

# CONTENTS

1. Introduction	page 1
1. <i>Sentences, propositions, arguments. The point of view of logic</i>	1
2. <i>Argument forms. Validity</i>	5
3. <i>Truth-functors, truth-values, truth-functional validity</i>	9
2. Truth-functions	17
PART I	
1. <i>The idea of a truth-function; notation for truth-functions</i>	17
2. <i>Truth-functors and truth-functions</i>	21
3. <i>Individual monadic and dyadic truth-functions</i>	24
4. <i>Notations</i>	28
PART II	
5. <i>Elementary truth-tables</i>	31
6. <i>Relations of truth-functors to expressions of ordinary discourse</i>	32
7. <i>Bracketing</i>	35
3. The Truth-Table Method	39
1. <i>Introduction</i>	39
2. <i>The use of truth-tables to discover the truth-value of a proposition</i>	39
3. <i>Determining the validity or invalidity of an argument form by truth-tables: the direct method</i>	43
4. <i>Shortened procedures</i>	48
5. <i>An alternative idiom</i>	50
6. <i>The indirect method</i>	51
7. <i>Tautologies</i>	54

## Contents

8.	<i>Logical equivalence; interdefinability of functors</i>	page 56
9.	<i>The truth-table method applied to arguments</i>	58
4.	The Deductive Method	63
1.	<i>Introduction</i>	63
2.	<i>A deductive system; initial rules</i>	69
3.	<i>The rule of interchange</i>	73
4.	<i>The rule of conditional proof</i>	77
5.	<i>Application of the rule of conditional proof</i>	80
6.	<i>Use of the deductive method to prove logical truth</i>	89
7.	<i>Indirect deductions; reductio ad absurdum deductions</i>	93
5.	PART I: NORMAL FORMS	96
1.	<i>Introduction</i>	96
2.	<i>Use of conjunctive normal forms in testing for validity</i>	97
3.	<i>Theoretical use of normal forms</i>	101
	PART II: APPLICABILITY AND LIMITATIONS OF TRUTH-FUNCTIONAL LOGIC	103
4.	<i>General remarks</i>	103
5.	<i>Special terminology</i>	105
6.	<i>Argument begins in support of the proposition that truth-functional logic is applicable to all group I arguments. Lemma 1 and lemma 2</i>	107
7.	<i>Relation between if and <math>\supset</math>: preliminary discussion</i>	109
8.	<i>Argument against the interderivability of if and <math>\supset</math>. The paradoxes</i>	112
9.	<i>Completion of argument in support of lemma 2: argument for interderivability</i>	115
	List of Abbreviations	120
	Index of Definitions	120
