

Contents

Polish Logical Symbols	xix
I. Existence and Being	1
1. <i>The question 'What is existence?' to give way to the question 'What does "exist" mean?'</i>	1
2. <i>Comparison of the verb 'exist' with the verb 'be'</i>	2
3. <i>The variety of senses of 'be' and its synonyms</i>	3
4. <i>The copulative sense of 'be'</i>	4
5. <i>The alleged 'identity' sense of the verb 'be'</i>	10
6. <i>Is 'be' purely equivocal or analogical?</i>	12
II. 'Existence is not a Predicate'	17
1. <i>The Ontological Argument depends on taking existence as a predicate</i>	17
2. <i>Hume's view that we have no distinct idea of existence</i>	18
3. <i>Hume identifies thinking of x and thinking of x as existent</i>	21
4. <i>Kant's view that 'exist' is a 'merely logical' predicate</i>	23
5. <i>Kant's explanation of 'being' in terms of 'positing'</i>	26
6. <i>'The real contains no more than the possible'</i>	32
7. <i>Plato's Beard</i>	37
III. Frege's Doctrine of Existence	42
1. <i>Frege's account of statements of number</i>	42
2. <i>Geach's criterion for predicables and Prior's criterion for predicates</i>	44

3. <i>The philosophical significance of logical notations</i>	49
4. <i>The relevance of Prior's criterion to Frege's doctrine</i>	53
5. <i>Statements of number and statements of existence</i>	54
6. <i>The difference between existing and being instantiated</i>	55
7. <i>Predication and 'being wrapped round'</i>	60
8. <i>Extension of the meaning of 'second-level predicable'</i>	64
9. <i>Can '— exist' ever function as a first-level predicate?</i>	69
10. <i>An explanation of the illusion that 'Aristides exists', etc., make sense</i>	73
IV. <i>Embedded Existential Propositions</i>	81
1. <i>Propositions in which singular existential propositions are apparently embedded</i>	81
2. <i>How to relieve President Ford's ignorance of David Pears's existence</i>	85
3. <i>Examples where the embedded proposition is formed by attaching '— exists' to a definite description</i>	87
4. <i>Preliminary analysis of 'President Ford does not know that David Pears exists'</i>	91
5. <i>Restriction of the sort of predicables required for the range of ϕ in this analysis</i>	94
6. <i>Difficulties involving opacity</i>	97
7. <i>Indeterminacy in claims about a's knowledge of b's existence</i>	99
8. <i>Analysis of 'I might not have existed'</i>	101
9. <i>General form of analyses of propositions apparently involving embedded singular existential propositions</i>	105
V. <i>Tensed Existential Propositions</i>	108
1. <i>Tensed existential propositions as involving embedded existential propositions</i>	108
2. <i>'Arkle no longer exists' and Plato's Beard</i>	108
3. <i>The Tensed or Qualified Version of Plato's Beard</i>	109
4. <i>Intentional exceptions to the rule</i>	111

5. <i>Causal exceptions to the rule</i>	114
6. <i>Is 'Arkle no longer exists' entangled in the Unqualified Version of Plato's Beard as well?</i>	117
7. <i>Attempts by Miller and Plantinga to avoid the qualified version of the paradox</i>	123
8. <i>A similar attempt by Prior</i>	129
9. <i>Aristotelian accounts of coming into existence and ceasing to exist</i>	134
10. <i>Analysis of 'Arkle no longer exists'</i>	139
11. <i>Generalization of the analysis and solution of the Qualified Version of Plato's Beard</i>	141
12. <i>No longer existing a property, and a temporal property, of individuals</i>	145
VI. <i>Quantification, Reference, and Ontological Commitment</i>	153
1. <i>Quantification of non-individual variables</i>	153
2. <i>Reference and the variables of quantification</i>	154
3. <i>'Quantifying over' and 'ontological commitment'</i>	161
4. <i>'Nouns might better have been named pronouns'</i>	165
5. <i>Quine's inadequate view of proper names explains his confusion of reference with quantification</i>	168
VII. <i>Ontology called in Question</i>	172
1. <i>'Ontological' has different senses corresponding to the different senses of 'be'</i>	172
2. <i>The vacuity theory of actualité</i>	173
3. <i>Actual and possible worlds, fact and value, ontology and epistemology</i>	175
4. <i>The connection between this use of 'ontological' and the copula</i>	177
5. <i>Ontology and what there is</i>	178
6. <i>Ontology as the use of Ockham's Razor</i>	182
7. <i>Aristotle's 'ousia': substance and existence</i>	184
8. <i>Strawson on the 'ontological-categorial' and the 'logico-grammatical'</i>	185
VIII. <i>Objectual, Substitutional, and Prioeresque Quantification</i>	189
1. <i>Quine's two ways of defining the quantifier</i>	189

2. <i>The two main differences between objectual and substitutional quantification</i>	193
3. <i>The 'Priorisque' interpretation of quantification</i>	198
4. <i>Priorisque quantification and Tarskian truth theory</i>	203
5. <i>Are the quantifiers equivocal? The relation between the objectual and the substitutional interpretation</i>	206
6. <i>The relation between the objectual and the Priorisque interpretation. No special objectualist sense of the quantifier</i>	210
7. <i>Objectualists misled by too much attention to ordinary language</i>	212
8. <i>The philosophy of 'exist' and the philosophy of 'some'</i>	214
9. <i>Objectualists' hankering after a first-level concept of existence</i>	215
IX. <i>Intentional Inexistence and Referential Opacity</i>	218
1. <i>Opacity and intentionality</i>	218
2. <i>Three examples of intentionality</i>	218
3. <i>Distinctions of scope sufficient to explain these examples</i>	221
4. <i>Proper names occurring in intentional contexts similarly explained</i>	227
5. <i>'Quasi-relations' or 'one-sided relations' an illusion</i>	230
6. <i>Intentionality and existence</i>	235
7. <i>Referential opacity and quantification</i>	236
X. <i>Fictional Characters and Possible Worlds</i>	242
1. <i>Substitutional quantification and fictional names</i>	242
2. <i>'Most characters listed in the Classical Dictionary existed'</i>	243
3. <i>The reference of fictional names</i>	244
4. <i>Fiction and pretending</i>	248
5. <i>Pretending and proper names</i>	251
6. <i>Stories and fictional worlds</i>	255
7. <i>Negative existential propositions containing fictional proper names</i>	258

8. <i>Existence in possible worlds</i>	261
9. <i>Fictional characters and possible thalers</i>	263
10. <i>Existence of possible words</i>	268
11. <i>Realism about possible worlds and '— exist' as a first-level predicable</i>	272
XI. <i>Existence, Validity, and Instantiation</i>	277
1. <i>The relation between the existential and the universal quantifier</i>	277
2. <i>The relation between quantification and the notion of valid inference</i>	278
3. <i>Quantified propositions with simple matrices, to which no inference corresponds</i>	284
4. <i>Existential propositions with indefinable predicables</i>	288
5. <i>Confirmation of this view from Kahn's study of the uses of 'einai'</i>	290
6. <i>Validity, variables, instantiation, and existence</i>	293
7. <i>The existential sense of 'be' not definable in terms of 'exist' or 'There is', but in terms of instantiation</i>	294
8. <i>Purpose of this chapter</i>	298
XII. <i>Being and Existence</i>	300
1. <i>The use of 'There is' in feature-placing propositions</i>	300
2. <i>'There is' as a verbalizer: connection with the copula</i>	302
3. <i>Feature-placing statements not internally negatable</i>	308
4. <i>The transition from mass-nouns to count-nouns</i>	310
5. <i>Locative phrases as adverbial and as predicative</i>	315
6. <i>'Dividing the reference', locative phrases, and the ambiguity of 'be'</i>	317
7. <i>Location and existence</i>	318
8. <i>Summary of the argument of this chapter</i>	321
9. <i>Syntax, semantics, and formal concepts</i>	324
Appendix A: <i>Kahn's Survey of the Uses of 'Einai'</i>	327

Appendix B: Kant's Criticisms of the Ontological Argument	333
Bibliography of Works Cited in this Book	345
List of Formulae and Expressions given labels in the text	351
