PREFACE	vii
CHAPTER 1. THE THEORY	
1.1. Introduction	1
1.2. Stimulus-Sampling Theory of Learning	5
1.3. Simple Example: Markov Model for Noncontingent Case	10
1.4. Markov Model for Zero-Sum, Two-Person Games	23
*1.5. Alternative Linear Model	31
1.6. Comparisons with Game Theory	33
*1.7. Hypothesis Models	37
1.8. Survey of Recent Literature	42
1.9. Summary	46
CHAPTER 2. METHODS OF ANALYSIS	
2.1. Introduction	47
2.2. Maximum-Likelihood Estimates	48
2.3. Pseudomaximum-Likelihood Estimates	51
2.4. Some Statistical Tests for Markov Chains	56
*2.5. Estimation of Transition Numbers in Multi-Element Models	60
*2.6. Generalized Conditioning Model	71
2.7. Summary	77
CHAPTER 3. SOME ZERO-SUM, TWO-PERSON SITUATIONS	
3.1. Introduction	78
3.2. Experimental Method	81
3.3. Mean Learning Curves and Asymptotic Results	83
3.4. Tests for Markov Properties	87
3.5. Estimate of θ and Predicted Asymptotic Variance	88
3.6. Game-Theory Comparisons	90
*3.7. Multi-Element Models	95
*3.8. Generalized Conditioning Model	104
3.9. Summary	108

CHAPTER 4. SOME NON-ZERO-SUM, TWO-PERSON SITUATIONS

4.1. Introduction	109
4.2. Model	110
4.3. Experimental Method	113
4.4. Mean Learning Curves and Asymptotic Results	114
4.5. Estimates of θ_A and θ_B	117
4.6. Tests for Markov Properties	119
4.7. Game-Theory Comparisons	120
*4.8. Generalized Conditioning Model	123
4.9. Summary	127

CHAPTER 5. A SYMMETRIC NON-ZERO-SUM SITUATION

5.1. Theoretical Description	128
5.2. Experimental Method	129
5.3. Mean Learning Curves	130
5.4. Maximum-Likelihood Estimate of θ and Related Predictions	131
5.5. Tests for Markov Properties	132
5.6. Game-Theory Comparisons	132
*5.7. Generalized Conditioning Model	133
5.8. Summary	135

CHAPTER 6. COMMUNICATION AND DISCRIMINATION IN TWO-PERSON SITUATIONS

6.1. Introduction	136
6.2. Model	140
6.3. Experimental Method	143
6.4. Mean Learning Curves and Asymptotic Results	145
6.5. Estimate of θ and Predicted Asymptotic Transitions	148
6.6. Game-Theory Comparisons	150
6.7. Summary	152

CHAPTER 7. ANOTHER COMMUNICATION STUDY

7.1. Introduction	153
7.2. Model	154
7.3. Experimental Method	157
7.4. Mean Learning Curves and Asymptotic Results	159
7.5. Asymptotic Transition Data	162
7.6. Summary	165

CHAPTER 8. A THREE-PERSON, SIMPLE MAJORITY SITUATION

8.1. General Description of the Situation	166
8.2. Model	167
8.3. Experimental Method	172

CHAPTER 8 (<i>Continued</i>)	172
8.4. Mean Learning Curves and Asymptotic Results	175
8.5. Estimates of θ in Terms of $\hat{P}(0_i)$	176
8.6. Tests for Markov Properties	176
8.7. Maximum-Likelihood Estimate of θ and Predicted Transition Probabilities	178
8.8. Game-Theory Comparisons	180
8.9. Summary	
CHAPTER 9. DISPLAY OF PAYOFF MATRIX	
9.1. Theoretical Description	181
9.2. Experimental Method	182
9.3. Tests for Differences Among Experimental Conditions	185
9.4. Mean Learning Curves and Asymptotic Results	186
9.5. Game-Theory Comparisons	189
9.6. Tests for Markov Properties	190
*9.7. Generalized Conditioning Model	190
9.8. Summary	193
CHAPTER 10. MONETARY PAYOFFS AND NONCONTINGENT REINFORCEMENT SCHEDULES	
10.1. Introduction	194
10.2. Experimental Method	196
10.3. Mean Learning Curves and Asymptotic Results	197
10.4. Tests for Markov Properties	199
*10.5. Generalized Conditioning Model	200
10.6. Application of the Multi-Element Model	205
*10.7. Application of the Linear Model	217
*10.8. Application of a Hypothesis Model	222
*10.9. A Memory Model	227
10.10. Summary	230
CHAPTER 11. UTILITY FUNCTIONS	
11.1. Introduction	232
11.2. Model	234
11.3. Experimental Method	237
11.4. Mean Learning Curves and Transition Data	239
11.5. Maximum-Likelihood Estimates of the Conditioning Parameters and Predicted Asymptotes	240
*11.6. An Alternative Interpretation of Conditioning	241
11.7. Utility Functions; Luce's Multiplication Rule	243
*11.8. A Third Interpretation of Conditioning	246
11.9. An Observing-Response Model of Choice Behavior	247
11.10. Brief Account of a Second Experiment	252
11.11. Summary	254

CHAPTER 12. EXTENSIONS AND CONCLUSIONS

12.1. Introduction	256
12.2. Social Conformity	256
12.3. Economic Oligopoly	265
12.4. Continuous Games	271
12.5. Conclusions	278
BIBLIOGRAPHY	285
AUTHOR INDEX	291
SUBJECT INDEX	293
