

TABLE OF CONTENTS

INTRODUCTION TO THE SIXTH EDITION by <i>Karl Menger</i>	v
Preface to the First German Edition.....	xxii
Author's Preface to the Translation.....	xxv
Preface to the Second German Edition.....	xxv
Preface to the Seventh German Edition.....	xxvi
INTRODUCTION by <i>Ernst Mach</i>	1

CHAPTER I

THE DEVELOPMENT OF THE PRINCIPLES OF STATICS

I. The Principle of the Lever	11
II. The Principle of the Inclined Plane	32
III. The Principle of the Composition of Forces.....	44
IV. The Principle of Virtual Velocities	59
V. Retrospect of the Development of Statics.....	89
VI. The Principles of Statics in Their Application to Fluids	106
VII. The Principles of Statics in Their Application to Gaseous Bodies	130

CHAPTER II

THE DEVELOPMENT OF THE PRINCIPLES OF DYNAMICS

I. Galileo's Achievements	151
II. The Achievements of Huygens.....	192

III.	The Achievements of Newton.....	226
IV.	Discussion and Illustration of the Principle of Reaction	247
V.	Criticism of the Principle of Reaction and of the Concept of Mass.....	264
VI.	Newton's Views of Time, Space, and Motion.....	271
VII.	Synoptical Critique of the Newtonian Enunciations..	298
VIII.	Retrospect of the Development of Dynamics.....	305
IX.	Hertz's Mechanics	317
X.	In Answer to Criticisms of the Views Expressed by the Author in Chapters I and II.....	324

CHAPTER III

THE EXTENDED APPLICATION OF THE PRINCIPLES
OF MECHANICS AND THE DEDUCTIVE
DEVELOPMENT OF THE SCIENCE

I.	Scope of the Newtonian Principles.....	344
II.	The Formulae and Units of Mechanics.....	357
III.	The Laws of the Conservation of Momentum, of the Conservation of the Center of Gravity, and of the Conservation of Areas.....	376
IV.	The Laws of Impact.....	395
V.	D'Alembert's Principle	420
VI.	The Principle of <i>Vis Viva</i>	433
VII.	The Principle of Least Constraint.....	440
VIII.	The Principle of Least Action	456
IX.	Hamilton's Principle	475
X.	Some Applications of the Principles of Mechanics to Hydrostatic and Hydrodynamic Questions.....	479

CHAPTER IV

THE FORMAL DEVELOPMENT OF MECHANICS

I. The Isoperimetrical Problems.....	516
II. Theological, Animistic, and Mystical Points of View in Mechanics	541
III. Analytical Mechanics	560
IV. The Economy of Science.....	577

CHAPTER V

THE RELATIONS OF MECHANICS TO OTHER
DEPARTMENTS OF KNOWLEDGE

I. The Relations of Mechanics to Physics.....	596
II. The Relations of Mechanics to Physiology.....	609
Chronological Table of a Few Eminent Inquirers and of Their More Important Mechanical Works..	616
Index	621
