Second Constitutive Thesis of Materialism: The Ontological Closure of a World Implies its Logical Completeness	345
General Appendix to the Greater Logic: The 11 Propositions	353
Book V <i>The Four Forms of Change</i>	355
Introduction	357
1 The question of change	357
2 Subversion of appearing by being: the site	360
3 Logic of the site: towards singularity	361
4 Plan of Book V	361
Section 1 Simple Becoming and True Change	363
1 Subversion of appearing by being: the site	363
2 Ontology of the site	366
3 Logic of the site, 1: consequences and existence	369
4 Logic of the site, 2: fact and singularity	371
5 Logic of the site, 3: weak singularity and strong singularity	374
6 Logic of the site, 4: existence of the inexistent	376
7 Logic of the site, 5: destruction	379

Section 2 The Event According to Deleuze	381
Section 3 Formalizing the Upsurge?	389
1 Variations in the status of the formal expositions	389
2 Ontology of change	390
3 Logic and typology of change	391
4 Table of the forms of change	394
5 Destruction and recasting of the transcendental	394
Book VI <i>Theory of Points</i>	397
Introduction	399
Section 1 The Point as Choice and as Place	403
1 The scene of the points: three examples	403
2 Point and power of localization	409
3 Interior and topological space	411
4 The space of points, 1: positivation of a transcendental degree	414
5 The space of points, 2: the interior of a group of points	417
6 Atonic worlds	420
7 Tensed worlds	422
Section 2 Kierkegaard	425
1 The Christian paradox	428
2 Doctrine of the point	430
3 Ambiguities of the subject	433
Section 3 Topological Structure of the Points of a World	437
1 Definition	437
2 The interior and its properties. Topological space	440
3 The points of a transcendental form a topological space	441
4 Formal possibility of atonic worlds	444
5 Example of a tensed world	446

Book VII <i>What is a Body?</i>	449
Introduction	451
Section 1 Birth, Form and Destiny of Subjectivizable Bodies	455
1 Birth of a body: first description	455
2 Birth of a body: second description	459
3 The body of the poem	466
4 Organs: first description	468
5 Bodies and organs of the matheme	471
Section 2 Lacan	477
Section 3 Formal Theory of the Body, Or, We Know Why a Body Exists, What It Can and Cannot Do	483
1 First formal sketch: definition and existence of a body	483
2 Second formal sketch: corporeal treatment of points	487
Scholium: A Political Variant of the Physics of the Subject-of-Truth	493
Conclusion <i>What is it to Live?</i>	505
Notes, Commentaries and Digressions	515
Statements, Dictionaries, Bibliography, Iconography and Index	567
1 The 66 statements of <i>Logics of Worlds</i>	569
2 Dictionary of concepts	579
3 Dictionary of symbols	599
4 Selected bibliography	601
5 Iconography	605
6 Index	611
