INTRODUCTION	xi
PART ONE: ARE THE SENSIBLE QUALITIES SUBJECTIVE?	
I ARGUMENTS TO PROVE THE SENSIBLE QUALITIES SUBJECTIVE	3
(1) The Argument from Sensation	3
(2) The Argument from the Relativity of sensible qualities	10
(3) The Argument from Illusion	14
PART TWO: THE ARGUMENT FROM ILLUSION	
2 WHAT ARE THE IMMEDIATE OBJECTS OF AWARENESS IN PERCEPTION?	19
3 REFUTATION OF THE REPRESENTATIVE THEORY OF PERCEPTION	28
(1) We have no reason to believe in the existence of the physical objects postulated by the Representative theory	29
(2) On the Representative theory, there can be no resemblance between sense-impressions and physical objects	31
(3) The conception of a physical object which cannot be immediately perceived is illogical	33
4 SOME FEATURES OF SENSE-IMPRESSIONS	35
(1) Can there be sense-impressions nobody has?	35
(2) Are sense-impressions just as they appear to be?	37
5 REFUTATION OF PHENOMENALISM (1)	47
(1) The Phenomenalist gives unperceived physical objects a merely hypothetical existence	53
(2) The Phenomenalist must admit that a universe that contains no minds contains no matter either	56
(3) Physical objects, which are determinate, cannot be constructions out of indeterminate sense-impressions	58

CONTENTS

6	REFUTATION OF PHENOMENALISM (2)	<i>page</i> 62
	(4) Difficulties for the Phenomenalist account of Space and Time	62
	(5) Phenomenalism can give no account of the numerical difference of minds that exist at the same time	67
	(6) Phenomenalism can give no satisfactory account of the nature of a mind	70
7	AN ANALYSIS OF SENSORY ILLUSION	80
	(1) Sensory illusion as false belief that we are perceiving	81
	(2) 'Perception without belief'	84
	(3) Is 'perception without belief' <i>essentially</i> belief-inducing?	87
	(4) A psychological explanation of the occurrence of some sensory illusions	93
PART THREE: THE ARGUMENT FROM VERIFICATION		
8	THE ARGUMENT FROM VERIFICATION	101
9	THE NATURE OF PERCEPTION	105
	(1) Perception always involves the acquiring of knowledge of particular facts about the physical world, by means of our senses	107
	(2) Perception is <i>nothing but</i> the acquiring of knowledge of particular facts about the physical world by means of our senses	112
10	CONSEQUENCES OF OUR ACCOUNT OF THE NATURE OF PERCEPTION	123
	(1) The existence of unconscious perception	123
	(2) Are there intermediate cases between veridical and illusory perception?	124
	(3) Reformulation of the Empiricist theory of the way we acquire empirical concepts	125
	(4) The distinction between sensory illusion and hallucination	126
	(5) The Nature of sense-impressions	127
	(6) The Argument from Verification answered	132
PART FOUR: THE ARGUMENT FROM CAUSATION		
11	THE ARGUMENT FROM CAUSATION	139
	(1) The Argument from Causation	141
	(2) The Argument from the Time-gap	144

CONTENTS

PART FIVE: THE ARGUMENT FROM SCIENCE

12	THE ARGUMENT FROM SCIENCE	<i>page</i> 155
	(1) Scientific Phenomenalism	156
	(2) Difficulties for Scientific Phenomenalism	158
13	DIRECT REALISM WITHOUT SCIENTIFIC PHENOMENALISM	165
	(1) Can scientific findings undermine perception?	166
	(2) The argument from paradigm cases	167
14	PROBLEMS ABOUT THE SECONDARY QUALITIES	172
	(1) The apparent simplicity of the secondary qualities	172
	(2) Are the secondary qualities really simple?	174
	(3) Can the secondary qualities be reduced to primary qualities?	176
15	CAN PHYSICAL OBJECTS HAVE NOTHING BUT THE PRIMARY QUALITIES?	184
	CONCLUSION	191
	INDEX	194
