Preface	ix
Acknowledgments	xi
Introduction	1
1. The Logic of Common Nouns: The Language L_1	6
Part I. The Syntax of L_1	6
§1. Rules of Formation, etc.	6
§2. Informal Remarks	8
Part II. The Semantics of L_1	17
§3. Introduction	17
§4. Terms, Predicates, and Sentences	18
§5. Common Nouns	20
§6. Models and Assignments	36
§7. Definition of Truth	40
§8. Logical Concepts	43
§9. Some Valid Formulas	43
§10. Some Semantic Metatheorems	46
2. A Logical Calculus	48
§1. The Calculus C_1	48
§2. Some Syntactic Metatheorems	49
§3. Completeness of C_1	53
3. Necessity and Existence	67
§1. Semantics of Common Nouns	67
§2. Semantics of Necessity	71
§3. Comparisons	78
§4. Some Extensions	81
4. Essentialism and Trans-World Identity	86
§1. Modal Logics and Essentialism	86
§2. The Status of Essentialism: A Problem about Identity	94

5. Modal Logic and Truth	108
§1. Davidson's Semantic Program	109
§2. Wallace's Argument	117
§3. Two Concepts of Truth	120
§4. Theories of Truth in Modal Logics with Sortal Quantification	129
§5. Theories of Truth in Bressanian Logics	133
Bibliography	137
Index	141
