<b>Preface</b>	<b>ix</b>
<b>Introduction</b>	<b>1</b>
<b>Chapter 1. <i>The Case of Allergic Disease: From Everyday Observation to Microstructural Explanation</i></b>	<b>7</b>
1.1 Experimentation and Research Science	8
1.1.1 Observable Mysteries	9
1.1.2 Physical Microstructure	11
1.2 Mechanism and Testing	14
1.2.1 Mast Cell Release	14
1.2.2 Immunoglobulin E	14
1.3 Intervention and Manipulation	18
1.3.1 Released Inflammatory Mediator Blockade	19
1.3.2 Mast Cell Release Blockade	19
1.3.3 Immunoglobulin E Blockade	20
1.4 Unification and Explanation	22
1.4.1 Immunoglobulin E, Anthelmintic	22
1.4.2 Allergy Genes	24
1.4.3 Determination and Explanation	25
Further Readings	27

<b>Chapter 2.</b>	<b><i>The Positivist Model of Scientific Theories</i></b>	<b>28</b>
2.1	Theories as Formal Languages	29
2.2	A Dummy Scientific Theory to Illustrate the Positivist Model	36
	Further Readings	40
<b>Chapter 3.</b>	<b><i>Trouble in Positivist Paradise</i></b>	<b>41</b>
3.1	The Point of the Observational/Theoretical Distinction	41
3.1.1	Ease of Application	42
3.1.2	Instrumentation	43
3.1.3	Putnamian Cynicism	45
3.1.4	Encapsulated Information Processing	47
3.1.5	Sensory Surface Distance	49
3.2	Correspondence-Rules	53
3.2.1	Dispositional Properties	53
3.2.2	Holism	58
	Further Readings	62
<b>Chapter 4.</b>	<b><i>The Underdetermination of Theory</i></b>	<b>63</b>
4.1	The Quine-Duhem Thesis	64
4.2	Popperian Falsificationism	67
4.3	Is Underdetermination a Myth?	73
4.4	Pragmatism and Realism	77
	Further Readings	80
<b>Chapter 5.</b>	<b><i>Reductionism, Antireductionism, and Supervenience</i></b>	<b>81</b>
5.1	Nagel's Model of Reduction	84
5.2	Kemeny and Oppenheim's Model of Reduction	87
5.3	The Unity of Science Program	90
5.4	The Putnam/Fodor Multiple Realization Argument against the Unity of Science	93
5.5	Supervenience to the Rescue?	98
5.5.1	Kim's Model of Supervenience	99
5.5.2	Modest Physicalism	100
	Further Readings	103
<b>Chapter 6.</b>	<b><i>The Structure of Scientific Explanation</i></b>	<b>104</b>
6.1	The Deductive-Nomological (D-N) Model of Scientific Explanation	107
6.1.1	Laws of Nature	111
6.1.2	Standard Counterexamples to the D-N Model	114

6.2	The Aleatory Model of Scientific Explanation	115
6.3	The Unification Model of Scientific Explanation	117
6.4	Natural Kinds, Homeostatic Property Clusters, and the Structural Basis of Reality	124
	Further Readings	128
<b>Chapter 7.</b>	<b><i>The Revenge of Historicism</i></b>	<b>129</b>
7.1	Anti-Incrementalism	131
7.2	Paradigms and the Practice of Normal Science	132
7.3	Puzzle Solving and the Cautiousness of Normal Science	135
7.4	Anomalies	139
7.5	Revolutionary Science	141
7.6	Antirealism, Relativism, and Their Shadows	146
7.7	The Case of Modern Immunology	149
	Further Readings	156
<b>Chapter 8.</b>	<b><i>The Social Constructivist Challenge</i></b>	<b>157</b>
8.1	The Strong Programme	158
8.2	Roll Over Socrates: Philosophy as the Bad Guy	163
8.3	The Case Method with a Vengeance	165
8.4	The View from Deep in the Swamp of History	174
8.5	The Inequality of Theoretical Alternatives	177
	Further Readings	180
<b>Chapter 9.</b>	<b><i>The Politics of Epistemology</i></b>	<b>181</b>
9.1	The Genderization of Scientific Knowledge	181
9.2	Postmodernist Feminism: Sandra Harding	182
9.3	Feminist Social Activism: Helen Longino	189
9.4	Feminist Empiricism: Lynn Hankinson Nelson	196
	Further Readings	205
<b>Chapter 10.</b>	<b><i>The Actual Way Things Really Are</i></b>	<b>206</b>
10.1	What Can or Cannot Happen in the Limit of Inquiry	207
10.2	The Cosmic Coincidence Argument for Scientific Realism	211
	10.2.1 The Convergence Argument	212
	10.2.2 The Manipulability Argument	218

10.3 The Case for Scientific Antirealism	223
10.3.1 Antirealism: Success Is Self-defeating for Realism	223
10.3.2 Antirealism: Success Needs No Explanation at All	226
10.3.3 Antirealism: Success Isn't What You Think It Is	231
10.3.4 Antirealism: Success May Have Nothing to Do with Truth	232
10.4 Conclusion	238
Further Readings	240
<b>Glossary</b>	<b>242</b>
<b>Suggested Readings</b>	<b>251</b>
<b>Index</b>	<b>253</b>
