

TABLE OF CONTENTS

PREFACE	XV
---------	----

CHAPTER I / CONCEPTS AND INDICATORS IN HUMANISTIC SOCIOLOGY

1. The Problem of 'Verstehen'	1
2. Observable and Hypothetical Properties in Sociological Concepts	7
3. Concepts Defined with Humanistic Coefficient in the Language of Sociology	11
4. Understanding Constructs in Defining the Dependent and Independent Variables of Social Theories	18
5. The Validity of Introspectionist 'Self-Evidence'	26
6. Motives of Goal-Oriented Behaviors	29
7. Human Rationality as Explanatory Principle	33
8. Defining and Assessment – Two Operations Called Verstehen	42
9. Types of Indicators of Meaningful Sociological Variables	48
10. Behavioral Indicators and 'Surplus Meanings' in Behavioral Theories	55
11. The Validity of Indicators in Empirical Social Studies	58
Notes	69
Bibliography	71

CHAPTER II / VERBAL COMMUNICATIONS AS INDICATORS OF SOCIOLOGICAL VARIABLES

1. The Structure of the 'Communication Chain'	73
2. Two Categories of Factors Distorting the Communicative Relation	79
3. Verbal Behaviors and their Behavioral Correlates as 'Legitimate' Objects of Social Studies	82
4. Inferences Based on Assumption of Correspondence at the Expressive Level	87

5. Expressive and Other Instrumental Functions of Verbal Behavior	89
6. Problems of the Validity of Subjectively Sincere Communications	93
7. Inferences from and of Distortions of the Cognitive Relation	97
Notes	102
Bibliography	103

CHAPTER III / MEANING AND MEASUREMENT IN COMPARATIVE STUDIES

1. Conceptual and Operational Aspects of Phenomenal and Relational Comparability	104
2. Types of Relational Equivalences	112
3. Declared vs. Reconstructed Meaning of Attitudes	118
4. Ideological Connotation of Attitude Toward 'Socialism' Among Warsaw Students – A Case Study of 'Measurement of Meaning' of Political Attitudes	123
5. 'Marxism' and 'Socialism' – Two Variables with Similar Meaning and Different Intensity	127
Notes	130
Bibliography	131

CHAPTER IV / COMPARATIVE SOCIAL RESEARCH AND METHODOLOGICAL PROBLEMS OF SOCIOLOGICAL INDUCTION

1. Different Aspects of Generality of Theoretical Social Propositions	133
2. Conditional Causal Relations and Their Observable Consequences	136
3. Historical and Universal Concepts and Hypotheses in Comparative Social Research	139
4. The Strategy of Inductive Comparative Studies	142
5. The Role of Reductive Systematization of Theories in Formulation and Indirect Confirmation of Hypotheses	145
6. Historical Dimension of Social Phenomena and the Problems of Sociological Induction	147
7. The Problem of Spuriousness and the Role of Genetic Explanations in Social Theory	151

8. Comparative Induction and the Problem of One-Case Macro-Theories	157
Notes	162
Bibliography	164

CHAPTER V / CAUSAL INTERPRETATION OF STATISTICAL RELATIONSHIPS IN SOCIAL RESEARCH

1. The Problem of Causality	165
2. Typology of Causal Relations	167
3. Statistical Laws and Historical Generalizations	171
4. Statistical Relationships in Unconditional and Conditional Causal Patterns	173
5. Statistical Relationships in Multistage Causal Chains	183
6. Relative Frequencies and Random Probabilistic Relations	186
7. Causality, Correlation and Spurious Independence	187
8. Spurious Correlations	194
9. The Test Variable as a Supplementary Factor and as an Alternative Cause	201
10. Some other Functions of the Test Variable	205
11. A Typology of Three-Variable Analyses	209
12. Additivity and Interaction between the Quantitative Variables	212
Notes	223
Bibliography	227

CHAPTER VI / INDUCTIVE INCONSISTENCIES AND THE PROBLEMS OF PROBABILISTIC PREDICTIONS

1. 'Inconsistencies' Generated by Statistical Syllogism	228
2. 'Contradictions' Generated by General Conditional Laws of Science	229
3. Probability and Randomness	231
4. The Unconditional and Conditional Probabilistic Relations	233
5. Two Kinds of Conditionality of Probabilistic Relations	235
6. Patterns of Probabilistic Predictions and the Problem of Inductive Inconsistencies	238

7. Mr. Petersen Revisited	240
8. Deriving the Probabilities for Intersections of Additive and Interacting Causal Collectives	244
Notes	253
Bibliography	255

CHAPTER VII / LOGICAL AND EMPIRICAL ASSUMPTIONS OF VALIDITY OF INDUCTIONS

1. The Role and Nature of Empirical Presuppositions in Inductive Reasoning	256
2. The Assumption of Complete Uniformity within a Class of Objects or Events	261
3. The Assumption of Randomness in Statistical Induction	264
4. The Assumption of Randomness in Enumerative Induction	268
5. The Possibility of Estimating the Degree of Unconditionality of General Causal Hypotheses	272
6. Conclusions	282
Notes	284
Bibliography	284

CHAPTER VIII / EMPIRICAL KNOWLEDGE AND SOCIAL VALUES IN THE CUMULATIVE DEVELOPMENT OF SOCIOLOGY

1. Symptoms of Crisis in Sociology	285
2. Cumulative Character of Empirically Tested Propositions and Theories	289
3. Empirical and Normative Components in the Divergent Interpretations of Findings	293
4. Normative and Empirical Assumptions of Particular 'Approaches'	299
5. Instrumental Functions of Sociology	305
6. Ideological Functions of Sociology	311
Notes	316
Bibliography	318

CHAPTER IX / CULTURAL NORMS AS EXPLANATORY CONSTRUCTS IN THEORIES OF SOCIAL BEHAVIOR

1. Two Types of Sociological Explanations and Predictions	319
2. Cultural Norms as Matrices of Human Behaviors	322
3. Methodological Features of the Laws of Isomorphism	324
4. Different Meanings of the Term 'Cultural Norm'	329
5. Norm in the Coercive Sense	332
6. Norm in the Motivational Sense	334
7. Norm in the Behavioral Sense	335
8. Norm in the Complex Sense and Patterns of Normative Integration	337
9. Matrix Laws and Macrosociological Theory	342
Notes	345
Bibliography	346

CHAPTER X / ROLE AND LIMITS OF THE 'FUNCTIONAL APPROACH' IN FORMULATION OF THEORIES OF ATTITUDES

1. Internal and External Functionality of Attitudes	347
2. Theory or a Heuristic Directive	351
3. The Danger of Teleologism	353
4. Different Patterns of Conscious and Unconscious Instrumentality	358
5. The Principle of Functionality and the Problems of Prediction	361
6. Spontaneously Formed and Culturally Imposed Attitudes	366
Notes	373
Bibliography	374

CHAPTER XI / THE LOGIC OF REDUCTIVE SYSTEMATIZATIONS OF SOCIAL AND BEHAVIORAL THEORIES

1. The 'Problem of Reduction' in Social Sciences	376
2. Two Basic Patterns of Reduction	378
3. The Reduction of Laws to More General Laws	380
4. Reductions and Pseudo-Reductions	386
5. Problems of Incomplete Reductions	389
6. Explaining a Law by a Number of Additive Laws	392
7. Reduction of Statistical Laws	395

8. 'Objective Existence' of Collectivities and the Definitional Dependence of their Characteristics upon the Characteristics of their Members	399
9. General Pattern of Inter-Level Reductions and the Character of Correspondence Rules in Reductive Social Theories	409
10. The Problem of 'Emergence'	418
11. Laws of Behavior and Laws of Social Interaction in Reductive Social Theories	426
12. Statistical Relationships in Multi-Level Reductions	429
13. Some Special Problems of 'Emergence' in Sociology	434
14. Postulates of Reductionism and the Relations between Sociology and Psychology	442
Notes	447
Bibliography	449

CHAPTER XII / VALUES AND KNOWLEDGE IN THE THEORY OF EDUCATION: A PARADIGM FOR AN APPLIED SOCIAL SCIENCE

1. Theory or Theories of Education	451
2. Problem of Systematization of Theoretical Knowledge in the Science of Education	454
3. Construction of Models of Educational Situations for Explanation and Prediction	456
4. Certain Characteristics of Practical Sciences	460
5. Problems Connected with the Choice of Goals of Educational Processes	462
6. Ordering of the Goals of Educational Programs Understood as Systems of Values	466
7. Evaluation of the Distance between Educational Goals and Starting Point	468
8. Theoretical Evaluation of Attainability of Intended Educational Goals	470
9. The Manipulable Variables of the Educational Situation	475
10. Educational Institutions and the Wider Educational Environment	478
Notes	479
Bibliography	480
INDEX OF NAMES	481
