

# Contents

<b>1. Traditional Science in a World of Change</b> .....	<b>1</b>
Assumptive Bases in the Sociobehavioral Sciences .....	6
The Threat of Instability .....	11
Decomposing Patterned Behavior .....	13
Fundamental Assumptions Revisited: The Hypothesis Test .....	34
The Retrenchment of Traditional Science .....	43
<b>2. The Communal Basis of Social Knowledge</b> .....	<b>59</b>
A Dilemma Solved and a Crisis Created .....	60
Science and the Dilemma of Identification .....	69
Descriptive Language: From Neurons to Nurture .....	78
The Revitalization of Theory .....	94
The Significance of Empirical Research .....	100
<b>3. Generative Theory and Degenerative Metatheory</b> .....	<b>107</b>
The Impact on Theory of Logical Empiricist Metatheory .....	113
Methodological Selection and Theoretical Constraint:	
The Controlled Experiment .....	126
Metatheoretical Constraints on Generative Theory .....	133
The Development of Generative Theory .....	139
<b>4. The Turning Point in Life-Span Study</b> .....	<b>147</b>
From the Stable to the Aleatory in Developmental Trajectory .....	148
The Emergence of Autonomous Self-Direction .....	157
The Functional Utility of Life-Span Theory .....	164

<b>5. The Historical Context of Transformation</b> .....	<b>173</b>
The Pivotal Conflict: Exogenic versus Endogenic World Views .....	174
The Struggle toward a New Science .....	189
Metatheoretical Bases for a Unified Alternative .....	200
Toward a Sociorationalism .....	207
<b>References</b> .....	<b>211</b>
