

CONTENTS OF *ONTOLOGY I*

GENERAL PREFACE TO THE <i>TREATISE</i>	V
PREFACE TO <i>ONTOLOGY I</i>	XIII
ACKNOWLEDGEMENTS	XV
SPECIAL SYMBOLS	XVI
INTRODUCTION	1
1. Ontological Problems	1
2. The Business of Ontology	3
3. Is Ontology Possible?	6
4. The Method of Scientific Ontology	7
5. The Goals of Scientific Ontology	9
6. Ontology and Formal Science	13
7. The Ontology of Science	15
8. Ontological Inputs and Outputs of Science and Technology	19
9. Uses of Ontology	22
10. Concluding Remarks	24
1. SUBSTANCE	26
1. Association	26
1.1. Concatenation and its Ontological Interpretation	26
1.2. Axiomatic Foundation of Association Theory	28
1.3. Consequences	31
1.4. Atom Aggregates	36
1.5. Clustering	37
1.6. Historical Remark	38
2. Assembly	39
2.1. Juxtaposition and Superposition: Intuitive Idea	39
2.2. Formalization	40
2.3. Definitions	42
2.4. Some Consequences	45

2.5. Atoms and Levels	47
2.6. Alternative Formalizations	49
2.7. Concluding Remarks	50
3. Entities and Sets	50
3.1. The Null Individual and the World	50
3.2. Entities and Concepts	52
3.3. Existence and Individuation	53
4. Concluding Remarks	55
2. FORM	57
1. Property and Attribute	58
1.1. Difference between Property and Attribute	58
1.2. Attribute-Property Correspondence	59
2. Analysis	62
2.1. Property in General and Property of a Particular	62
2.2. Intrinsic and Mutual, Primary and Secondary	65
3. Theory	69
3.1. Unarization and Dichotomization	69
3.2. Basic Assumptions and Conventions	72
3.3. Laws as Properties	77
3.4. Precedence and Conjunction of Properties	80
3.5. Similarity	85
3.6. Indiscernibility	90
4. Properties of Properties	92
4.1. Identity and Difference of Properties	92
4.2. Property Weight	94
4.3. Resultants and Emergents	97
4.4. Properties of Properties	98
5. Status of Properties	99
5.1. The Reality of Properties	99
5.2. A Critique of Platonism	102
5.3. The Problem of Universals	104
6. Concluding Remarks	108
3. THING	110
1. Thing and Model Thing	110
1.1. Thing: Definition	110

1.2. Assumptions	112	
1.3. Thing and Construct	116	
1.4. Model Thing	119	
2. State		123
2.1. Centrality of the State Concept	123	
2.2. State Function	125	
2.3. Law Statements as Restrictions on State Functions	128	
2.4. State Space: Preliminaries	131	
2.5. Definition of a State Space	133	
2.6. Equivalent Representations of States	136	
2.7. State and State Preparation	138	
2.8. Concluding Remarks	139	
3. From Class to Natural Kind		140
3.1. Classes of Things	140	
3.2. Ideals and Filters of Classes of Things	140	
3.3. Kinds and Species	143	
3.4. The Algebra of Kinds	147	
3.5. Variety	150	
4. The World		152
4.1. What Does the World Consist in and of?	152	
4.2. Individuals, Populations, Communities, and Species	153	
4.3. Existence Concepts	155	
4.4. Nothingness and Virtual Existence	158	
4.5. Existence Criteria	160	
5. Concluding Remarks		162
4. POSSIBILITY		164
1. Conceptual Possibility		165
1.1. Possibility Concepts	165	
1.2. Four Concepts of Conceptual Possibility	165	
1.3. Conceptual Possibility: Relative	168	
2. Real Possibility		168
2.1. Fact	168	
2.2. Chrysippian Possibility	172	
2.3. Real Possibility as Lawfulness	173	
2.4. Factual Necessity	174	
2.5. Possibility Criteria	177	
3. Disposition		179
3.1. Intuitive Idea	179	

3.2. Elucidation	181
3.3. Potency and Act	183
3.4. Unrealized Possibilities and Counterfactuals	184
4. Probability	185
4.1. Abstract Concept	185
4.2. Probability State Space	187
4.3. Propensity Interpretation	190
5. Chance Propensity	194
5.1. Irreducible Potentialities	194
5.2. Analysis	197
5.3. Upshot	198
6. Marginalia	199
6.1. Modal Logic and Real Possibility	199
6.2. Possible Worlds Metaphysics	202
6.3. Modality and Probability	204
6.4. Randomness	208
6.5. Probability and Causality	210
6.6. The Many Worlds Interpretation of Quantum Mechanics	211
7. Concluding Remarks	212
5. CHANGE	215
1. Changeability	216
1.1. Preliminaries	216
1.2. Changeability	218
2. Event	221
2.1. The Ordered Pair Representation of Events	221
2.2. The Event Space	222
2.3. The Representation of Processes	226
2.4. The Space of Lawful Events	229
2.5. Keeping Track of Changing States	232
2.6. Rate, Extent, and Change Potential	237
3. Process	243
3.1. Serial Change: Types	243
3.2. General Concepts and Principles	251
4. Action and Reaction	256
4.1. Induced Change	256
4.2. Aggregates and Systems	262
4.3. Reference Frame	264

5. <i>Panta Rhei</i>	267
5.1. Fact	267
5.2. Dynamicism	268
5.3. Interconnectedness	270
5.4. Three Misconceptions	271
6. Concluding Remarks	273
6. SPACETIME	276
1. Conflicting Views	278
1.1. The Three Main Views	278
1.2. Approaches to Chronotopics Building	281
2. Space	283
2.1. Interposition	283
2.2. A Philosopher's Space	285
2.3. The Physicist's Space	287
2.4. Bulk and Shape	293
2.5. Concluding Remarks	294
3. Duration	296
3.1. Intuitive Idea	296
3.2. Before and After	297
3.3. Duration	301
4. Spacetime	305
4.1. Spacetime, the Basic Network of Events	305
4.2. Position in Spacetime	309
4.3. Change in Spacetime	312
5. Spatiotemporal Properties	314
5.1. Does Spacetime have any Properties?	314
5.2. Time Reversal and Process Reversibility	317
5.3. Antecedence ("Causality") Principle	320
5.4. Action by Contact	323
5.5. Spatiotemporal Contiguity	325
5.6. The Causal Relation	326
6. Matters of Existence	327
6.1. Existence in Space and Time	327
6.2. Existence of Space and Time	328
7. Concluding Remarks	330

BIBLIOGRAPHY	334
INDEX OF NAMES	344
INDEX OF SUBJECTS	348
