
Contents

PART ONE

NUCLEAR HARDWARE 1

1 HOW A NUCLEAR BOMB WORKS 2

- Atomic Structure 2
- Radioactivity 4
- The Source of Nuclear Energy 5
- Atomic Bombs in Theory 5
- Atomic Bombs in Practice 8
- Hydrogen Bombs in Theory 11
- Hydrogen Bombs in Practice 12
- Neutron Bombs 15

2 DELIVERY SYSTEMS 17

- Bombers 17
- Bomber-Based Missiles 18
- Bomber Strategies 19
- Intercontinental Ballistic Missiles 23
- Strategic Submarines 33
- Command, Control, Communications, and Intelligence 39
- Summary of US–USSR Strategic Nuclear Balance 43

Policy Issues 43

- Should the US continue building and deploying long-range cruise missiles?
- Should the US deploy the MX missile?
- Should the US build the Trident II (D-5) missile?

Should the US build the B-1B bomber as a follow-on to the B-52s?

3 TACTICAL, THEATER, AND CONVENTIONAL FORCES 47

- Tactical Nuclear Weapons 47
- Theater Nuclear Weapons 48
- Conventional Forces 48
- Chemical and Biological Warfare (CBW) 58

Policy Issues 60

- Should NATO initiate a policy of “no first use” of nuclear weapons?
- Should NATO and the WP agree to a battlefield nuclear weapons free zone in Europe?
- Should the US build additional aircraft carriers as part of the goal of attaining a 600-ship navy?
- Should the US stockpile additional binary nerve gas?

PART TWO

NUCLEAR WEAPON EFFECTS 63

4 IMMEDIATE EFFECTS OF NUCLEAR EXPLOSIONS 64

- The Fireball 64
- Prompt Radiation 65
- Heat 68
- Blast 73

Groundbursts Versus Airbursts 75
Combined Effects 77
One Bomb on One City: Detroit 78
Electromagnetic Pulse 78
Hiroshima and Nagasaki 79

Policy Issues 81

Should people be taught about the effects of nuclear war in gruesome detail, as partly accomplished in this chapter?

5 MEDIUM AND LONG-TERM EFFECTS OF NUCLEAR EXPLOSIONS 83

Fallout 83
Hypothesized Attacks 91
Ozone Depletion and Ultraviolet Light 96
Nuclear Winter 97
Strategic Implications 104
Would *Homo Sapiens* Survive? 104

Policy Issues 105

Does the possibility of nuclear winter require rethinking of nuclear weapons policies?

PART THREE

STRATEGIC DOCTRINE 109

6 DETERRENCE 110

The First Phase: American Nuclear Monopoly 110
The Second Phase: US Bomber Superiority and "Massive Retaliation" 111
Limited War: An Undercurrent 112
The Third Phase: The Beginnings of Parity and the Problem of Credibility 112
The Problem of Vulnerability 113
Second-Strike Capability 115
How to Reduce Vulnerability 116
Strategy in the 1960s 118
Game Theory and the Prisoner's Dilemma 124
The Game of Chicken 125

Launch on Warning 126
Extended Deterrence 126
Europe: A Special Case 127
The Soviet View of Deterrence 129
Strategy in the 1980s 130
A Cautious Conclusion 131

Policy Issues 132

Does nuclear deterrence work?
Should the US plan for limited nuclear wars?
Should the US adopt a policy of "minimal deterrence" rather than maintaining current levels of "overkill"?
Should the US deploy counterforce weapons?

7 CIVIL DEFENSE AND STRATEGIC DEFENSE ("STAR WARS") 135

Civil Defense in the United States 135
Civil Defense in the Soviet Union 138
Comparing Civil Defense Vulnerabilities 138
Could Civil Defense "Work" for Either Nation? 140
Is Civil Defense Desirable? Yes 140
Is Civil Defense Desirable? No 141
Antiballistic Missiles 142
Ballistic Missile Defense and Star Wars/SDI: How It Might Work 148
Will Star Wars/SDI Work? 153

Some Strategic Implications of Star Wars/SDI 157
Antisatellite Weapons 158

Policy Issues 162

Should the US devote more effort to civil defense?
Should the US actively pursue Star Wars/SDI?
Should the United States abrogate the ABM treaty?
Should the United States seek a treaty that prohibits ASATs?

8 HOW DETERRENCE COULD FAIL 166

A Bolt out of the Blue 166
Crisis Conditions 166
Escalated Conventional War 168
Catalytic Wars and Proxy Wars 170

Nuclear Accidents 170

Terrorism 176

Policy Issues 177

Are nuclear weapons useful instruments of international power and diplomacy?

Should the president be required to consult with others before authorizing use of nuclear weapons?

Should the US maintain its nuclear weapons in a high state of readiness?

Should we consider accidental nuclear war to be a realistic possibility?

Should we consider intentional nuclear war to be a realistic possibility?

Must we maintain an ever-expanding arsenal to ensure that deterrence will not fail?

PART FOUR

COMPETITION AND EFFORTS AT CONTROL 181

9 THE ARMS RACE 182

Early US-Soviet Relations 182

World War II and Immediately Afterward 183

The Cold War and Nuclear Weapons 183

The 1950s 186

The Bomber Gap and the Missile Gap 187

Into the 1960s and 1970s 187

Is It Really an Arms Race? 189

A Quick Note on Detente 190

The Arms Race During the 1970s and 1980s 190

External Causes 194

Internal Causes 200

Combined Influences 207

What Is the Relationship Between Arms Races and Wars? 208

Policy Issues 209

Should the US seek to restrict the rate of scientific and technological innovation in the nuclear arms race?

Did the USSR surpass the US in military spending during the late 1970s? Was the increase in US military spending during the 1980s justified?

Should the US seek to win the nuclear arms race?

Can the US cause the USSR ultimately to give up the arms race by pushing the Soviet Union economically in the competition?

Should we seek to restrict the influence of the military-industrial complex?

Should the US scrutinize each new addition to its nuclear arsenal, evaluating its likely effect on the USSR?

Can the US increase its security by the arms race?

10 NEGOTIATED AGREEMENTS 213

Disarmament and Arms Control 213

Test Ban Treaties 214

Geographic Treaties 220

Nonnuclear Weapons Treaties 221

Agreements to Communicate and to Avoid Misunderstandings 221

SALT I 222

The Vladivostok Accords 225

SALT II 227

START 231

Euromissiles 231

The Geneva Talks of 1985 237

Verification 240

Claims of Cheating 245

Pitfalls of Negotiations 249

Advantages of Negotiations 251

Update on the Geneva Negotiations 254

Policy Issues 251

Should the United States link arms control to Soviet behavior?

Should we agree to a comprehensive test ban treaty?

Should the United States continue to observe the terms of the SALT II agreement, which expired on December 31, 1985, unratified by the Senate?

Should the US insist on a significant NATO Euromissile deployment?

Is it important to have "bargaining chips" during negotiations?

Should the US insist on absolute verifiability of agreements?

11 PROLIFERATION 255

The Nuclear Club 255

Technological Means of Proliferation 257

The Political Motivations for Proliferation 262

The Consequences of Proliferation 265

The Nonproliferation Regime 266

Nuclear Free Zones 271

Policy Issues 272

Should the United States phase out nuclear power and encourage other nations to do the same?

Should the US seek to inhibit the spread of advanced civilian nuclear technology?

Should the US and the USSR seek to induce other nations to refrain from horizontal proliferation by curbing their own vertical proliferation?

PART FIVE

DOMESTIC ASPECTS 275

12 NUCLEAR ECONOMICS 276

How Is Military Expenditure Decided? 276

How Is Military Spending Defined? 277

The Size and Growth of the Military Budget 280

The Nuclear Component of the Military Budget 281

Comparing the Military Budgets of the United States and the Soviet Union 286

Military Keynesianism 287

The Effects of Military Spending 289

Economic Conversion? 299

Policy Issues 301

Should the US match the USSR in military budgets?

Should the US strive to reduce its reliance on military spending?

13 NUCLEAR ETHICS 303

Western Religious Traditions and War 303

The Just War Tradition 304

Some *in Bello* Restraints 305

Nuclear War and Just War 307

The Morality of Deterrence 309

International Law 312

Policy Issues 315

Should the United States announce a policy of strictly counterforce targeting, because it is more ethical than countercity (or countervalue) targeting?

Are the niceties of *in bello* restraints meaningful once war has broken out?

Does Christianity require a definite rejection of the prospect of war in general and of nuclear war in particular?

Are nation-states sovereign in their behavior relative to nuclear weapons?

14 NUCLEAR PSYCHOLOGY 319

Impressions of Danger 320

Impressions of Security 321

Perception Theory 322

Mirror Imaging 324

Dehumanization and the Image of the Enemy 327

The Sanitization of Nuclear Language 327

Crisis Behavior 328

Groups, Conformity, and Obedience 329

Going to War 330

Self-Fulfilling Prophecies and Paranoia 331

The Psychology of Deterrence 332

Psychological Responses to Disaster 332

Children's Fears of Nuclear War 334

The Psychology of Activism 334

Policy Issues 336

Should the US abandon perception theory and treat nuclear weapons as their reality dictates?

Can psychology help the world out of its current nuclear dilemma?

15 SOME POSSIBLE FUTURES 338

Buildup and Modernization 338

Nuclear Freeze 339

Star Wars/SDI 340

GRIT	340	Minimal Deterrence	345
Steady As We Go	341	Regular US–Soviet Summits	345
Soviet Collapse	342	Transarmament	345
A Comprehensive Test Ban Treaty (CTBT)	342	A More Just World	346
Strategic Builddown	343	Confidence-Building Measures	346
Test Flight Moratorium	343	A No-First-Use Policy	346
Crisis Control Center	343	Journals and Organizations	348
Substantial Cuts in Existing Arsenals	344	Sources for Figures and Tables	350
Unilateral Nuclear Disarmament	344	Index	351
Victory in a Nuclear War	344
