

## Contents

1	PETER G. BERGMANN Foundations Research in Physics . . . . .	1
2	MARIO BUNGE The Structure and Content of a Physical Theory . . . . .	15
3	WALTER NOLL Space-Time Structures in Classical Mechanics . . . . .	28
4	CLIFFORD A. TRUESDELL Foundations of Continuum Mechanics . . . . .	35
5	HAROLD GRAD Levels of Description in Statistical Mechanics and Thermodynamics . .	49
6	EDWIN T. JAYNES Foundations of Probability Theory and Statistical Mechanics . . . . .	77
7	E. J. POST General Covariance in Electromagnetism . . . . .	102
8	PETER HAVAS Foundation Problems in General Relativity . . . . .	124
9	RALPH SCHILLER Relations of Quantum to Classical Physics . . . . .	149
10	HENRY MARGENAU and JAMES L. PARK Objectivity in Quantum Mechanics . . . . .	161
11	PAUL BERNAYS Scope and Limits of Axiomatics . . . . .	188
	Biographical Notes on the Contributors . . . . .	192
