

## TABLE OF CONTENTS

	PAGE
PREFACE . . . . .	VII
EXPLANATION OF NOTATIONS. . . . .	XIII
<b>CHAPTER 11. ADDENDA TO PURE COMBINATORY LOGIC . . . . .</b>	<b>1</b>
A. Preliminaries . . . . .	1
B. The weak theory of combinators . . . . .	22
C. Bracket abstraction. . . . .	42
D. The synthetic theory of combinators . . . . .	67
E. Strong reduction . . . . .	86
F. C-systems . . . . .	130
<b>CHAPTER 12. FOUNDATIONS OF THE ILLATIVE THEORY . . . . .</b>	<b>163</b>
A. Illative systems in general . . . . .	163
B. Proper illative systems . . . . .	175
C. Inferential systems for $\mathcal{D}$ . . . . .	186
D. CL-systems . . . . .	207
<b>CHAPTER 13. COMBINATORY ARITHMETIC . . . . .</b>	<b>211</b>
A. Foundations. . . . .	211
B. Gödelian epitheory . . . . .	245
C. Combinatory syntax . . . . .	258
D. Typed combinatory arithmetic . . . . .	275
<b>CHAPTER 14. THE THEORY OF FUNCTIONALITY . . . . .</b>	<b>292</b>
A. Preliminaries . . . . .	292
B. Properties of F-deductions. . . . .	296
C. Deductive theory of $\mathcal{F}_1$ . . . . .	304
D. A $\lambda$ -formulation . . . . .	308
E. An L-formulation . . . . .	317
F. The system $\mathcal{F}_{12}$ . . . . .	335
<b>CHAPTER 15. THE THEORY OF RESTRICTED GENERALITY . . . . .</b>	<b>339</b>
A. The system $\mathcal{F}_{20}$ . . . . .	340
B. Deductive theory of $\mathcal{F}_2$ . . . . .	356
C. Finite formulations. . . . .	381
D. The predicate calculus . . . . .	414

	PAGE
CHAPTER 16. THE THEORY OF UNIVERSAL GENERALITY . . . . .	427
A. The system $\mathcal{F}_{30}$ . . . . .	428
B. Deductive theory of $\mathcal{F}_{31}$ . . . . .	432
C. Deductive theory of $\mathcal{F}_{32}$ . . . . .	438
D. Finite formulations. . . . .	445
CHAPTER 17. COMBINATORY TYPE THEORY . . . . .	452
A. Formulations . . . . .	452
B. Valuations and models . . . . .	461
C. Kinds of type theory . . . . .	478
BIBLIOGRAPHY. . . . .	499
INDEX . . . . .	505
