

# CONTENTS

PREFACE . . . . .	VIII
-------------------	------

## CHAPTER I

THE ANTI-NOMIES . . . . .	1-18
---------------------------	------

§ 1. HISTORICAL INTRODUCTION . . . . .	1
§ 2. LOGICAL ANTI-NOMIES . . . . .	5
§ 3. SEMANTICAL ANTI-NOMIES . . . . .	9
§ 4. GENERAL REMARKS . . . . .	11
§ 5. THE THREE CRISES . . . . .	14
§ 6. BIBLIOGRAPHICAL REMARKS . . . . .	16

## CHAPTER II

### AXIOMATIC FOUNDATIONS OF SET THEORY.

THE AXIOM OF CHOICE . . . . .	19-135
-------------------------------	--------

§ 1. INTRODUCTION . . . . .	19
§ 2. THE PRIMITIVE RELATION. EQUALITY AND EXTENSIONALITY . . . . .	27
§ 3. "CONSTRUCTIVE" AXIOMS OF GENERAL SET THEORY . . . . .	33
§ 4. THE AXIOM OF CHOICE . . . . .	44-80
1. Formulation of the Axiom. Its Introduction into Mathematics . . . . .	44
2. Special (weakened) Forms of the Axiom. Its Independence and Consistency . . . . .	49
3. The Existential Character of the Axiom . . . . .	54
4. Some Typical Applications of the Axiom . . . . .	59
5. Mathematicians' Attitude towards the Axiom . . . . .	74

§ 5. AXIOMS OF INFINITY AND OF RESTRICTION . . . . .	81
§ 6. THE AXIOM SYSTEM OF VON NEUMANN. THE SET-THEORETICAL RELATIVISM (Paradox of Skolem) . . . . .	96
§ 7. THE AXIOM SYSTEMS OF BERNAYS AND GÖDEL. RELATIVE CONSISTENCY PROOFS . . . . .	110
§ 8. DERIVATION OF SET THEORY FROM THE AXIOMS . . . . .	124

## CHAPTER III

## TYPE-THEORETICAL APPROACHES . . . . . 136-195

§ 1. THE IDEAL CALCULUS . . . . .	136
§ 2. THE GENERAL THEORY OF CLASSES . . . . .	140
§ 3. QUINE'S NEW FOUNDATIONS . . . . .	144
§ 4. QUINE'S MATHEMATICAL LOGIC . . . . .	146
§ 5. THE HIERARCHY OF LANGUAGES AND THE RAMIFIED CLASS CALCULUS . . . . .	150
§ 6. WANG'S SYSTEM $\Sigma$ . . . . .	153
§ 7. LORENZEN'S OPERATIONIST SYSTEM . . . . .	158
§ 8. THE LOGICISTIC THESIS . . . . .	160
§ 9. TYPES, CATEGORIES, AND SORTS . . . . .	168
§ 10. IMPREDICATIVE CONCEPT FORMATION . . . . .	174
§ 11. SET THEORIES BASED UPON NON-STANDARD LOGICS . . . . .	182-195
1. Hilbert's $\varepsilon$ -operator . . . . .	183
2. Le niewski's Ontology . . . . .	185
3. The Systems of Chwistek and Myhill . . . . .	188
4. Fitch's System . . . . .	190
5. Many-valued Logics . . . . .	193
6. Combinatory Logic . . . . .	195

## CHAPTER IV

## INTUITIONISTIC CONCEPTIONS OF MATHEMATICS 196-264

§ 1. HISTORICAL INTRODUCTION. THE ABYSS BETWEEN DISCRETENESS AND CONTINUITY . . . . .	196
---	-----

§ 2. THE CONSTRUCTIVE CHARACTER OF MATHEMATICS. MATHEMATICS AND LANGUAGE . . . . .	207
§ 3. THE PRINCIPLE OF THE EXCLUDED MIDDLE . . . . .	215
§ 4. MATHEMATICS AND LOGIC. LOGICAL CALCULUS . . . . .	227
§ 5. THE PRIMORDIAL INTUITION OF INTEGERS. FREE-CHOICE SEQUENCES AND BROUWER'S CONCEPT OF SET . . . . .	244
§ 6. MATHEMATICS AS TRIMMED ACCORDING TO THE INTU- ITIONISTIC ATTITUDE . . . . .	253

## CHAPTER V

METAMATHEMATICAL AND  
SEMANTICAL APPROACHES . . . . . 265-347

§ 1. THE HILBERT PROGRAM . . . . .	265
§ 2. FORMAL SYSTEMS, LOGISTIC SYSTEMS, AND FORMALIZED THEORIES . . . . .	270
§ 3. INTERPRETATIONS AND MODELS . . . . .	280
§ 4. CONSISTENCY, COMPLETENESS, CATEGORICALNESS, AND INDEPENDENCE . . . . .	285
§ 5. DECIDABILITY AND RECURSIVENESS. ARITHMETIZATION OF SYNTAX . . . . .	297
§ 6. THE LIMITATIVE THEOREMS OF GÖDEL, TARSKI, CHURCH AND THEIR GENERALIZATIONS . . . . .	303
§ 7. THE METAMATHEMATICS AND SEMANTICS OF SET THEORY	316
§ 8. PHILOSOPHICAL REMARKS . . . . .	332
BIBLIOGRAPHY . . . . .	349
INDEX OF AUTHORS . . . . .	406
INDEX OF TERMS AND SYMBOLS . . . . .	413
