<b>Preface to the second edition</b>	viii
<b>Preface to the first edition</b>	x
<b>1. Ordered sets</b>	1
Ordered sets	1
Examples from social science and computer science	5
Diagrams: the art of drawing ordered sets	10
Constructing and de-constructing ordered sets	14
Down-sets and up-sets	20
Maps between ordered sets	23
Exercises	25
<b>2. Lattices and complete lattices</b>	33
Lattices as ordered sets	33
Lattices as algebraic structures	39
Sublattices, products and homomorphisms	41
Ideals and filters	44
Complete lattices and $\cap$ -structures	46
Chain conditions and completeness	50
Join-irreducible elements	53
Exercises	56
<b>3. Formal concept analysis</b>	65
Contexts and their concepts	65
The fundamental theorem of concept lattices	70
From theory to practice	74
Exercises	79
<b>4. Modular, distributive and Boolean lattices</b>	85
Lattices satisfying additional identities	85
The $M_3$ - $N_5$ Theorem	88
Boolean lattices and Boolean algebras	93
Boolean terms and disjunctive normal form	96
Exercises	104

<b>5. Representation: the finite case</b>	112
Building blocks for lattices	112
Finite Boolean algebras are powerset algebras	114
Finite distributive lattices are down-set lattices	116
Finite distributive lattices and finite ordered sets in partnership	119
Exercises	124
<b>6. Congruences</b>	130
Introducing congruences	130
Congruences and diagrams	134
The lattice of congruences of a lattice	137
Exercises	140
<b>7. Complete lattices and Galois connections</b>	145
Closure operators	145
Complete lattices coming from algebra: algebraic lattices	148
Galois connections	155
Completions	165
Exercises	169
<b>8. CPOs and fixpoint theorems</b>	175
CPOs	175
CPOs of partial maps	180
Fixpoint theorems	182
Calculating with fixpoints	189
Exercises	193
<b>9. Domains and information systems</b>	201
Domains for computing	201
Domains re-modelled: information systems	204
Using fixpoint theorems to solve domain equations	221
Exercises	223
<b>10. Maximality principles</b>	228
Do maximal elements exist? – Zorn’s Lemma and the Axiom of Choice	228
Prime and maximal ideals	232
Powerset algebras and down-set lattices revisited	237

Exercises	244
<b>11. Representation: the general case</b>	<b>247</b>
Stone's representation theorem for Boolean algebras	247
Meet LINDA: the Lindenbaum algebra	252
Priestley's representation theorem for distributive lattices	256
Distributive lattices and Priestley spaces in partnership	261
Exercises	267
<b>Appendix A: a topological toolkit</b>	<b>275</b>
<b>Appendix B: further reading</b>	<b>280</b>
<b>Notation index</b>	<b>286</b>
<b>Index</b>	<b>289</b>
