Prefa	ce			iii			
Intro	duction	•	٠	xi			
	Chapter I						
	Space			1			
§ 1.	1						
§ 2.	Riemannian geometry	٠	•	7			
§ 3.	The problem of physical geometry	•		10			
§ 4.	Coordinative definitions	•	•	14			
§ 5.	Rigid bodies			19			
§ 6.	The distinction between universal and differential	lford	es.	24			
§ 7.	Technical impossibility and logical impossibility			28			
§ 8.	The relativity of geometry			30			
§ 9.	The visualization of Euclidean geometry .			37			
§ 10.	The limits of visualization			44			
§ 11.	Visualization of non-Euclidean geometry .			48			
§ 12.	Spaces with non-Euclidean topological properties			58			
§ 13.	Pure visualization	_		81			
§ 14.	Geometry as a theory of relations	į	·	92			
§ 15.	What is a graphical representation?	·	•	101			
3	· · · · · · · · · · · · · · · · · · ·	•	•	101			
	Chapter II						
	Time						
§ 16.	The difference between space and time			109			
§ 17.	The uniformity of time	•	•	113			
§ 18.	Clocks used in practice	•	•	119			
§ 10. § 19.	Simultaneity	•	•	123			
§ 19. § 20.	· ·	•	•				
g 20.	Attempts to determine absolute simultaneity	•	•	129			
				ix			

Table of Contents

§ 21.					135			
§ 22.	The comparison of time	•	•	•	143			
§ 23.	Unreal sequences	•	•	•	141			
	Chapter III							
	Space and Time							
A. The Space-Time Manifold without Gravitational Fields								
§ 24.	The problem of a combined theory of spa				151			
§ 25.	The dependence of spatial measurement or							
Ū	simultaneity				153			
§ 26.	Consequences for a centro-symmetrical			pro-				
	pagation	٠.		•	161			
§ 27.	The construction of the space-time metric				165			
§ 28.	The indefinite space-type				177			
§ 29.	The four-dimensional representation of	the	space-1	time				
	geometry	•			182			
§ 30.	The retardation of clocks		•		190			
§ 31.	The Lorentz contraction and the Einstein	n contr	raction		195			
§ 32.	The principle of the constancy of the velo	city o	f light		202			
§ 33.	The addition theorem of velocities .				206			
	D 0 11 12 77 14 77 15							
§ 34.	B. Gravitation Filled Space-Time Ma The relativity of motion	anitolds	•		210			
§ 35.	The relativity of motion Motion as a problem of a coordinative de	finitio	•	•	218			
§ 35. § 36.	701 · · · · · · · · · · · · · · · · · · ·			•	222			
§ 30. § 37.	Einstein's concept of gravitation	•	•	•	232			
§ 37. § 38.	The problem of rotation according to Ein	etoin	•	•	237			
§ 38. § 39.	The analytic treatment of Riemannian sp		•	•	241			
§ 40.	Gravitation and geometry		•	•	249			
§ 41.	Space and time in special gravitational fie		•	•	258			
§ 42.	Space and time in general gravitational fi		•	•	263			
3 .2.	opace and time in general gravitational in	cius	•	•	20.			
	C. The Most General Properties of Space	and T	ime					
§ 43.	The singular nature of time				269			
§ 44.	The number of dimensions of space .				273			
§ 45.	The reality of space and time				283			
Index			•		289
