Preface *page xi*

PART ONE: THE DIFFERENTIATION OF EXPERIENCE

I Schemata of Empirical Differentiation	3
1 <i>The schema of things</i>	4
2 <i>The schema of situations</i>	7
3 <i>Other schemata</i>	10
4 <i>On the multiplicity of schemata</i>	13
5 <i>The scope and limits of the further investigation</i>	16
II Empirical Classes and Individuals	19
1 <i>Empirical classes and complexes</i>	19
2 <i>Resemblance-classes</i>	23
3 <i>Inexact classes and indefinite individuals</i>	27
4 <i>Resemblance-classes, absolutely simple and absolutely descriptive statements</i>	31
III Logic and Inexactness	35
1 <i>Heuristic preliminaries</i>	35
2 <i>The three-valued logic of true, false and neutral propositions</i>	39
3 <i>The modified two-valued logic</i>	43
IV Empirical Continuity, Perceptual and Empirical Predicates	48
1 <i>Heuristic preliminaries</i>	48
2 <i>Empirically continuous series</i>	53

Contents

3	<i>Continuity, discontinuity, equality and perceptual discrimination</i>	page 57
4	<i>A characterization of perceptual and theoretical predicates</i>	60
V	Empirical Generality	64
1	<i>General propositions based on coincidence, on logical and on ideal construction</i>	64
2	<i>Apparently hybrid general propositions</i>	68
3	<i>General propositions based on empirical construction</i>	71
4	<i>The freedom of logical, empirical and ideal construction</i>	79

PART TWO:

THE DEDUCTIVE UNIFICATION
OF EXPERIENCE

VI	Hypothetico-deductive Systems as Idealizations	83
1	<i>Inference and the constitution of ideal individuals</i>	83
2	<i>Formal and substantive concepts and propositions in hypothetico-deductive systems</i>	86
3	<i>Limitations of hypothetico-deductive systems</i>	91
4	<i>The variety of ideal systems</i>	94
VII	On the Mathematics of Discrete Individuals and Complexes	98
1	<i>Ideal complexes and correspondences</i>	98
2	<i>Empirical and ideal calculi</i>	101
3	<i>Finite and constructive arithmetic</i>	106
4	<i>The logical status of the propositions of finite and constructive arithmetic</i>	110

Contents

VIII	On the Mathematics of Infinite Totalities	114
1	<i>Infinite totalities</i>	114
2	<i>Denumerable and non-denumerable infinite totalities</i>	118
3	<i>Non-denumerable infinities</i>	123
4	<i>The logical status of the propositions of non-constructive mathematics</i>	127
IX	On Probability and Statistics	130
1	<i>The so-called logical theory of probability</i>	130
2	<i>Ideal frequencies and abstract probabilities</i>	134
3	<i>On the statistical analysis of mass-phenomena</i>	138
4	<i>Statistical generalizations</i>	143
X	Quantitative Theories	147
1	<i>The general conditions of measurement</i>	148
2	<i>The special conditions of measurement</i>	151
3	<i>Quantitative laws</i>	156
4	<i>Pure mathematics, applied mathematics and mathematics applied</i>	159
XI	Idealization and the Unity of Substantive Theories	163
1	<i>Deductive abstraction</i>	163
2	<i>Idealization within theories</i>	167
3	<i>Theories and the conservation of individuals</i>	172
4	<i>Empirical systems and theories</i>	175
PART THREE: SCIENCE AND EXPERIENCE		
XII	The Harmony of Theory and Experience	181
1	<i>The linking of theory and experience</i>	182
2	<i>Deduction and deductivism</i>	185
3	<i>Induction</i>	190
4	<i>Scientific predicates and propositions</i>	194

Contents

XIII	Mental Phenomena	page 198
1	<i>Intentionality and intensionality</i>	199
2	<i>Introspection</i>	202
3	<i>Attempts at analysing intentional in terms of non-intentional phenomena</i>	206
4	<i>Psychology and the phenomenology of mind</i>	210
XIV	Choice	213
1	<i>On the concept of action</i>	213
2	<i>Physically effective and independent choices and their compatibility with physics</i>	216
3	<i>On the harmony of physical laws with physically effective and independent choices</i>	222
4	<i>The compatibility and harmony of science with effective and independent choices</i>	229
XV	On Some Assumptions of Extra-Scientific Thought	231
1	<i>Some remarks on method</i>	231
2	<i>Two concepts of freedom</i>	236
3	<i>Experience in religious contexts</i>	240
4	<i>Brief retrospect</i>	244
	Index	247
