

CONTENTS

INTRODUCTION	1
------------------------	---

PART ONE

METHODOLOGY AND HISTORY

I. THE SUBJECT MATTER OF THE METHODOLOGY OF SCIENCES	11
--	----

1. The main branches and aspects of the methodology of sciences	11
2. The methodology of sciences and semiotics	12
3. The methodology of sciences and the history of science	18
4. The methodology of sciences and the theory of games and of decision-making	19
5. The methodology of sciences and information theory	20
6. The methodology of sciences and epistemology	22
7. The methodology of sciences and ontological and psychological investigations	22
8. Conclusions for use in specialized methodologies	26

II. THE SUBJECT MATTER OF THE METHODOLOGY OF HISTORY	30
--	----

1. Branches of the methodology of history	30
2. The pragmatic methodology of history	33
3. The apragmatic methodology of history	35
4. The objective methodology of history	36
5. The general methodology of history versus the methodologies of the various historical disciplines	38
6. The general methodology of history in relation to heuristics and source criticism. The place of the auxiliary historical disciplines	41

III. THE SCOPE OF THE SUBJECT MATTER (DOMAIN) OF HISTORICAL RESEARCH	46
--	----

1. Preliminary remarks	46
2. The etymology and the semantic evolution of the term <i>history</i>	46
3. General definitions of the subject matter of history (as a science)	50
4. History as <i>res gestae</i> and history as <i>historia rerum gestarum</i>	53

PART TWO

PATTERNS OF HISTORICAL RESEARCH

GROUNDS FOR CLASSIFICATION	59
IV. PRAGMATIC REFLECTION	67
1. Antiquity	67
2. The Middle Ages	71
V. CRITICAL REFLECTION	78
1. The development of the critical pattern of research and early eruditionism	78
2. The philosophical variant of the critical pattern of historical research. Further development of instruments of historical criticism in the 18th century	84
VI. ERUDITE AND GENETIC REFLECTION	96
1. The grounds for singling out this pattern of reflection. The third phase of historical narration	96
2. Methodological reflection under Romanticism	99
3. The peculiarities of positivist reflections on history	109
VII. STRUCTURAL REFLECTION	124
1. The rise of a structural pattern of historical research	124
2. Philosophical inspirations of anti-positivist history	125
3. The anti-positivist philosophy of history	127
4. The characteristics of structural reflection in historical research	139
5. H. Berr and the <i>Annales</i> school. Other trends in France	143
6. Methodological reflection in Britain and in America	148
7. Methodological trends in German historiography	151
8. Structural historiography in other countries. Concluding remarks	154
VIII. LOGICAL REFLECTION	169
1. The rise of the logical reflection on science	169
2. The problem of the logical-positivist demarcation of science and metaphysics	172
3. Methodological issues in analytic philosophy	174
4. Misunderstandings over the struggle of analytic philosophy against metaphysics in history. K. Popper and I. Berlin	176
5. Trends in the logical analysis of history	181
IX. DIALECTICAL REFLECTION	193
1. A review of the earlier types of reflection on history	193
2. The rise of dialectical reflection on history	197
3. The novel ontological and epistemological elements in materialistic dialectic	203
4. The rise of historical materialism	208

PART THREE

THE OBJECTIVE METHODOLOGY OF HISTORY

X. HISTORICAL FACTS	219
1. Preliminary remarks	219
2. The controversy over the concept of historical fact	220
3. The main characteristics of the dialectical interpretation of historical fact. A fact as a system	225
4. Spatio-temporal determinants of historical facts	230
XI. THE PROCESS OF HISTORY (CAUSALITY AND DETERMINISM)	239
1. The principle of causality as the basis of the statement on the regularity of historical facts	239
2. Determinism and indeterminism in history	245
3. Regularity and chance in history	249
4. The problem of an individual's free will	252
5. The role of prominent individuals in history	255
6. Fatalism and teleologism. The problem of determinism in the explanation of past events	262
XII. THE PROCESS OF HISTORY (HISTORICAL REGULARITIES)	275
1. The concept of historical regularities and their tentative classification	275
2. Historical regularities and principal causes	276
3. Synchronic regularities	278
4. Diachronic regularities	284
5. The regularities of historical development (synchronic-diachronic regularities)	287
6. Stages in the process of history (social formations)	295

PART FOUR

THE PRAGMATIC METHODOLOGY OF HISTORY. THEORY OF SOURCE-BASED AND NON-SOURCE-BASED KNOWLEDGE

XIII. THE NATURE OF HISTORICAL COGNITION	305
1. General description of the process of cognition	305
2. Characteristics of scientific cognition	307
3. The controversy over the nature of historical cognition	310
4. Arguments against scepticism. The characteristic traits of historical cognition	314
5. Epistemological relativism and the problem of objectivity in historical cognition	326
6. Truth in history	339
7. The concept of probability in historical research	345

XIV. QUESTIONS AND ANSWERS. A GENERAL RECONSTRUCTION OF HISTORICAL RESEARCH	360
1. The problem of decisions	360
2. Basic concepts in the theory of historical questions and answers	361
3. The concept of hypothesis in historical research	366
4. The structure of historical theories and methodological models	370
5. Schemata of hypothetical procedure in historical research	376
XV. THEORY OF SOURCE-BASED KNOWLEDGE	386
1. The general concept of historical source	386
2. Earlier classifications of historical sources	389
3. A tentative solution of the problem of the classification of sources	392
4. The reading of source information (decoding)	395
5. The concept of source-based knowledge and source-based data	398
XVI. THEORY OF NON-SOURCE-BASED KNOWLEDGE	401
1. A tentative explanation of the concept of non-source-based knowledge	401
2. The structure of non-source-based knowledge. Non-source-based data	404
3. The origin of non-source-based knowledge	405
4. Current knowledge and common sense	407
5. Non-source-based scientific knowledge	411
6. Theoretical issues of the integration of science	413
XVII. THE FUNCTIONS OF SOURCE-BASED AND NON-SOURCE-BASED KNOWLEDGE	418
1. An analysis of the historian's procedure from the point of view of the role of source-based and non-source-based knowledge	418
2. The functions of non-source-based knowledge ₁ . The problem of the nominal model of questions	421
3. The functions of non-source-based knowledge ₂ . The problem of methodological model (selection)	423
4. The functions of non-source-based data	426

PART FIVE

THE PRAGMATIC METHODOLOGY OF HISTORY: THE METHODS OF RECONSTRUCTION OF THE PROCESS OF HISTORY

XVIII. THE AUTHENTICITY OF SOURCES AND THE RELIABILITY OF INFORMANTS	431
1. The general concept of source criticism	431
2. The authenticity of sources	433
3. The rules of the examination of authenticity (external criticism)	434
4. The concept of reliability	442
5. The study of reliability (internal criticism)	444
6. Problems of authorship of sources	449

XIX. METHODS OF ESTABLISHING HISTORICAL FACTS	454
1. A general reconstruction of the procedure of establishing facts	454
2. Induction and deduction in research	456
3. Induction and deduction in historical research	460
4. The direct and the indirect method of establishing facts	461
5. The philological (lexical) method	467
6. The geographical method	468
7. The genealogical method	469
8. The comparative method (in its territorial version)	471
9. The retrogressive method (the chronological version of the comparative method)	474
10. Inference from the lack of data (<i>argumentum ex silentio</i>)	475
XX. QUANTITATIVE METHODS IN HISTORICAL RESEARCH	483
1. An outline of the development of quantitative analyses in historical research	483
2. The concept and the objectives of historical statistics	488
3. Statistical grouping of data	492
4. Calculations by estimation and calculations based directly on sources	495
5. Exhaustive calculations versus representative samples. The chi-square test	501
6. The numerical analysis of structures	506
7. A numerical analysis of changes	515
8. Correlation analysis	520
9. Computer applications in historical research	523
10. Quantitative analyses of texts	526
11. Prospects for applications of mathematics in historical research	528
XXI. THE PROCEDURE OF EXPLANATION IN HISTORICAL RESEARCH	536
1. The various interpretations of historical explanation	536
2. Understanding and explanation	539
3. Types of causal explanation in historical research	544
4. Explanation of goal-oriented human actions (humanistic interpretation)	545
5. Explanation by reference to dispositions	552
6. The general procedure of causal explanation. Hempel's model	558
7. Explanation by indication of conditions which are both sufficient and necessary	568
8. Explanation by indication of sufficient conditions	570
9. Explanation by pointing to necessary conditions	572
10. Explanation by reference to conditions necessary in a given situation	574
11. Explanation by reference to favourable conditions	576
12. Search for disturbing factors	577
13. Explanation by reference to more direct and less direct causes	578
14. Genetic explanation and genetic description	580
XXII. CONSTRUCTION AND SYNTHESIS	587
1. Basic and derivative research questions	587
2. Simple and synthetic constructions	588

- | | |
|---|-----|
| 3. The problem of synthesis in historical research | 590 |
| 4. Periodization in history | 593 |
| 5. Territorial and factual scope and classification of research types | 596 |

PART SIX

THE APRAGMATIC METHODOLOGY OF HISTORY

XXIII. THE NATURE AND INSTRUMENTS OF HISTORICAL NARRATION	605
1. The problem of narration in the methodology of sciences	605
2. Historical narratives versus narratives in general	606
3. Types of scientific historical narratives. Chronicle writing versus historiography	608
4. Historical imagination	614
5. The language of narratives	615
6. Classifying and ordering concepts	617
7. The role of counterfactual inference	620
XXIV. COMPONENTS OF NARRATIVES: HISTORICAL STATEMENTS AND LAWS	625
1. Categories of historical statements	625
2. Spatio-temporal determinants	627
3. The controversy over historical generalizations	628
4. Types of historical generalizations	631
5. The controversy over the laws of science	634
6. Laws in historical narratives	637
7. The concept of regularities in some historical studies	640
XXV. ELEMENTS OF HISTORICAL NARRATIVES: EVALUATIONS	643
1. Valuation versus evaluations. The logical value of evaluations	643
2. The various forms of the valuating attitude of historians	646
3. The kinds of evaluations in historical narratives	649
4. The criterion of progress as the main element of proper evaluations in historiography	651
5. Historians in face of evaluations	655
XXVI. THE METHODOLOGICAL STRUCTURE OF HISTORICAL RESEARCH	661
1. Criteria of classification of sciences	661
2. The anti-naturalist and the naturalist view of the social sciences	664
3. Subject-oriented and pragmatic idiographism	668
4. History versus sociology. The need for the development of social history	671
5. The tasks of history	674
INDEX OF NAMES	678
