SECTION	PAGE
<b>Chapter I. INTRODUCTION: THE NATURE OF LOGIC</b>	
1. The Definition of "Logic" . . . . .	1
2. Formal and Nonformal Deduction . . . . .	3
3. The Abstract Nature of Logic . . . . .	4
4. The Form of a Proposition . . . . .	8
Questions and Exercises . . . . .	10
<b>Chapter II. FUNDAMENTAL IDEAS</b>	
5. Formal Concepts . . . . .	13
6. Propositions . . . . .	14
7. Truth . . . . .	16
8. Variables . . . . .	19
9. Propositional Functions . . . . .	22
10. Formal Functions . . . . .	23
1. Symbolic and Classical Logic . . . . .	25
Questions and Exercises . . . . .	26
<b>Chapter III. TRUTH-FUNCTIONS</b>	
2. Simple Truth-Functions . . . . .	28
3. Interdefinability of the Logical Constants . . . . .	34
4. Definition . . . . .	37
5. Interdefinitions . . . . .	41
6. The De Morgan Theorems . . . . .	51
7. Useful Equivalences . . . . .	55
Questions and Exercises . . . . .	57
<b>Chapter IV. THE LANGUAGE OF LOGIC</b>	
8. The Ideal of a Scientific Language . . . . .	60
9. The Need for Logical Punctuation . . . . .	62
10. Scope of Constants . . . . .	63
1. Syntactical Rules . . . . .	64
2. An Alternative Notation for Punctuation . . . . .	68
Addendum: The Stroke Function . . . . .	71
Questions and Exercises . . . . .	73

**Chapter V. TRUTH-FUNCTIONS** (*Continued*)

23. Material Implication . . . . .	75
24. The Boolean Expansion of Disjunctive Functions . . . . .	77
25. Material Equivalence . . . . .	80
26. Dependencies between Truth-Functions . . . . .	84
27. Applications to Fallacies . . . . .	91
Questions and Exercises . . . . .	92

**Chapter VI. THE MATRIX METHOD**

28. Laws of Logic . . . . .	95
29. Matrix Analyses . . . . .	97
30. Matrix Tests of Equivalences . . . . .	100
31. Matrix Tests of Other Dependencies . . . . .	102
32. Tautologies and Self-Inconsistencies . . . . .	104
33. The Method of Negation . . . . .	108
34. The Decision Problem . . . . .	113
Questions and Exercises . . . . .	114

**Chapter VII. TAUTOLOGOUS FUNCTIONS AND  
VALID ARGUMENTATION**

35. Tautologous Functions and Dependencies . . . . .	116
36. Tautologous Functions and Forms of Argumentation of Frequent Occurrence . . . . .	118
Questions and Exercises . . . . .	137

**Chapter VIII. THE DEDUCTIVE SYSTEM OF TRUTH-FUNCTIONS**

37. General Features of a Deductive System . . . . .	141
38. Primitive Ideas . . . . .	142
39. The Syntactical Rules . . . . .	143
40. Definitions . . . . .	144
41. Conditions to be Satisfied by a Set of Postulates . . . . .	145
42. The Postulates . . . . .	147
43. Rules for Deduction of Theorems . . . . .	149
44. Proofs of Theorems . . . . .	154
Questions and Exercises . . . . .	160

**Chapter IX. GENERAL PROPOSITIONS**

45. The Need for Further Analysis of Form . . . . .	163
46. Atomic Analysis . . . . .	164
47. Generality . . . . .	166
48. Formal Connections between Quantifiers . . . . .	172

49.	The Existential Form and the Analysis of "Some" . . .	175
50.	Classical Propositional Forms . . . . .	177
51.	Analysis of the Four Aristotelian Forms . . . . .	178
52.	The Functional Calculus . . . . .	191
53.	Functions of $n$ Arguments, and Multiple Generality . . .	193
54.	Conclusion . . . . .	202
	Questions and Exercises . . . . .	203

**Chapter X. CLASSES AND IMMEDIATE INFERENCE**

55.	The Notion of a Class . . . . .	206
56.	Connections between Functional and Class Notations . . .	207
57.	Class Interpretation of the Four Aristotelian Forms . . .	217
58.	Diagrammatic Representation of the Four Aristotelian Forms . . . . .	218
59.	The Venn Diagrams and the Square of Opposition . . .	224
60.	The Revised Square of Opposition . . . . .	226
61.	Distribution of Terms . . . . .	229
62.	Forms of Propositions of Ordinary Discourse . . . . .	234
63.	Obversion . . . . .	239
64.	Conversion . . . . .	242
65.	Applications of the Processes of Obversion and Conversion	245
	Questions and Exercises . . . . .	249

**Chapter XI. CLASSES AND THE SYLLOGISM**

66.	Definition of "Syllogism" . . . . .	252
67.	Nomenclature of the Syllogism . . . . .	253
68.	Rules for Testing Syllogisms . . . . .	255
69.	Elimination of Invalid Moods by the Rules . . . . .	262
70.	Diagrammatic Tests of Syllogisms . . . . .	266
71.	The Antilogism Method of Testing Syllogisms . . . . .	272
72.	Syllogisms Involving Class-Membership Propositions . . .	278
73.	Variations on Syllogistic Reasoning . . . . .	279
	Questions and Exercises . . . . .	280

**Chapter XII. THE CALCULUS OF CLASSES**

74.	Truths about Classes. . . . .	282
75.	Construction of the Class Calculus . . . . .	283
76.	Theorems. . . . .	290
	Questions and Exercises . . . . .	303
	Index . . . . .	304
