Preface	<i>page xi</i>
I An Eighteenth-century Innovation in the Concept of Meaning	
1 Can meanings change?	I
2 Meanings as unchangeable properties	3
3 Meanings as changeable properties	9
4 Meanings as changing continuants	14
II Meanings Conceived as what Words have in a Language or Culture	
5 <i>De facto</i> and <i>de jure</i> theories of meaning	24
6 The implications of changeability	29
7 Meanings in a language	37
8 Meanings in a culture	52
9 Can a language be a prison?	62
III Meanings Conceived as Topics for Philosophical Investigation	
10 What room is there for a specifically philosophical study of meanings?	75
11 The doctrine of logical grammar	79
12 The critique of good sense	89
IV The Concept of Meaning in the Problem of Universals	
13 The problem conceived as insoluble	108
14 The problem conceived as soluble	111
15 How should the problem be conceived?	120

**V Meanings Conceived as what are Understood
in an Act of Communication**

16	Meanings, uses and subsistent entities	<i>page</i> 123
17	The meaning of a remark in a particular language	129
18	The meaning of a remark in any language	134
19	Do propositions exist?	141

VI Meaning and the *a Priori*

20	Are all <i>a priori</i> truths analytic?	153
21	Is analytic truth a matter of degree?	162
22	Can meaning be the method of verification?	167

VII Meaning and the Law of Extensionality

23	The problem of non-extensional discourse	172
24	Why is Frege's distinction insufficient?	173
25	The problem of non-extensionality as a problem about statement-forming operators on sayings	181
26	The problem of semantical antinomies in the systematized logic of statements about statements	192
27	An extensional formalization of informally non-extensional contexts	201
28	A formalization for the general logic of non-assertive sayings	208
29	The problem of quantification into non-extensional contexts	211
30	A non-extensional formalization of informally non-extensional contexts	216

**VIII Meanings Conceived as Topics for
Formal-logical Investigation**

31	What do logical formulas represent?	229
32	How is logical theory justified?	242
33	Does logic deny the possibility of an empty universe?	255

CONTENTS

IX Meaning and Vagueness

34 Arguments from universal vagueness to universal indeterminacy	<i>page</i> 265
35 The truism of universal vagueness	267
36 The fallacy of universal indeterminacy	270

X The Concept of Meaning in the Problem of Natural Necessity

37 Is there a satisfactory theory of natural necessity?	277
38 Natural necessity conceived as a form of <i>a priori</i> truth	295
39 Inductive confirmation conceived as the precisification of hypotheses	311
40 Inductive inconclusiveness as a corollary of changeability of meaning	321
