

CONTENTS

CHAPTER	PAGE
I. INTRODUCTORY	
1. Symbolic Logic and Classical Logic	1
2. The Use of Symbols	6
3. Logical Form	9
4. Inference and Implication	13
II. THE CALCULUS OF PROPOSITIONS	
1. Propositions and their Relations	16
2. Truth-Functions	19
3. Basic Truth-Tables of the Propositional Calculus ..	21
4. Relations between Truth-Functions	26
5. Further Logical Constants	28
III. THE CALCULUS OF PROPOSITIONS (<i>continued</i>)	
1. The Truth-Table Method of Testing the Validity of Arguments	34
2. Logical Punctuation and the Scope of Constants ..	37
3. The Construction and Application of Truth-Tables ..	40
4. An Indirect Method of Truth-Table Decision ..	44
5. The Classification of Propositions	47
6. Reference Formulae	48
7. Decision Procedures and Normal Forms	51
8. The Total Number of Truth-Functional Expressions	56
9. Derivation by Substitution	58
IV. THE AXIOMATIC METHOD	
1. The Purpose of the Axiomatic Method	64
2. The Construction of an Axiom System	66
3. Derivable Formulae	72
4. Conditions for an Axiom System	74
5. Consistency	78
6. Independence	82
7. The Derivation of Formulae	87
8. Completeness	92
V. ELEMENTS OF THE PREDICATE CALCULUS	
1. Some New Forms of Inference	99
2. Singular Propositions	101

CHAPTER	PAGE
3. Further Remarks on Proper Names and Descriptions	104
4. Relations between the Propositional Calculus and the Predicate Calculus	105
5. The Particular Quantifier: Existence	107
6. Analysis of some Quantified Propositions	109
7. The Universal Quantifier	111
8. The Interpretation of Quantifiers as Conjunctions and Disjunctions	113
9. Free and Bound Variables: Constants	115
10. Interpretation and Satisfiable Formulae	118
11. Simultaneously Satisfiable Formulae	121
12. The Classical Syllogism	122
 VI. FURTHER DEVELOPMENTS	
1. Extensions of the Class of Formulae	126
2. Formulae with more than one Quantifier	128
3. Two-termed Predicates	129
4. Satisfiability: Finite Domains	131
5. Finite Domains (<i>continued</i>)	133
6. Two-termed Predicates: Infinite Domains	135
7. Logical Truth	137
8. Decision Procedures	139
9. Axiom Systems	141
 APPENDIX	
1. The Syllogism and the Algebra of Classes	143
2. Classes and the Relationships between them	149
3. The Boolean Algebra of Classes	155
4. The Boolean Algebra of Classes and the Syllogism	158
