

# CONTENTS

*Preface*

v

## 1. *MAKING SENSE OF SCIENCE*

*Introduction*

3

“The Origins of Modern Science,” CHAUNCEY WRIGHT

13

“Studies in the Logic of Explanation,” CARL G. HEMPEL and PAUL  
OPPENHEIM

19

“Crucial Experiments,” IRVING M. COPI

29

“Measurement,” MORRIS R. COHEN and ERNEST NAGEL

34

“The First Physical Synthesis,” ALFRED NORTH WHITEHEAD

42

## 2. *PHILOSOPHICAL PROBLEMS OF PHYSICS*

*Introduction*

53

“Empirical and A Priori Knowledge,” IMMANUEL KANT

64

“Geometry and Empirical Science,” CARL G. HEMPEL

71

“The Method of Science,” ALBERT EINSTEIN

80

“Einstein, Mach, and Logical Positivism,” PHILIPP FRANK

85

“Are There Atoms?” HANS REICHENBACH

94

“On Philosophical Arguments in Physics,” S. KÖRNER

106

### 3. *BIOLOGY AND THE SCIENCES OF MAN*

|  |     |
|--|-----|
| <i>Introduction</i>  | 113 |
| "The Scientific Revolution in Biology," EVERETT W. HALL                            | 121 |
| "Mechanistic Explanation and Organismic Biology," ERNEST NAGEL                     | 132 |
| "Historical and Modern Conceptions of Psychology," KENNETH W. SPENCE               | 141 |
| "Psychological Theory Construction and the Psychologist," EDWARD JOSEPH SHOEN, JR. | 152 |
| "The Operation Called <i>Verstehen</i> ," THEODORE ABEL                            | 158 |
| "Societal Facts," MAURICE MANDELBAUM   | 166 |
| "Everyman His Own Historian," CARL BECKER  | 176 |
| "Some Issues in the Logic of Historical Analysis," ERNEST NAGEL                    | 187 |

### 4. *THE MEANING OF 'CAUSE' AND 'LAW'*

|   |     |
|---|-----|
| <i>Introduction</i>   | 201 |
| "Cause," A. C. EWING  | 208 |
| "The Idea of Necessary Connection," DAVID HUME                      | 216 |
| "Causality: Critique of Hume's Analysis," CURT J. DUCASSE           | 221 |
| "Invariable and Unconditional Antecedents," J. S. MILL              | 226 |
| "Law Statements and Counterfactual Inference," RODERICK M. CHISHOLM | 229 |
| "Historical Laws," GUSTAV BERGMANN                                  | 235 |

### 5. *PROBABILITY NOTIONS*

|  |     |
|--|-----|
| <i>Introduction</i>  | 243 |
| "Probability and Its Principles," PIERRE SIMON, MARQUIS DE LAPLACE | 250 |
| "Difficulties of the Classical View of Probability," JOHN VENN     | 255 |
| "The Frequency Theory of Probability," JOHN W. LENZ                | 263 |
| "Statistical and Inductive Probability," RUDOLF CARNAP             | 269 |
| "The Conception of Probability as a Logical Relation," A. J. AYER  | 279 |

## 6. *THE RIDDLE OF INDUCTION*

|  |     |
|--|-----|
| <i>Introduction</i>  | 287 |
| "Of the Ground of Induction," J. S. MILL                           | 293 |
| "Induction as Experimental and Self-Corrective," CHARLES S. PEIRCE | 296 |
| "The Pragmatic Justification of Induction," JOHN W. LENZ           | 299 |
| "The 'Justification' of Induction," P. F. STRAWSON                 | 303 |
| "The Riddle of Induction," EDWARD H. MADDEN                        | 312 |
| "Non-demonstrative Inference and Induction," BERTRAND RUSSELL      | 322 |

## 7. *SCIENCE AND VALUES*

|  |     |
|--|-----|
| <i>Introduction</i>  | 327 |
| "Implications of Physics for Ethics," ERNST CASSIRER       | 332 |
| "Psychoanalysis and Moral Judgeability," EDWARD H. MADDEN  | 340 |
| "Reconstruction in Moral Conceptions," JOHN DEWEY          | 349 |
| "Comment on Dewey's Ethical Views," MELVIN RADER           | 358 |
| "Value Judgments in Scientific Validation," RICHARD RUDNER | 363 |
| <i>Epilogue</i>  | 367 |
| <i>Selected Bibliography</i>                               | 369 |
| <i>Index</i>   | 377 |
