

TABLE OF CONTENTS

EDITOR'S PREFACE	V
AUTHOR'S PREFACE	VII
INTRODUCTION	IX
PART I. BERGSON'S BIOLOGICAL THEORY OF KNOWLEDGE	
1. The Classical Biological Theory of Knowledge: Herbert Spencer	3
2. The Intermediate Stage: Helmholtz, Mach and Poincaré	15
3. Bergson's Amendment of the Classical Biological Theory of Knowledge	30
4. Why Mechanical-Pictorial Models Failed	40
5. The Contrast between Technical Control and Intellectual Insight: the Persistent Influence of Macroscopic Imagery	46
6. Limitations of Panmathematism	51
7. Negative Aspects of Bergson's Epistemology – Its Relations to Bachelard, Bridgman and Empirio-criticism	58
8. Bergson, Reichenbach and Piaget	65
9. Logic of Solid Bodies from Plato to Quine	72
PART II. BERGSON'S THEORY OF DURATION	
1. The Meaning of Immediacy	83
2. Content of the Bergsonian Intuition	89
3. The Dynamic Continuity of Duration	92
4. The Incompleteness of Duration: Novelty and its Denials	99
5. Superfluity of Succession in the Deterministic Schemes	106
6. The Leibniz-Fouillé Argument for the Compatibility of Succession and Determinism	113
7. The Heterogeneity of Duration: Lovejoy-Ushenko's Objections	118

8. The Deeper Meaning of the 'Indivisible Heterogeneity' of Duration	126
9. The Unreality of Durationless Instants: Becoming not Mathematically Continuous	133
10. The Inadequacy of the Atomistic Theory of Time	142
11. The Unity and Multiplicity of Duration: Bergson, Russell and Brouwer	147
12. Immortality of the Past: Bergson and Whitehead	152
13. James's and Bergson's Views of the Past Compared	155
14. The Irreversibility of Duration: the Comments of Royce and Ingarden	164
15. Duration as Concrete Universal. Bergson and Croce	170
16. An Outline of Bergson's Philosophy of Mathematics	176

PART III. BERGSON'S THEORY OF THE PHYSICAL WORLD AND ITS RELATIONS TO CONTEMPORARY PHYSICS

1. The Reality of Duration in the Physical World and its Implications	189
2. Different Degrees of Temporal Span. Microcosmos as Microchronos	195
3. Two Fundamental Questions	202
4. The Rejection of the Cartesian Dogma of the Completely Extensionless Mind	208
5. The Correlation of Different Temporal Rhythms with Different Degrees of Extension	214
6. Juxtaposition as the Ideal Limit of Distended Duration	223
7. The Negation of Instantaneous Space in the Relativistic Physics	226
8. Bergson and Einstein. The Physical World as Extensive Becoming	238
9. Limitations and Usefulness of the Corpuscular Models	257
10. Change without Vehicle and Container. Fallacy of Simple Location	270
11. Limits of the Criticism of Simple Location: Contemporary Independence	278
12. The Indeterminacy of Microphysical Events. Bergson and Boutroux	284

TABLE OF CONTENTS

XV

- | | |
|---|-----|
| 13. Bergson and Louis de Broglie | 292 |
| 14. Physical Events as Proto-Mental Entities. Bergson, Whitehead and Bohm | 302 |
| 15. The Significance and the Limitations of Auditory Models. Bergson and Strawson | 313 |
| 16. Concluding Remarks: the World of Laplace and the World of Bergson | 331 |

APPENDIX I. RUSSELL'S HIDDEN BERGSONISM 335

APPENDIX II. MICROPHYSICAL INDETERMINACY AND FREEDOM. BERGSON AND PEIRCE 346

APPENDIX III. BERGSON'S THOUGHTS ON ENTROPY AND COSMOGONY 368

ADDITIONAL SELECTED BIBLIOGRAPHY 398
