

CONTENTS

1. POSSIBILITIES OF ANALYSIS	1
2. SIMPLE TRUTH	17
§ 1. The Bearers of Truth	17
§ 2. Pragmatist and Coherence Theories of Truth	22
§ 3. Correspondence and Semantic Theories of Truth	27
§ 4. The Austin–Strawson Debate	44
§ 5. Problems of Symbolic Formulation	58
3. CONDITIONALS	64
§ 1. Introduction—Rival Accounts of Conditionals	64
§ 2. Kinds of Conditionals and If-Sentences	70
§ 3. The Materialist Account	74
§ 4. The Logical Powers Account	81
§ 5. The Consequentialist Account	82
§ 6. The Metalinguistic Account	84
§ 7. The Condensed Argument Account	86
§ 8. Possible Worlds	88
§ 9. Supposition	92
§ 10. The Logic of Conditionals	109
4. DISPOSITIONS AND POWERS	120
§ 1. The Meaning of Dispositional Statements	120
§ 2. The Ontology of Dispositions and Powers	133
§ 3. Are Physical Properties Dispositional?	148
5. CONCEPTS OF PROBABILITY	154
§ 1. The Multiplicity of Probability Concepts	154
§ 2. Informal, Simple, and Relational Probability, and the Range Concept	158
§ 3. Frequency	173
§ 4. Objective Chance and Propensity	179
§ 5. Propositional Functions	187
§ 6. Meaning Shifts	188
§ 7. Valid and Invalid Transitions	192
§ 8. Bernoulli and Bayes	204
§ 9. The Status of Probabilities	226

6. LOGICAL PARADOXES	237
§ 1. What is the Problem?	237
§ 2. Meaninglessness, Ambiguity, and Vagueness	242
§ 3. Hierarchical Approaches	247
§ 4. The Logical Proof Approach	254
§ 5. Lack of Content and Syntactic Paradoxes	262
§ 6. Cantor's Diagonal Argument and the Paradoxes of Richard and Berry	268
§ 7. Prior's Family of Paradoxes	276
§ 8. Varieties of Self-Reference	285
§ 9. Conclusion—the Most Obstinate Paradoxes	290
 APPENDIX : A Collection of Paradoxes	 296
 INDEX	 303
