Preface ix

LIFE AND WORKS

Biographical sketch of Giuseppe Peano 3
Chronological list of the publications of Giuseppe Peano 11
Bibliography on the life and works of Giuseppe Peano 30

TRANSLATIONS OF SELECTED PUBLICATIONS

I
On the integrability of functions (1883) 37

II
Differential calculus and fundamentals of integral calculus (1884) 44
1 An analytic expression for the function which for rational x equals 0, and for irrational x equals 1
2 A counterexample to a theorem of Abel on convergent series
3 A generalization of the mean value theorem
4 A counterexample to a criterion of Serret for maxima and minima
5 An example of a function whose partial derivatives do not commute
6 Maxima and minima of functions of several variables
7 A new definition of the definite integral

III
On the integrability of first-order differential equations (1886) 51

IV
Integration by series of linear differential equations (1887) 58

V
Geometrical magnitudes (1887) 67
1 Point sets
2 Areas
3 Volumes
4 Integrals extended to point sets

VI
The geometrical calculus according to the Ausdehnungslehre of H. Grassmann, preceded by the operations of deductive logic (1888) 75
1 The operations of deductive logic
2 Geometrical formations

VII
The principles of arithmetic, presented by a new method (1889) 101

VIII
An approximation formula for the perimeter of the ellipse (1889) 135

IX
On the definition of the area of a surface 137
1 On the definition of the area of a surface (1890)
2 The definition of the area of a curved surface (1903)

X
A space-filling curve 143
1 On a curve which completely fills a planar region (1890)
2 Remarks on a space-filling curve (1908)

XI
On some singular curves (1890) 150

XII
The principles of mathematical logic (1891) 153

XIII
A generalization of Simpson's formula (1892) 162

XIV
On linear systems (1894) 167

XV
Essay on geometrical calculus (1896) 169

XVI
The most general question in the mathematical sciences (1896) 189

XVII
Studies in mathematical logic (1897) 190

XVIII
Supplement to 'On the Cantor-Bernstein Theorem' (1906) 206

XIX
On the foundations of analysis (1910) 219

XX
The importance of symbols in mathematics (1915) 227

XXI
Definitions in mathematics (1921) 235

Index of names 247
