Introduction	1

PART I. CONCEPTS

Chapter 1. Health	7
1.1 Summary	7
1.2 Neutralism and Naturalism	8
1.3 Well-Being and Normativism	11
1.4 Objectivism and Subjectivism	16
<i>Further Reading & Discussion Questions</i>	20
Chapter 2. Disease	21
2.1 Summary	21
2.2 Naturalism	22
2.3 Normativism	26
2.4 Hybridism	30
2.5 Eliminativism	32
2.6 Phenomenology	34
<i>Further Reading & Discussion Questions</i>	35
Chapter 3. Death	36
3.1 Summary	36
3.2 Defining Death	37
3.3 The Badness of Death	40
3.4 Ethics of Killing	44
<i>Further Reading & Discussion Questions</i>	47

PART II. MODELS AND KINDS

Chapter 4. Causation and Kinds	51
4.1 Summary	51
4.2 Three Theories of Causation	52
4.3 Diseases: Monocausal or Multifactorial?	54
4.4 Nosology	58
4.5 Precision Medicine	62
<i>Further Reading & Discussion Questions</i>	66
Chapter 5. Holism and Reductionism	67
5.1 Summary	67
5.2 Disease	68
5.3 Medical Interventions	73
5.4 Patient-Physician Relationship	76
<i>Further Reading & Discussion Questions</i>	79
Chapter 6. Controversial Diseases	80
6.1 Summary	80
6.2 Medicalization	83
6.3 Psychiatric Diseases	87
6.4 Culture-Bound Syndromes	89
6.5 Addiction	94
<i>Further Reading & Discussion Questions</i>	98

PART III. EVIDENCE AND INFERENCE

Chapter 7. Evidence in Medicine	103
7.1 Summary	103
7.2 Phases of Medical Research	104
7.3 Bias	106
7.4 Animal Models	109
7.5 Randomization	115
7.6 Meta-analysis	118
7.7 Mechanisms	120
<i>Further Reading & Discussion Questions</i>	123

Chapter 8. Objectivity and the Social Structure of Science	125
8.1 Summary	125
8.2 Industry Funding and Publication Bias	126
8.3 Demarcation	128
8.4 Value-Laden Science	130
8.5 Social Epistemology	134
<i>Further Reading & Discussion Questions</i>	139
Chapter 9. Inference	140
9.1 Summary	140
9.2 Causal Inference	141
9.3 Extrapolation	144
9.4 Measuring Effectiveness	147
9.5 Theories of Statistical Inference	151
9.6 Testing Precision Medicine	156
<i>Further Reading & Discussion Questions</i>	158
Chapter 10. Effectiveness, Skepticism, and Alternatives	159
10.1 Summary	159
10.2 Defining Effectiveness	160
10.3 Medical Nihilism	162
10.4 Alternative Medicine	166
10.5 Placebo	170
<i>Further Reading & Discussion Questions</i>	174
Chapter 11. Diagnosis and Screening	175
11.1 Summary	175
11.2 Diagnosis	176
11.3 Logic of Diagnostic Tests	178
11.4 Screening	181
<i>Further Reading & Discussion Questions</i>	186

PART IV. VALUES AND POLICY

Chapter 12. Psychiatry: Care or Control?	191
12.1 Summary	191
12.2 Psychiatric Nosology	192
12.3 Anti-psychiatry	197
12.4 Delusions and Exclusions	201
<i>Further Reading & Discussion Questions</i>	205
Chapter 13. Policy	207
13.1 Summary	207
13.2 Research Priorities	208
13.3 Intellectual Property	212
13.4 Standards for Regulation	216
<i>Further Reading & Discussion Questions</i>	220
Chapter 14. Public Health	222
14.1 Summary	222
14.2 Social Epidemiology	223
14.3 Preventive Medicine	226
14.4 Health Inequalities	230
<i>Further Reading & Discussion Question</i>	233
References	235
Index	243
