Acknowledgements . . . . .	IX
Interdependence scheme for the chapters . . . . .	XIV
Introduction . . . . .	XV
Recommended reading . . . . .	XIX
CHAPTER 0. PREREQUISITES . . . . .	1
CHAPTER 1. BEGINNING MATHEMATICAL LOGIC . . . . .	5
§1. General considerations . . . . .	5
§2. Structures and formal languages . . . . .	9
§3. Higher-order languages . . . . .	14
§4. Basic syntax . . . . .	15
§5. Notational conventions . . . . .	18
§6. Propositional semantics . . . . .	20
§7. Propositional tableaux . . . . .	25
§8. The Elimination Theorem for propositional tableaux . . . . .	31
§9. Completeness of propositional tableaux . . . . .	33
§10. The propositional calculus . . . . .	34
§11. The propositional calculus and tableaux . . . . .	40
§12. Weak completeness of the propositional calculus . . . . .	43
§13. Strong completeness of the propositional calculus . . . . .	43
§14. Propositional logic based on $\neg$ and $\wedge$ . . . . .	46
§15. Propositional logic based on $\neg$ , $\rightarrow$ , $\wedge$ and $\vee$ . . . . .	47
§16. Historical and bibliographical remarks . . . . .	48
CHAPTER 2. FIRST-ORDER LOGIC . . . . .	49
§1. First-order semantics . . . . .	49
§2. Freedom and bondage . . . . .	54
§3. Substitution . . . . .	57
§4. First-order tableaux . . . . .	67
§5. Some "book-keeping" lemmas . . . . .	72
§6. The Elimination Theorem for first-order tableaux . . . . .	79
§7. Hintikka sets . . . . .	83
§8. Completeness of first-order tableaux . . . . .	88
§9. Prenex and Skolem forms . . . . .	93
§10. Elimination of function symbols . . . . .	97

§11. Elimination of equality . . . . .	101
§12. Relativization . . . . .	102
§13. Virtual terms . . . . .	104
§14. Historical and bibliographical remarks . . . . .	107
<b>CHAPTER 3. FIRST-ORDER LOGIC (CONTINUED)</b> . . . . .	108
§1. The first-order predicate calculus . . . . .	108
§2. The first-order predicate calculus and tableaux . . . . .	115
§3. Completeness of the first-order predicate calculus . . . . .	117
§4. First-order logic based on $\exists$ . . . . .	122
§5. What have we achieved? . . . . .	122
§6. Historical and bibliographical remarks . . . . .	124
<b>CHAPTER 4. BOOLEAN ALGEBRAS</b> . . . . .	125
§1. Lattices . . . . .	125
§2. Boolean algebras . . . . .	129
§3. Filters and homomorphisms . . . . .	133
§4. The Stone Representation Theorem . . . . .	141
§5. Atoms . . . . .	150
§6. Duality for homomorphisms and continuous mappings . . . . .	153
§7. The Rasiowa-Sikorski Theorem . . . . .	157
§8. Historical and bibliographical remarks . . . . .	159
<b>CHAPTER 5. MODEL THEORY</b> . . . . .	161
§1. Basic ideas of model theory . . . . .	161
§2. The Löwenheim-Skolem Theorems . . . . .	168
§3. Ultraproducts . . . . .	174
§4. Completeness and categoricity . . . . .	184
§5. Lindenbaum algebras . . . . .	191
§6. Element types and $\aleph_0$ -categoricity . . . . .	203
§7. Indiscernibles and models with automorphisms . . . . .	214
§8. Historical and bibliographical remarks . . . . .	224
<b>CHAPTER 6. RECURSION THEORY</b> . . . . .	226
§1. Basic notation and terminology . . . . .	226
§2. Algorithmic functions and functionals . . . . .	230
§3. The computer URIM . . . . .	232
§4. Computable functionals and functions . . . . .	237
§5. Recursive functionals and functions . . . . .	239
§6. A stockpile of examples . . . . .	247
§7. Church's Thesis . . . . .	257
§8. Recursiveness of computable functionals . . . . .	259
§9. Functionals with several sequence arguments . . . . .	265
§10. Fundamental theorems . . . . .	266
§11. Recursively enumerable sets . . . . .	277
§12. Diophantine relations . . . . .	284
§13. The Fibonacci sequence . . . . .	288
§14. The power function . . . . .	296

§15. Bounded universal quantification . . . . .	305
§16. The MRDP Theorem and Hilbert's Tenth Problem . . . . .	311
§17. Historical and bibliographical remarks . . . . .	314
<b>CHAPTER 7. LOGIC — LIMITATIVE RESULTS . . . . .</b>	<b>316</b>
§1. General notation and terminology . . . . .	316
§2. Nonstandard models of $\Omega$ . . . . .	318
§3. Arithmeticity . . . . .	324
§4. Tarski's Theorem . . . . .	327
§5. Axiomatic theories . . . . .	332
§6. Baby arithmetic . . . . .	334
§7. Junior arithmetic . . . . .	336
§8. A finitely axiomatized theory . . . . .	340
§9. First-order Peano arithmetic . . . . .	342
§10. Undecidability . . . . .	347
§11. Incompleteness . . . . .	353
§12. Historical and bibliographical remarks . . . . .	359
<b>CHAPTER 8. RECURSION THEORY (CONTINUED) . . . . .</b>	<b>361</b>
§1. The arithmetical hierarchy . . . . .	361
§2. A result concerning $T_\Omega$ . . . . .	369
§3. Encoded theories . . . . .	370
§4. Inseparable pairs of sets . . . . .	372
§5. Productive and creative sets; reducibility . . . . .	376
§6. One-one reducibility; recursive isomorphism . . . . .	384
§7. Turing degrees . . . . .	388
§8. Post's problem and its solution . . . . .	392
§9. Historical and bibliographical remarks . . . . .	398
<b>CHAPTER 9. INTUITIONISTIC FIRST-ORDER LOGIC . . . . .</b>	<b>400</b>
§1. Preliminary discussion . . . . .	400
§2. Philosophical remark . . . . .	403
§3. Constructive meaning of sentences . . . . .	403
§4. Constructive interpretations . . . . .	404
§5. Intuitionistic tableaux . . . . .	408
§6. Kripke's semantics . . . . .	416
§7. The Elimination Theorem for intuitionistic tableaux . . . . .	422
§8. Intuitionistic propositional calculus . . . . .	433
§9. Intuitionistic predicate calculus . . . . .	434
§10. Completeness . . . . .	438
§11. Translations from classical to intuitionistic logic . . . . .	442
§12. The Interpolation Theorem . . . . .	445
§13. Some results in classical logic . . . . .	452
§14. Historical and bibliographical remarks . . . . .	457
<b>CHAPTER 10. AXIOMATIC SET THEORY . . . . .</b>	<b>459</b>
§1. Basic developments . . . . .	459
§2. Ordinals . . . . .	468

§3. The Axiom of Regularity . . . . .	477
§4. Cardinality and the Axiom of Choice . . . . .	487
§5. Reflection Principles . . . . .	491
§6. The formalization of satisfaction . . . . .	497
§7. Absoluteness . . . . .	502
§8. Constructible sets . . . . .	509
§9. The consistency of <b>AC</b> and <b>GCH</b> . . . . .	516
§10. Problems . . . . .	522
§11. Historical and bibliographical remarks . . . . .	529
<b>CHAPTER 11. NONSTANDARD ANALYSIS</b> . . . . .	<b>531</b>
§1. Enlargements . . . . .	532
§2. Zermelo structures and their enlargements . . . . .	536
§3. Filters and monads . . . . .	543
§4. Topology . . . . .	553
§5. Topological groups . . . . .	561
§6. The real numbers . . . . .	566
§7. A methodological discussion . . . . .	572
§8. Historical and bibliographical remarks . . . . .	573
<b>BIBLIOGRAPHY</b> . . . . .	<b>576</b>
<b>GENERAL INDEX</b> . . . . .	<b>584</b>
<b>INDEX OF SYMBOLS</b> . . . . .	<b>595</b>
