1	What Is an Argument? (And What Is Not?)	1
	What Is an Argument?	1
	What Isn't an Argument?	4
	Where and How Do You Find Arguments?	6
	Exercise One	8
	Argument and Explanation: What's the Difference?	10
	Exercise Two	14
	Why Are Arguments Important?	17
	Review of Terms Introduced	18
2	Pinning Down Argument Structure	21
	Standardizing an Argument	21
	General Strategies for Standardizing Arguments	26
	Exercise One	27
	Finer Points about Conclusions	29
	The Problem of Missing Premises	32
	Exercise Two	37
	Language Problems: Ambiguity, Vagueness, and Emotionally Charged Language	40
	Exercise Three	49

3	When Is an Argument a Good One?	53
	Two Basic Conditions of Argument Soundness	53
	Exercise One	58
	The ARG Conditions	60
	Applying the ARG Conditions	64
	Exercise Two	69
	Summing Things Up: Arguments and Disagreements	74
	Exercise Three	77
4	Premises: What to Accept and Why	79
	When Premises Are Acceptable	79
	Exercise One	86
	When Premises Are Unacceptable	88
	Exercise Two	95
	General Summary: Acceptability and Unacceptability of Premises	99
5	Working on Relevance	101
	General Remarks about Relevance	101
	Some Ways of Being Relevant	103
	Irrelevance: Some General Comments	105
	Exercise One	107
	Fallacies Involving Irrelevance	109
	Exercise Two	119
	Some Concluding Comments	122
6	Fitting Things Together: A Diagramming Technique	125
	Single Support	125
	Linked Support	126
	Convergent Support	129
	A Quick Summary	131
	A Minor Complication	132
	Exercise One	134

Arguments Building on Each Other	136
Strategies Useful in Diagramming Arguments	144
Exercise Two	145
Problems That May Arise	149
Representing Counterconsiderations	152
Further Explanatory Comments	154
Exercise Three	156
7 Those Tidy Deductions: Categorical Logic	161
Deductive Relations: Some General Comments	161
Four Categorical Forms	164
Natural Language and Categorical Form	166
Exercise One	169
Rules of Immediate Inference	170
Exercise Two	174
Contrary and Contradictory Predicates and False Dichotomies	176
Categorical Logic: Some Philosophical Background	177
The Syllogism	179
Exercise Three	183
Applying Categorical Logic	186
Exercise Four	189
8 Those Tidy Deductions: Propositional Logic	193
Definition of the Basic Symbols Used in Propositional Logic	193
Testing for Validity by the Truth Table Technique	197
Exercise One	201
Translating from English into Propositional Logic	202
Exercise Two	208
Further Points about Translation	210
Exercise Three	213
Simple Valid Argument Forms	215
Exercise Four	218
Concluding Comments	221

9 Analogies: Reasoning from Case to Case	223
The Nature and Functions of Analogy	223
Analogy and Consistency	224
Exercise One	232
Inductive Analogies	238
Exercise Two	240
Further Suggestions for Handling Analogies	243
Loose and Misleading Analogies	245
Summary	252
Exercise Three	253
10 Philosophical Connections	259
Conductive Arguments	259
Inductive Arguments	262
Assessing Inductive Reasoning	265
Different Senses of <i>Inductive</i>	268
11 The Facts and Figures of Social Science	271
Science Is Not All Hard Facts	272
Exercise One	283
Sampling: the Basis of Enumerative Induction	287
Concluding Comments	296
Exercise Two	296
12 Causes, Explanations, and Social Life	305
Correlations	305
Finding the Cause	310
Correlation, Cause, and Being “Linked”	312
Exercise One	314
A Brief Discussion: Everyday Errors in Causal Reasoning	316
Exercise Two	319
Some Applications	323
Skepticism, Risks, and Being Conservative	328
Exercise Three	330

Analyzing Explanatory Inductions	335
Concluding Comments	340
I 3 Putting Your Skills to Use	343
Evaluating Lengthier Material	343
Constructing Your Own Arguments	346
Pessimism, Optimism, and the Effectiveness of Good Reasoning	348
Appendix: Fallacies	351
Answers to Selected Exercises	357
