Medieval Cosmology

Theories of Infinity, Place, Time, Void, and the Plurality of Worlds

Pierre Duhem

Edited and Translated by Roger Ariew

The University of Chicago Press
Chicago and London

Contents

Foreword, by Stanley L. Jaki xi

Preface xix

Part I. The Two Infinites 3

1. Infinitely Small and Infinitely Large (VII, 3-88)

Actual Infinity in Number and the Immortality of the Soul 3

Geometric Arguments against Infinite Divisibility 18

Are Indivisibles Pure Abstractions? 20

The Natural Minimum of a Substance 35

Infinite Divisibility: Categorematic and Syncategorematic Infinites 45

The Concept of Limit: Maximum and Minimum 56

2. Infinitely Large (VII, 89-157) 73

The Scholastic Formulation of the Problem of the Infinitely Large 73

The Possibility of the Syncategorematic Infinite 78

The Possibility of the Categorematic Infinite: First Attempts 89

The Possibility of the Categorematic Infinite: The Doctrine of Gregory of Rimini 109

Gregory of Rimini's Adversaries: John Buridan and Albert of Saxony 119

Gregory of Rimini's Followers: Nicole Oresme and Marsilius of Inghen 126

3. Infinity in Fifteenth-Century Cosmology 133

Paul of Venice (X, 392-96) 133

Part II. Place

4. Theory of Place before the Condemnations of 1277 (VII, 158-202) **139**

Arabic Theory of Place 139
The Questions of Master Roger Bacon 143
Albertus Magnus 145
Saint Thomas Aquinas 153
Giles of Rome 159
Graziadei of Ascoli 163
Roger Bacon 169
The Place of the World in the Firmament: Campanus of Novara and Pierre d'Ailly 173

5. Theory of Place from the Condemnations of 1277 to the End of the Fourteenth Century (VII, 203-302) **179**

A Proposition Condemned by Etienne Tempier: Richard of Middleton 179
John Duns Scotus 183
John of Jandun 185
The Scotist School 197
John of Bassols 206
William of Ockham 207
Walter Burley 220
Nicholas Bonet 229
John Buridan 237
Albert of Saxony 247
Marsilius of Inghen and John Buridan II 252
The immobility of Place and God's Immutability: Thomas Wilton, Francis of Mayronnes, Nicholas Bonet, and Nicole Oresme 257

6. Place in Fifteenth-Century Cosmology **269**

Nicholas of Orbellis (X, 50) 269
George of Brussels and Thomas Bricot (X, 79-81) 270
Fifteenth-Century Albertists and Thomists (X, 159-60) 271
Parisian Doctrines in Germany (X, 204-10) 272
Paul of Venice (X, 396-412) 277

Part III. Time

7. Time (VII, 363-441) **295**

Time according to John Duns Scotus 295

Time according to Peter Aureol 300
Time according to William of Ockham 305
Time according to William of Ockham (*continued*): The Absolute Clock 309
The Analogy between Time and Place: Franciscus de Marchia 321
Is the Absolute Clock Arbitrarily Chosen? Walter Burley, John Buridan, Albert of Saxony, and Marsilius of Inghen 323
The Atomism of Gerard of Odon and Nicholas Bonet 331
Movement and Time according to Nicholas Bonet. Although Continuous in the Mind, Successive Beings Are Discontinuous in Reality 338
Time according to Nicholas Bonet: Physical Time and Mathematical Time 351
The Problem of the Absolute Clock according to Graziadei of Ascoli 359
Conclusion of the Problem of the Absolute Clock 361

8. Time in Fifteenth-Century Cosmology **365**
Paul of Venice (X, 415-17) 365

Part IV. Void

9. Void and Movement in the Void (VIII, 7-60) **369**
The Void and Arabic Philosophy: Ibn Bajja 369
The Impossibility of Void and Scholasticism before 1277: Ibn Bajja's Argument. Saint Thomas Aquinas and the Concept of Mass 371
The Impossibility of Void and Scholasticism before 1277: The Void and the Plurality of Worlds 387
The Condemnations of 1277 and the Possibility of Void 392
Godfrey of Fontaines 392
Henry of Ghent 393
Richard of Middleton 396
Ramon Lull 398
William Varon 399
John Duns Scotus 400
Joannes Canonicus 403
Petrus Aquilanus 404
Robert Holkot 404

Walter Burley 405
John Buridan 408
Albert of Saxony and Marsilius of Inghen 410
Nicole Oresme 411
Graziadei of Ascoli 413

10. Void in Fifteenth-Century Cosmology 415

Nicholas of Orbellis (X, 50-51) 415
John Hennon (X, 60-62) 416
George of Brussels and Thomas Bricot (X, 81-84) 417
Parisian Doctrines in Germany (X, 210-13) 420
Paul of Venice (X, 417-22) 422

Part V. The Plurality of Worlds

11. The Problem of the Plurality of Worlds in Peripatetic Philosophy (I, 230-41) 431

Aristotle and the Plurality of Worlds 431
The Plurality of Worlds according to Simplicius and Averroes 435

12. The Problem of the Plurality of Worlds in Scholastic Philosophy (IX, 363-430) 441

Scholasticism and the Plurality of Worlds before the Condemnations of 1277. The Plurality of Worlds and the Void: Michael Scot, William of Auvergne, and Roger Bacon. The Plurality of Worlds and the Change in Weight according to Its Distance from the Center of the World: Albertus Magnus and Saint Thomas Aquinas 441
The Plurality of Worlds and the Condemnations of 1277: Godfrey of Fontaines, Henry of Ghent, Richard of Middleton, and Giles of Rome 449
William Varon, John of Bassols, and Thomas of Strasburg 455
John of Jandun 460
William of Ockham and Robert Holkot 462
John Buridan and Albert of Saxony 466
Oxford University and the Assimilation of Weight to Magnetic Attraction 471
The Return to the Platonic Theory of Weight: Nicole Oresme 472
The Spot on the Lunar Disk (The Man on the Moon) 479

13. The Plurality of Worlds in Fifteenth-Century Cosmology 499
John Hennon (X, 70-72) 499
George of Brussels and Thomas Bricot (X, 94-95) 500
Paul of Venice (X, 437-440) 502
John Major (Etudes II, 92-94) 503
Gaetano of Thienis (Etudes II, 415-16) 504
Nicholas of Cusa (X, 319-24) 505
