

# *CONTENTS*

---

## **SECTION I—DESCRIPTIVE STATISTICS**

1	The definition of statistical analysis . . . . .	1
2	Basic mathematical concepts . . . . .	6
3	Frequency distributions and graphing techniques . . . . .	18
4	Percentiles . . . . .	41
5	Measures of central tendency . . . . .	51
6	Measures of dispersion . . . . .	66
7	The standard deviation and standard normal distribution . . . . .	77
8	Correlation . . . . .	90
9	Regression and prediction . . . . .	106

## **SECTION II—INFERENTIAL STATISTICS**

### **A. Parametric Tests of Significance**

10	Probability . . . . .	125
11	Introduction to statistical inference . . . . .	138
12	Statistical inference and continuous variables . . . . .	148
13	Statistical inference with two independent samples . . . . .	169
14	Statistical inference with correlated samples . . . . .	188
15	An introduction to the analysis of variance . . . . .	200

### **B. Nonparametric Tests of Significance**

16	Power and power efficiency of a statistical test . . . . .	214
17	Statistical inference with categorical variables . . . . .	224
18	Statistical inference with ordinally scaled variables . . . . .	240
	Matching Test . . . . .	252
