

# Contents

<b>Introduction</b>	1
What are the senses? <b>1</b> / The Senses and the Sensory Nerves <b>4</b> / The Improvement of Perception with Learning <b>5</b> / The Facts to be Surveyed <b>6</b> /	
<b>I The Environment as a Source of Stimulation</b>	7
The Terrestrial Environment <b>8</b> / The Consequences of Rigidity <b>8</b> / The Consequences of Gravity <b>10</b> / The Conse- quences of Electromagnetic Radiation <b>11</b> / The Special Consequences of Light <b>12</b> / The Air as a Medium <b>14</b> / Ambient Information <b>15</b> / Perspective Projections of an Object <b>15</b> / Compression Waves from a Vibratory Event <b>15</b> / The Diffusion of Volatile Substances <b>17</b> / Chemical Contacts with the Environment <b>19</b> / Mechanical Contacts with the Environment <b>20</b> / The World of Physics and the Sources of Stimulation <b>21</b> / The Animate Environment <b>22</b> / Social Stimulation <b>23</b> / Social Interaction <b>24</b> / The Environment of Emerging Man <b>24</b> / The Cultural Environment <b>26</b> / The Meaning of the Term "Stimulus" <b>28</b> / Summary <b>29</b> /	
<b>II The Obtaining of Stimulation</b>	31
Two Ways of Obtaining Stimulation <b>32</b> / The Fallacy of Ascribing Proprioception to Proprioceptors <b>33</b> / The Lower Proprioceptive Systems: Posture and Equilibrium <b>35</b> / The Higher Proprioceptive Systems: Purposive Action <b>36</b> / Theories of Action Sensitivity <b>38</b> / The Characteristics of a Natural Stimulus <b>39</b> / Receptors, Organs, and Systems <b>40</b> / Mechano- receptors, Chemoreceptors, and Photoreceptors <b>43</b> / Summary <b>44</b> /	
<b>III The Perceptual Systems</b>	47
The Historical Difficulty of Cataloging the Sensations <b>48</b> / A Classification of the Perceptual Systems <b>49</b> / The Five Modes	

of External Attention **49**/ The Education of Attention in Perceptual Systems **51**/ The Pickup of Information by the Perceptual Systems **52**/ The Partial Equivalence of Perceptual Systems **54**/ The Irrelevance of Sensations to the Perceptual Systems **55**/ The Relation of Muscle Systems to Perceptual Systems **56**/ Summary **58**/

#### **IV The Basic Orienting System**

59

The Statocyst Organ **60**/  
 The Statocyst in Relation to Other Organs **62**/  
 The Evolution of the Vestibular Organ **64**/ The Maculae of the Utricle and Sacculae **65**/ The Cupulae of the Semi-circular Canals **66**/  
 The Use of Vestibular Information **67**/  
 The Limitations of the Vestibular Apparatus **68**/ Illusions of Passive Transposition **69**/ Illusions of Passive Head Rotation **69**/  
 Postural Orientation: A Summary **71**/  
 Oriented Locomotion **72**/

#### **V The Auditory System**

75

Structure and Evolution of the Auditory System **76**/ The Development of the Cochlea **77**/ The Development of the Middle Ear **77**/  
 The Potential Stimuli for the Auditory System **79**/  
 The Pickup of Wave Fronts: Orientation and Localization **81**/  
 The Adjustment Process: Orientation **83**/ Priority of Onset and Disparity of Intensity as Cues for the Perception of Direction **84**/ The Perception of Sounds in the Head **85**/  
 The Pickup of Wave Trains: Identification **86**/ Meaningful Sounds **87**/ Some Classes of Distinctive Sounds **89**/  
 The Pickup of Symbolic Speech **90**/ Articulation as the Source of Speech **91**/ The Stimulus Information for the Detection of Phonemes **92**/ The Physical Reality of Speech **94**/  
 Proprioceptive Hearing and its Implication **94**/  
 Summary **96**/

#### **VI The Haptic System and its Components**

97

The Sensations Taken to Underlie Haptic Perception **97**/  
 The Skin with its Appendages and the Body with its Members **99**/ Cutaneous Appendages as Receptive Units **100**/  
 Body Members **101**/ The Haptic System of Arthropods **102**/ The Use of Extremities for Touching **104**/  
 The Organization of the Haptic System **104**/ Mechano-receptors and Mechanical Stimulation **104**/ The Location

of Mechanoreceptors in the Body **106**/ Perceptual Sub-systems **109**/ The Difference between Muscle Sensitivity and Joint Sensitivity **109**/ The Use of the Term "Kinesthesia" **111**/ The Covariation of Skin Sensitivity and Joint Sensitivity **111**/ The Differentiated Skin **114**/

## **VII The Capabilities of the Haptic-Somatic System** 116

Perceptions Induced by Cutaneous Deformation: Passive Touch **116**/  
 Perception of the Disposition of Touching Surfaces by the Disposition of Body Members **117**/ The Calibration of Subjective Skeletal Space **120**/  
 Exploratory Perception with Haptic Touch **123**/ Shape **124**/ Surface Texture **126**/ Material Composition and Consistency: Dynamic Touching **127**/ Summary of Perception by Haptic Exploration **129**/  
 Touch Temperature and Air Temperature **129**/ Illusions of Touch Temperature **130**/ Receptors for Temperature **131**/ Pain and Painful Touch **131**/  
 Social Touch **132**/  
 Summary of Chapters 6 and 7 **134**/

## **VIII Tasting and Smelling as a Perceptual System** 136

The Tasting System **138**/ Available Information in Tasting **138**/ Sensations of Taste **140**/ The Limitations of Tasting as a Control for Eating **141**/ Hunger and Thirst **142**/ The Uses of the Mouth **142**/ Experiments on the Haptics of the Mouth **143**/  
 The Smelling System **144**/ The Uses of Smelling **145**/ The Identification of Sources by Odor **146**/ The Orientation of Behavior by Odor **147**/ The Sensations of Smell **148**/  
 The Search for Chemicals as Stimuli for Smell and Taste **150**/ The Beginning of a Theory **150**/ The Perception of Chemical Values in the Sea **151**/  
 Summary **152**/

## **IX The Visual System: Evolution** 154

The Uses of Eyes **155**/ Detecting the Layout of the Surroundings **156**/ Detecting Change or Sequence **158**/ Detecting and Controlling Locomotion **160**/  
 The Evolution of Visual Systems **163**/ The Simplest Visual Systems **165**/ The Evolution of Ocular Systems in Vertebrates **169**/ Postural Stabilization of the Eyes **170**/ The Focusing of a Definite Image **171**/ The Uses of Frontal

Eyes and Lateral Eyes **174**/ The Advantage of Concentrating the Receptors in Special Regions **174**/ The Advantage of Compulsory Convergence of Both Eyes **177**/ The Advantages of a Night Retina, a Day Retina, and a Duplex Retina **180**/ The Advantages of Color Vision **183**/ Summary **184**/

## **X The Visual System: Environmental Information** 186

The Principles of Ecological Optics **187**/ Radiation from a Luminous Source (Stage 1) **189**/ Scatter-Reflection of Light from Surfaces (Stage 2) **191**/ The Set of All Convergence Points in a Medium (Stage 3) **191**/ The Ambient Light at a Stationary Convergence Point (Stage 4) **192**/ The Effective Array at a Stationary Convergence Point (Stage 5) **194**/ The Ambient Array at a Moving Convergence Point (Stage 6) **195**/ Figural Motion within the Ambient Array (Stage 7) **201**/ Kinetic Optical Occlusion and Edge Information (Stage 8) **203**/ The Connected Set of Convergence Points for a Geographical Environment **206**/ The Structuring of Ambient Light **208**/ Differential Facing **208**/ Surface Composition **209**/ The Combination of Inclination and Reflectance **211**/ Attached Shadows **212**/ Cast Shadows **213**/ The Combination of Inclination, Reflectance, and Shadowing **214**/

The Structuring of Light by Means Other Than Reflection **216**/ Transmitted Light and Transparent Surfaces **216**/ Mirror Reflection **216**/ Irregular Refraction **218**/ Differential Polarization of Sky Light **218**/ Structuring of an Array by Radiant Sources **220**/

Summary **220**/

## **XI The Structuring of Light by Artifice** 224

The Original and Derived Meanings of the Term "Image" **225**/ The Distinction between Real and Apparent Sources of an Optic Array **227**/

The Origin of Images in Prehistory **228**/ The Fundamental Graphic Act **229**/ Experiments on the Graphic Act **230**/

The Consequences of Pictorial Representation **231**/ The Illusion of Reality in Pictorial Perception **231**/ The Consequences of Perception at Second Hand **234**/ The Consequences of the Pictorial Attitude for Psychology **235**/ The Consequences of the Pictorial Attitude for Art **238**/

The Concern with Optical Structure as Such **240**/

The Structuring of Light by Alphabetic Writing **242**/

Two Conceptions of the Information in Stimulation **245**/  
 Equivocal Information from a Picture **246**/

## **XII The Pickup of Ambient Information: Scanning** 250

The Problem of Perceiving by Scanning **251**/  
 The Equivalence of Successive Sampling to Simultaneous  
 Grasping **252**/  
 The Stable and Unbounded Character of the Phenomenal  
 Visual World **253**/  
 Ecological Optics and the Visual Scanning Process **256**/  
 Ambient Light and the Ambient Array **257**/ The Tem-  
 porary Sample of an Ambient Array **257**/ What, then, is the  
 retinal image? **258**/  
 Exploratory Visual Attention **259**/ The Persistence of Invariant  
 Structure in Successive Samples **261**/ The Superfluous  
 Appeal to Memory **262**/  
 The Tuning of the System to Invariant Information **264**/

## **XIII The Theory of Information Pickup** 266

What is innate and what acquired in perception? **267**/  
 The Probable Mechanism of Learning to Perceive **269**/ How  
 are associations between events detected? **271**/ What is  
 learning by insight? **273**/ What is the relation of perceiving  
 to remembering? **275**/ What is the relation of perceiving  
 to recognizing? **277**/ What is the relation of perceiving to  
 expecting? **279**/ What is the effect of language on per-  
 ception? **280**/  
 The Probable Kinds of Development in Learning to Per-  
 ceive **283**/ Differentiating the Range of Possible Inputs **283**/  
 Establishing the Covariation of Inputs between Different  
 Systems **283**/ Isolating External Invariants **284**/ Learning  
 the Affordances of Objects **285**/ Detecting Situational In-  
 variants **285**/ The Development of Selective Attention **286**/

## **XIV The Causes of Deficient Perception** 287

Inadequate Information **288**/ Minimal Energy and the Concept  
 of Threshold **288**/ The Blurring of Structure **291**/ The  
 Masking of Structure **293**/ Conflicting or Contradicting  
 Information **296**/ Interval Cutoff with a Tachistoscope **298**/  
 Narrowing Down of an Array **299**/ Experimental Operations  
 on Structure **299**/  
 The Consequences of Inadequate Information **303**/  
 The Deficiencies of the Perceptual Process **304**/ The Failure  
 of Organ Adjustment at High Intensity **304**/ Physiological

After-effects <b>305</b> / The Obtruding of Sensation on Perception <b>306</b> / After-effects of Habituation <b>308</b> / Overselective Attention <b>309</b> /	
A Classification of Illusions <b>310</b> / Artificial Sources <b>310</b> / The Bending of an Optic Array by Reflection or Refraction <b>311</b> / Contradictory Information from a Picture <b>312</b> / The Geometrical Illusions <b>312</b> / After-effects of Excitation <b>316</b> / Insufficient Specialization of Receptors <b>316</b> / Internal Excitation of the Nervous System <b>316</b> /	
Summary <b>318</b> /	
<b>Conclusion</b>	319
<b>Bibliography</b>	322
<b>Index</b>	331
