CHAPTER	PAGE
PREFACE	v
INTRODUCTION	ix
PART I · THE CLASSICAL PICTURE OF THE PHYSICAL WORLD	
I. THE GENERAL CHARACTER OF CLASSICAL PHYSICS . . . .	3
II. THE CONCEPT OF SPACE . . . . .	7
The Substantiality and Immutability of Space . . .	
The Homogeneity of Space and Its Consequences . . .	
. . . The "Theme of Gulliver" and the Relativity of Magnitude . . .	
The Euclidean Character of Space and Its Three-Dimensionality . . .	
The Causal Inertness of Space	
III. THE CONCEPT OF TIME . . . . .	35
The Independence of Time from Its Physical Content . . .	
The Homogeneity of Time and Its Consequences . . .	
The Relativity of Temporal Intervals . . .	
The Uniform Fluidity and the Causal Inertness of Time . . .	
The Problem of the Duration of Space	
IV. THE CONCEPT OF MATTER . . . . .	54
The Classical Definition of Matter and Its Consequences . . .	
The Constancy of Matter . . .	
Atom-icity Is Underivable from the Basic Definition of Matter	
V. THE CONCEPT OF MOTION . . . . .	67
Motion and the Concepts of Space, Time, and Matter . . .	
The Substantiality of Motion and the Laws of Conservation	
VI. THE MAIN FEATURES OF THE CORPUSCULAR-KINETIC VIEW OF NATURE . . . . .	79
The Unity of Matter . . .	
The Elimination of Action at a Distance	

- VII. SOME COLLATERAL TRENDS: DYNAMISM, ENERGY  
FLUID THEORIES . . . . .  
Dynamism . . . Energetism . . . Fluid Theory  
of Matter
- VIII. THE IMPLICIT ELIMINATION OF TIME IN CLASSICAL  
PHYSICS . . . . .  
The Laplacian Timeless Formula . . . The Reliability  
of Classical Time
- IX. THE ULTIMATE CONSEQUENCES OF MECHANISM . . . . .
- PART II · THE DISINTEGRATION OF THE CLASSICAL  
FRAMEWORK AND THE SIGNIFICANCE  
OF NEW CONCEPTS
- X. THE NEGATION OF INSTANTANEOUS SPACE . . . . .  
The Search for Absolute Motion . . . Relativity  
of Simultaneity
- XI. THE FUSION OF SPACE WITH TIME AND ITS MISREPRESENTATION  
SENTATION . . . . .  
The Fallacy of Spatialization . . . The Irreversibility  
of the Causal Links and Relativity of Position . . . Dynamization  
of Space in the General Theory
- XII. THE MODIFICATION OF THE CONCEPT OF TIME . . . . .  
Recapitulation . . . The Meaning of the Dilatation  
of Time in the Special Theory . . . The Meaning  
of the Dilatation of Time in the General Theory . . .  
. . . In What Sense Time Remains Universal
- XIII. THE DYNAMIC STRUCTURE OF TIME-SPACE . . . . .  
The Problem of the Contemporary World and the  
New Meaning of Spatiality . . . Doubts about  
Spatiotemporal Continuity . . . Pulsational Time and  
Space
- XIV. THE EVOLUTION OF THE CONCEPT OF MATTER . . . . .  
The Inadequacy of Corpuscular Models . . .  
Fusion of Mass with Energy
- XV. THE TRANSFORMATION OF THE CONCEPT OF MOTION . . . . .

<i>Contents</i>		ix
	“Changes” Supersede “Displacements” . . . Events Replace Particles	
XVI.	THE END OF THE LAPLACIAN ILLUSION . . . . . The Principle of Indeterminacy and Its Conflicting Interpretations . . . The Contingency of Micro- physical Events . . . The Inadequacy of the Quan- titative View of Nature	289
XVII.	THE REINSTATEMENT OF BECOMING IN THE PHYSICAL World . . . . . The Emergence of Novelty and the Potentiality of the Future . . . Novelty Is Compatible with the Causal Influence of the Past . . . Novelty Implies Irreversibility	333
XVIII.	IN SEARCH OF NEW WAYS OF UNDERSTANDING . . . . .	361
XIX.	SUMMARY . . . . .	382
	INDEX . . . . .	400
