

# CONTENTS

Chapter I.	1	<b>A Psychological Analysis</b>
	1	Psychology and common experience
	3	The intent of mentalism
	4	Not a physiological analysis
	5	Not a philosophical analysis
	8	Emotion and the common language
	10	The mind-body problem—an inconvenient fiction
	12	Retrospect and prospect
Chapter II.	15	<b>Mind—A System and Its Functions</b>
	15	Mind as a system
	17	The structure of mind
	17	Organization and structure
	19	Mental structure—conscious and unconscious
	21	The structure of a cognitive-interpretive system
	23	The structure of memory networks
	26	Meaning analysis
	31	Action systems and their structures
	31	The organization of action
	35	Organized action sequences
	37	Goals
	38	Teleology and organized behavior
Chapter III.	41	<b>Consciousness—a Special Function of Mind</b>
	42	The revival of consciousness
	48	Conscious contents and processes
	51	Consciousness—a special problem for mental theory
	53	Some uses of consciousness
	55	The possible adaptive functions of consciousness
	58	The limitation of conscious capacity and the flow of consciousness
	60	Conscious stopping

Chapter IV.	65	<b>Mind and Emotion</b>
	66	Mental organization and "emotion"
	66	Arousal
	67	Cognitive interpretation
	67	Consciousness
	68	The interaction of arousal and cognitive interpretation
	73	Meaning analysis and emotion
	79	Consciousness and emotion
Chapter V.	83	<b>New Insights and Old Theories</b>
	84	The belief in fundamental emotions—a human vanity
	86	Theories of emotion
	88	The Schachter contribution
	94	The James-Cannon controversy
	101	A contemporary Jamesian
	102	Some behaviorist positions
	105	Another cognitive theory
	107	Theories stressing plans and perceptions
Chapter VI.	111	<b>Arousal—The Cognitive Biology of Emotion</b>
	112	The autonomic nervous system
	115	The behavioral and cognitive functions of arousal
	115	The adaptive significance of ANS arousal
	119	Adaptive attentional consequences of arousal
	122	Arousal, efficiency, and attention
	126	The functional physiological stimulus
	128	Autonomic perception
	133	Some evidence for autonomic generality
	135	The conditions for autonomic arousal
	139	Cognitive transformations
	140	"Instinctual" behavior patterns
	140	Aggression
	145	The facial "expression" of emotion
	149	The cognition of emotion
Chapter VII.	153	<b>The Interruption of Plans and Behavior</b>
	155	The consequences of interruption
	155	Persistence and completion

156	Response substitution
158	The problem of completion
158	Emotional consequences of interruption
160	Interruption: Theory and experiment
163	Interruption of consummatory behavior
164	Completion and arousal
165	Disruption as a consequence of interruption
167	The organization of emotional behavior
168	An example of interruption
169	Perceptual and cognitive interruption

## Chapter VIII. 175 **Anxiety—Theories, Complexities, and Resolutions**

175	Introduction
176	Historical background
177	The three faces of anxiety
178	Theoretical positions
178	Psychoanalytic theory
181	Learning theory
184	Existentialist psychology
185	Human Anxiety—empirical generalizations
186	Anxiety Scales
188	What do anxiety scales measure?
190	Anxiety, pain, and inhibition
191	Death of pain
193	Nature of fundamental distress
195	Inhibition of anxiety
199	Anxiety and interruption
201	Environmental determinants of anxiety
204	The responses of the individual to interruption
207	Anxiety, helplessness, and hopelessness

## Chapter IX. 213 **Implications and Extensions**

213	The cognitive-interpretive system and its early development
217	Changing mental structures
219	Therapeutic change
221	Action and consciousness
222	The psychotherapy of everyday life
224	Personality, pathology, and individual differences
224	Interruption: Pathology and therapy
227	Personality differences

	228	Personality scales
	229	Personality types
	233	Psychopathy
	236	Emotional involvement
	238	Panic
	240	Sex—a different emotion?
	244	Some tender feelings—aesthetics and creativity
