

## TABLE OF CONTENTS

PREFACE .....	vii
<b>PART I: Philosophical Foundations</b> .....	<b>1</b>
1. Introduction and Statement of the Problem .....	1
2. What's Wrong with Set Theory? .....	13
3. What's Wrong with Infinite Quantifiers? .....	24
4. Abstraction and Idealisation .....	41
5. What are Constructions? .....	51
6. Truth and Proof of Logical Formulae .....	70
7. The Need for a Theory of Constructions .....	77
8. Theories of Constructions .....	82
9. Hilbert's Formalism .....	98
10. Open-endedness .....	117
11. Analysis .....	128
<b>PART II: The Theory of Constructions</b> .....	<b>140</b>
12. Introduction to Part II .....	140
13. Design of the Term Language .....	142
14. The Term Language .....	150
15. From the Term Language to the Expanded Term Language .....	162
16. The Expanded Term Language .....	199
17. The Protological Sequent Calculus .....	209
18. Commentary on the Protological Axioms and Rules .....	212
19. From Protologic to Expanded Protologic .....	216
20. Expanded Protologic .....	231
21. From Expanded Protologic to the Coding of Trees .....	234
22. The Coding of Trees .....	253
23. The Expanded Term Language as a Functional Programming Language .....	257
<b>PART III: The Interpretation of Arithmetic</b> .....	<b>272</b>
24. Introduction to Part III .....	272
25. From the Coding of Trees to Logic .....	275
26. Logic .....	286
27. From Logic to the Calculus of Proof Functions .....	290
28. Calculus of Proof Functions .....	323
29. From Calculus of Proof Functions to the Logic of Partial Terms ..	326

30. Logic of Partial Terms .....	349
31. From Logic of Partial Terms to Heyting Arithmetic .....	353
32. Heyting Arithmetic .....	369
33. From Heyting Arithmetic to Peano Arithmetic .....	372
34. Peano Arithmetic .....	386
35. Conclusions on Arithmetic .....	389
 PART IV: The Interpretation of Analysis .....	 392
36. Introduction to Part IV .....	392
37. From Expanded Protologic to the Second-Order Coding of Trees .	395
38. The Second-Order Coding of Trees .....	400
39. From the Second-Order Coding of Trees to Second-Order Logic ..	402
40. Second-Order Logic .....	406
41. From Second-Order Logic to Second-Order Calculus of Proof Functions .....	408
42. Second-Order Calculus of Proof Functions .....	415
43. From Second-Order Calculus of Proof Functions to Second-Order Logic of Partial Terms .....	417
44. Second-Order Logic of Partial Terms .....	424
45. From Second-Order Logic of Partial Terms to Second-Order Heyting Arithmetic .....	426
46. Second-Order Heyting Arithmetic .....	432
47. From Second-Order Heyting Arithmetic to Second-Order Peano Arithmetic .....	434
48. Second-Order Peano Arithmetic .....	443
49. Conclusions on Analysis .....	447
 REFERENCES .....	 449
 INDEX .....	 459
Index of symbols .....	459
Index of axioms, theorems and rules of inference .....	461
Index of names .....	464
Index of topics .....	466
