CHAPTER 1. INTRODUCTION

The Nature of Logic	3
Form and Content	4
Natural and Formalized Languages	6
Use and Mention	7
Names of Statements	8
EXERCISE 1	9

CHAPTER 2. CONCEPTS AND ELEMENTS OF THE LOGIC OF STATEMENTS

Reasoning and Beliefs	10
Beliefs and Statements	11
Statement-Constants	12
Statement-Variables	13
EXERCISE 2	15
Statement-Functors and Truth-Functors	15
Negation	17
The Range of Statement-Variables	17
The Matrix	18
Wff-Variables and Matrix-Definition	19
Conjunction	21
The Structure of the Matrix in General	22
Combinations of Negation and Conjunction	22
General Procedure in Matrix-Analysis	23
EXERCISE 3	25
Well-Formedness	25
EXERCISE 4	27
Alternation	28
Abbreviating	29

Transforming	31
EXERCISE 5	32
Equivalence	33
Tautology, Self-Inconsistency, Contingency	34
EXERCISE 6	35
Composite Statement-Forms	36
Reducing	38
Reducing as a Test for Well-Formedness	39
EXERCISE 7	40
Implication	41
EXERCISE 8	43
Necessary and Sufficient Conditions	44
EXERCISE 9	46
Other Truth-Functors	47
EXERCISE 10	48

CHAPTER 3. EVALUATION AND DEMONSTRATION IN THE LOGIC OF STATEMENTS

Inference-Forms	50
Validity	51
Statement-Forms Corresponding to Inference-Forms	52
EXERCISE 11	53
Selective Matrix-Analysis	55
Cases of Initial Indeterminacy	57
EXERCISE 12	60
Further Conditions of Acceptability	61
EXERCISE 13	64
Examples of Complete Evaluations	65
EXERCISE 14	67
Demonstration	68
Elementary Tautologous Equivalences	71
EXERCISE 15	75
Elementary Valid Inference-Forms	75
EXERCISE 16	77
Catalogue of Assumptions	78
Demonstration-Procedure	79
Examples of Demonstration	80
General Demonstration-Procedure in Cases of Formal Unsoundness	83
EXERCISE 17	84

CHAPTER 4. AXIOMATIC TREATMENT OF THE LOGIC OF STATEMENTS

Tautologies Viewed as Laws	91
Primitive Basis of the System PM	92
Proof-Procedure for the System PM	93
Theorems Regarding Alternation and Implication	94
Theorems Regarding Conjunction	102

CHAPTER 5. CONCEPTS AND ELEMENTS OF THE LOGIC OF PREDICATES

Extending the Logic of Statements	104
The Polish and the Principia Notations	105
EXERCISE 18	108
Predicates and Individuals	109
Free Occurrences of Individual-Variables	111
Universal Quantification	111
Existential Quantification	113
EXERCISE 19	115
Plurality of Predicate-Variables	115
EXERCISE 20	118
Plurality of Individual-Variables	120
EXERCISE 21	124
Conditions of Well-Formedness for the Logic of Predicates	124
Vacuous and Non-Vacuous Occurrences of Quantifiers	125
EXERCISE 22	126
Location of Quantifiers	127
Prenex Normal Form	127
Construction of Prenex Normal Form	128
EXERCISE 23	133
Logical Properties of Two-Place Predicates	134
EXERCISE 24	136

CHAPTER 6. EVALUATION AND DEMONSTRATION IN THE LOGIC OF PREDICATES

Expressing Inference-Forms for Purposes of Evaluation	138
Universes of Discourse	139
Classifying Inference-Forms for Purposes of Evaluation	140
EXERCISE 25	141

Inferential Strength	142
The Twenty-one Classes of Inference-Forms	143
Evaluating Inference-Forms of Class 2.2	144
EXERCISE 26	145
The Principle of Exemplification	146
Standard Exemplifying Symbols	147
The Elementary Inference-Form E.U.	148
Evaluating Inference-Forms of Class 3.3	149
Demonstration and the Principle of Universalization	150
EXERCISE 27	152
Inference-Forms Consisting of Statement-Forms of Classes 2 and 3	153
EXERCISE 28	159
The Principle of Specification	161
The Elementary Inference-Form S.E.	162
Evaluating Inference-Forms of Class 1.1	163
EXERCISE 29	166
Demonstration and the Principle of Generalization	167
EXERCISE 30	167
Inference-Forms Consisting of Statement-Forms of Classes 1 and 2	168
EXERCISE 31	170
Inference-Forms Consisting of Statement-Forms of Classes 1 and 3	171
EXERCISE 32	174
Inference-Forms Consisting of Statement-Forms of All Three Classes	175
EXERCISE 33	177

CHAPTER 7. TRADITIONAL LOGIC

The Content of Traditional Logic	181
The Elements of Traditional Logic	182
Immediate Inference	183
Primitive Basis of the System TL	184
Theorems of Immediate Inference	186
EXERCISE 34	188
Rules of Immediate Inference	188
EXERCISE 35	190
Syllogism	190

EXERCISE 36	192
Expanding TL to Accommodate Syllogistic Theorems	192
EXERCISE 37	194
Syllogistic Theorems	194
Rules of Syllogism	196
EXERCISE 38	197
Terms, Classes, and Complementation	198
Reconstructing TL	200
Further Theorems of Immediate Inference	201
Immediate Inference Involving Complementation	202
EXERCISE 39	205
Opposition	206
Theorems of Opposition	208
EXERCISE 40	209
Sorites	210
EXERCISE 41	211
Table of Theorems of TL	211
Diagrammatic Evaluation-Procedure for Immediate Inference	213
EXERCISE 42	216
Traditional Logic and the Logic of Predicates	216
EXERCISE 43	218
Medial and Maximal Interpretations in Immediate Inference	218
EXERCISE 44	220
Examining the Medial and Maximal Interpretations	220
EXERCISE 45	224
Diagrammatic Evaluation-Procedure for Syllogism	224
EXERCISE 46	226

CHAPTER 8. ANALYSIS AND EVALUATION OF INCOMPLETE INFERENCE

Universal Applicability of Formal Criteria	227
Direct Application of Formal Criteria to Incomplete Inferences	228
Practical Application of Formal Criteria	229
Examples of Practical Application of Formal Criteria	230
EXERCISE 47	235
Summary and Conclusions	236

INDEX	239
