

CONTENTS

ACKNOWLEDGEMENTS	<i>page</i> vi
INTRODUCTION	
(1) Primary and Supplementary Principles	i
(2) The Logical Basis of Methodological Principles	4
I THE PRINCIPLE OF SIMPLICITY	
(1) Introduction	8
(2) The Thesis of Nature's Simplicity	10
(3) Simplicity and Verification	19
(4) Simplicity and Falsifiability	26
(5) The Principle of Simplicity in the History of Science	32
(6) Dynamic Simplicity	36
(7) Open and Closed Hypotheses	39
(8) Conclusion	43
2 THE PRINCIPLE OF MICRO-REDUCTION	
(1) Introduction	45
(2) Micro-reduction and Determinism	47
(3) Physical and Logical Analysis	53
(4) Macro-reduction in the History of Science	56
(5) E. Mach and Atomism	61
(6) The General Search for Atomic Theories	68
(7) Conclusion	71
3 THE PRINCIPLE OF CONNECTIVITY	
(1) Introduction	73
(2) Causality and Connectivity	74
(3) E. Mach's Principle of Symmetry	79
(4) The Resolvability of Particular Dispositions	84
(5) N. R. Campbell's Principle of Symmetrical Uniform Association	89
(6) P. W. Bridgman's Principle of Essential Connectivity	92
(7) J. C. Maxwell's Criterion for Distinguishing between Real and Empty Predicates	95

CONTENTS

(8) The Uncertain Meaning of Maxwell's Criterion	100
(9) Conclusion	103
4 THE PRINCIPLE OF VERIFICATION	
(1) Introduction	106
(2) The Technical-Physical-Logical Trichotomy	109
(3) Weak Verification	115
(4) The Comparative Function of Analysis: The Differential Aspect	122
(5) The General Function of Comparative Analysis	130
(6) Conclusion	134
