

IN
THE
LIGHT
OF
LOGIC

Solomon Feferman

New York Oxford

Oxford University Press

1998

Contents

I FOUNDATIONAL PROBLEMS

- 1 Deciding the undecidable: Wrestling with Hilbert's problems 3
- 2 Infinity in mathematics: Is Cantor necessary? 28

II FOUNDATIONAL WAYS

- 3 The logic of mathematical discovery versus the logical structure of mathematics 77
- 4 Foundational ways 94
- 5 Working foundations 105

III GÖDEL

- 6 Gödel's life and work 127
- 7 Kurt Gödel: Conviction and caution 150
- 8 Introductory note to Gödel's 1933 lecture 165

IV PROOF THEORY

- 9 What does logic have to tell us about mathematical proofs? 177
- 10 What rests on what? The proof-theoretic analysis of mathematics 187
- 11 Gödel's *Dialectica* interpretation and its two-way stretch 209

V COUNTABLY REDUCIBLE MATHEMATICS

12 Infinity in mathematics: Is Cantor necessary? (Conclusion)	229
13 Weyl vindicated: <i>Das Kontinuum</i> seventy years later	249
14 Why a little bit goes a long way: Logical foundations of scientifically applicable mathematics	284
Symbols	299
