

## CONTENTS

SUMMARY . . . . .	1
I. THE $\lambda$ -SYSTEM . . . . .	3
1. The Situation in the Theory of Inductive Methods . . . . .	3
2. Our Task: The Construction of a Continuum of Inductive Methods . . . . .	7
3. Preliminary Explanations . . . . .	9
4. The Characteristic Function of an Inductive Method . . . . .	11
5. A Characteristic Function Gives a Complete Characterization . . . . .	16
6. Methods of Estimation . . . . .	18
7. The Empirical Factor and the Logical Factor . . . . .	22
8. An Interval for Values of $G$ . . . . .	25
9. The $\lambda$ -Functions . . . . .	27
10. A $\lambda$ -Function Gives a Complete Characterization . . . . .	30
11. Inductive Methods of the First Kind: $\lambda$ Is Independent of $\kappa$ . . . . .	32
12. The Nonextreme Methods . . . . .	33
13. The First Extreme Method: $\lambda = \infty$ . . . . .	37
14. The Second Extreme Method: $\lambda = 0$ ; the Straight Rule . . . . .	40
15. Inductive Methods of the Second Kind: $\lambda$ Is Dependent upon $\kappa$ . . . . .	44
16. The Difference between the Two Kinds of Inductive Methods . . . . .	47
17. Complete Inductive Methods . . . . .	51
18. The Choice of an Inductive Method . . . . .	53
II. COMPARISON OF THE SUCCESS OF INDUCTIVE METHODS . . . . .	56
19. Sampling Distributions . . . . .	56
20. The Mean Square Error as a Measure of Success . . . . .	59
21. The Mean Square Error with Respect to All $Q$ -Properties . . . . .	65
22. The Optimum Inductive Method for a Given State-Description . . . . .	68
23. Are Unbiased Estimate-Functions Preferable? . . . . .	73
24. The Problem of the Success in the Actual Universe . . . . .	75
APPENDIX . . . . .	81
25. Wald's Theory of Decision Functions and the Minimax Principle . . . . .	81
INDEX . . . . .	91
