

## CONTENTS

Foreword . . . . .	v
Introduction	
1. Logic as a Foundation of Teaching . . . . .	1
PART I	
WORDS, THOUGHTS AND OBJECTS	
Chapter I	
Expressions and Their Meanings	
2. Understanding of Expressions . . . . .	7
3. Meaning of Expressions . . . . .	8
4. Language and Meaning . . . . .	12
5. Speech as a Way of Communicating Thoughts . . . . .	13
Chapter II	
Statements and Their Parts	
6. Proposition and Sentence . . . . .	16
7. Parts of Statements. Syntactical Categories . . . . .	18
8. Complex Statements . . . . .	22
9. Simple Statements . . . . .	25
10. Statement Schemata and Statements Derived from Them . . . . .	27
Chapter III	
Objective Counterparts of Expressions	
A. Extension of Terms . . . . .	31
11. Designating and Designata . . . . .	31

## CONTENTS

12. Denotation and Extension . . . . .	32
13. Relations between Extensions . . . . .	34
14. Unions and Intersections of Sets . . . . .	39
15. Logical Partition . . . . .	40
B. Intension of Terms . . . . .	43
16. Complete and Characteristic Intension . . . . .	43
17. Linguistic Intension . . . . .	45
 Chapter IV	
Ambiguity of Expressions and Defects of Meanings	
18. Ambiguity . . . . .	48
19. Vagueness . . . . .	52
20. Incomplete Formulations . . . . .	56
 Chapter V	
Definitions	
21. Two Ways of Understanding the Term "Definition" . . . . .	57
22. The Concept of Nominal Definition . . . . .	58
23. Definitions by Abstraction and Inductive Definitions . . . . .	62
24. Errors in Defining . . . . .	68
25. Stipulating and Reporting Definitions . . . . .	70
26. Definitions by Postulates and Pseudo-definitions by Postulates . . . . .	77
27. The Concept of Real Definition . . . . .	81
 Chapter VI	
Questions and Interrogative Sentences	
28. The Structure of Interrogative Sentences . . . . .	85
29. Decision Questions and Complementation Questions . . . . .	87
30. Assumptions of Questions. Suggestive Questions . . . . .	88
31. Improper Answers . . . . .	89

## CONTENTS

32. Thoughts Expressed by an Interrogative Sentence . . . . .	91
33. Didactic Questions . . . . .	93
<b>PART II</b>	
<b>INFERENCE</b>	
<b>Chapter I</b>	
<b>Formal Logic and the Consequence Relation</b>	
34. Formal Logic . . . . .	97
35. Logical Consequence . . . . .	98
36. The Relationship between the Truth of the Reason and the Truth of the Consequence . . . . .	101
37. Enthymematic Consequence . . . . .	104
<b>Chapter II</b>	
<b>Inference and the Conditions of Its Correctness</b>	
38. The Concept of Inference . . . . .	106
39. Conditions of Correctness of Inference . . . . .	107
<b>Chapter III</b>	
<b>Subjectively Certain Inference</b>	
40. The Conclusiveness of Subjectively Certain Inference . . . . .	109
41. The Conclusiveness of Subjectively Certain Inference in the Light of the Knowledge of the Person Involved . . . . .	115
42. Deductive Inference . . . . .	117
43. Deducing . . . . .	119
<b>Chapter IV</b>	
<b>Subjectively Uncertain Inference</b>	
44. The Conclusiveness of Subjectively Uncertain Inference . . . . .	120
45. Logical Probability versus Mathematical Probability . . . . .	122
46. Statistical Probability . . . . .	123
47. Reductive Inference . . . . .	130

## CONTENTS

48. Induction by Enumeration . . . . .	138
49. Inference by Analogy . . . . .	156
50. Induction by Elimination . . . . .	160

### PART III

#### METHODOLOGICAL TYPES OF SCIENCES

##### Chapter I

###### The Division of Sciences into Deductive and Inductive

51. The Methodology of Sciences . . . . .	185
52. Deductive and Inductive Sciences . . . . .	190

##### Chapter II

###### Deductive Sciences

53. Deductive Sciences at the Pre-axiomatic Intuitive Stage . . . . .	194
54. Deductive Sciences at the Axiomatic Intuitive Stage . . . . .	195
55. The Philosophical Controversy over the Substantiation of Primitive Theorems in Intuitively Approached Deductive Sciences . . . . .	198
56. Deductive Sciences at the Abstract Axiomatic Stage . . . . .	202
57. Formalized Deductive Theories . . . . .	207
(a) Rules of Defining . . . . .	207
(b) Rules of Inference . . . . .	211
(c) Construction of Formalized Theories . . . . .	218
58. Deductive Theories from the Apragmatic Point of View . . . . .	222
(a) Consistency of Theories . . . . .	222
(b) Independence of Axioms . . . . .	228
(c) Deductive Completeness of Theories . . . . .	231
(d) Completeness of Deductive Systems . . . . .	234

##### Chapter III

###### The Inductive Sciences

A. The Empirical Foundations . . . . .	238
--	-----

## CONTENTS

59. Irrevocable Assumptions and Theorems in the Inductive Sciences . . . . .	238
60. Protocol Statements . . . . .	241
61. The Method of Direct Experience as Subjective and Unrepeatable . . . . .	246
62. Observation and Experiment . . . . .	249
B. Counting and Measurement . . . . .	254
63. Selected Concepts in the Theory of Relations. Numbers and Counting . . . . .	254
(a) Preliminary Remarks . . . . .	254
(b) The Concept of Relation . . . . .	255
(c) Properties of Equivalence Relations. Types of Equivalence Properties . . . . .	260
(d) Many-one, One-many Relations. The Concept of Equipotence of Sets . . . . .	263
(e) Numbers . . . . .	265
(f) Counting . . . . .	269
64. Selected Concepts in the Relations Theory (ctd.). Ordering Relations. Isomorphism and Homomorphism of Relations . . . . .	271
(a) Preliminary Remarks . . . . .	271
(b) Ordering Relations . . . . .	271
(c) Isomorphism of Relations . . . . .	274
(d) Homomorphism of Relations . . . . .	276
(e) Abstraction Relations . . . . .	278
65. Magnitudes and Scaling . . . . .	280
(a) Primary and Secondary Properties of Abstraction . . . . .	280
(b) Ordered Families of Abstraction Properties. Magnitudes . . . . .	281
66. Additive Magnitudes . . . . .	286

## CONTENTS

67. Examples of Definitions of a Physical Sum of Magnitudes . . . . .	294
68. The Measurement Function . . . . .	297
69. Measurement Proper . . . . .	303
70. Measurement without a Unit of Measurement and Measurement without a Zero Point . . . . .	310
 Chapter IV	
Inductive Sciences and Scientific Laws	
A. General Laws . . . . .	316
71. General Laws which State Relationships between Constant and Variable Properties . . . . .	316
72. General Laws which State Relationships between Variable Properties. Functional Laws and Parametric Laws . . . . .	318
B. Statistical Laws . . . . .	324
73. Statistical Laws which State the Degree of Association of Constant Properties . . . . .	324
74. Laws of Statistical Distributions . . . . .	331
(a) Laws of Distribution of Probabilities of Discrete Variables . . . . .	331
(b) Laws of Probability Density Distribution for Continuous Variables . . . . .	334
(c) Binomial Distribution . . . . .	341
(d) Normal Distribution . . . . .	345
75. Laws on Correlation of Variable Properties . . . . .	355
 Chapter V	
Statistical Reasoning	
76. Introductory Remarks . . . . .	377

## CONTENTS

77. Estimation of Parameters . . . . .	379
78. Levelling of Errors of Measurement as Example of Estimation of Parameters . . . . .	395
79. Verification of Hypotheses and Statistical Tests . . . . .	411
Supplement: Proving and Explaining . . . . .	440
Subject Index . . . . .	451
