## PART I · INFORMAL LOGIC

Chapter 1	<i>LOGIC AND DISCOURSE</i>	3
1.1	Three Basic Modes of Discourse	3
1.2	Multipurpose Discourse	4
1.3	Exercises	5
1.4	The Logic of Disagreements	7
1.5	Exercises	10
1.6	What Is Logic?	11
1.7	Sentences and Propositions	14
1.8	Exercises	15
1.9	The History of Logic	15
1.10	Exercises	16
1.11	“Who Is the Engineer?”	17
Chapter 2	<i>WORDS, NAMES, AND TERMS</i>	18
2.1	Words	18
2.2	Use versus Mention	19
2.3	Exercises	20
2.4	Ambiguity	21
2.5	Exercises	22
2.6	Names	22
2.7	Types of Names	23
2.8	Exercises	24
2.9	Terms	24
2.10	Exercises	25
2.11	Extension and Intension of Terms	26
2.12	Exercises	27
2.13	Denotation and Connotation of Terms	28
2.14	Exercises	29
Chapter 3	<i>DEFINITION AND CLASSIFICATION</i>	30
3.1	The Nature of Definitions	30
3.2	General Purposes of Definitions	31
3.3	Special Purposes of Definitions	32
3.4	Exercise	33
3.5	Stipulative versus Lexical Definitions	34

3.6 Exercises	35
3.7 "Loaded" Definitions	35
3.8 Exercise	36
3.9 Methods of Definition	36
3.10 Exercise	40
3.11 Rules of Definition	41
3.12 Exercise	47
3.13 Division and Classification	48
3.14 Exercises	51
3.15 Rules of Classification	52
3.16 Exercises	54
Chapter 4 <i>EVIDENCE, ARGUMENTS, AND FALLACIES</i>	56
4.1 Evidence	56
4.2 The Adequacy of Evidence	56
4.3 Exercises	57
4.4 Arguments	58
4.5 Exercise	60
4.6 Deductive and Inductive Arguments	60
4.7 Exercise	61
4.8 The Adequacy of Deductive Arguments	63
4.9 Exercises	66
4.10 The Adequacy of Inductive Arguments	67
4.11 Exercise	68
4.12 Fallacies	68
4.13 Exercise	71
4.14 Argument Analogies	72
4.15 Exercises	73
Chapter 5 <i>INFORMAL FALLACIES</i>	74
5.1 Types of Informal Fallacies	74
5.2 Fallacies of Ambiguity	74
5.3 Exercises	76
5.4 Fallacies of Relevance	78
5.5 Exercises	83
5.6 Fallacies of Presumption	85
5.7 Exercises	89
5.8 Pseudo-Fallacies	90
5.9 Exercises	91
Chapter 6 <i>LOGICAL EXPOSITION</i>	93
6.1 Introduction	93
6.2 Logical Organization	93
6.3 Exercises	96

6.4	Logical Factors in Style	96
6.5	Exercises	99
6.6	Pitfalls of Incoherence	100
6.7	Exercises	102
6.8	Herbert Spencer on Style	103
6.9	Exercises	107

## PART II · SYLLOGISTIC LOGIC

<b>Chapter 7</b>	<b><i>CATEGORICAL PROPOSITIONS</i></b>	<b>113</b>
7.1	The Definition of "Categorical Proposition"	113
7.2	Exercise	114
7.3	The Meaning of Some Important Terms	115
7.4	Exercises	115
7.5	The Distribution of Terms	116
7.6	Exercise	117
7.7	Transformation into Standard Categorical Form	118
7.8	Exercise	121
<b>Chapter 8</b>	<b><i>IMMEDIATE INFERENCE</i></b>	<b>122</b>
8.1	Opposition-Relationships (Contradiction)	122
8.2	Exercise	123
8.3	The Square of Opposition	123
8.4	Exercise	126
8.5	Diagrammatic Representation of Categorical Propositions	126
8.6	Exercises	130
8.7	Entailments and Equivalences	131
8.8	Exercises	131
8.9	Conversion, Obversion, Contraposition	131
8.10	Exercises	135
<b>Chapter 9</b>	<b><i>THE CATEGORICAL SYLLOGISM</i></b>	<b>137</b>
9.1	Categorical Syllogisms and their Classification	137
9.2	Exercises	139
9.3	The Validity of Categorical Syllogisms	140
9.4	Exercise	141
9.5	Testing Syllogistic Validity by Venn Diagrams	141
9.6	Exercises	143
9.7	Survey of Valid Syllogisms	144
9.8	Exercises	145
9.9	Equivalent Syllogisms	145
9.10	Exercises	146
9.11	Inconsistent Triads	146
9.12	Exercises	147

Chapter 10	<i>SYLLOGISTIC RULES AND FALLACIES</i>	148
10.1	Introduction	148
10.2	The Rules of Syllogistic Validity and their Corresponding Fallacies	148
10.3	Exercises	151
10.4	Completeness of the Six Syllogistic Rules	152
10.5	Exercises	155
Chapter 11	<i>TRANSFORMATION INTO SYLLOGISTIC FORM</i>	157
11.1	Some Devices for Transforming Nonsyllogistic Arguments into Standard Syllogistic Form	157
11.2	Exercise	160
11.3	Near-Syllogistic Arguments: The Enthymeme	161
11.4	Exercises	163
11.5	Near-Syllogistic Arguments: The Sorites	164
11.6	Exercises	167
11.7	Near-Syllogistic Arguments: Complex Cases	168
11.8	Exercise	169
 <b>PART III · FUNDAMENTALS OF SYMBOLIC LOGIC</b>  		
Chapter 12	<i>ELEMENTS OF PROPOSITIONAL LOGIC</i>	173
12.1	Compound Statements	173
12.2	Statement Schemata	174
12.3	Truth-Functionality of Statement Connectives	175
12.4	Exercises	176
12.5	Five Statement Connectives	176
12.6	Parentheses	181
12.7	Exercises	182
12.8	Symbolic Translation of Common-Language Statements	183
12.9	Exercises	185
12.10	Truth Tables	186
12.11	Exercises	188
12.12	Tautologies, Contradictions, Contingent Schemata, and Equivalent Schemata	188
12.13	Exercises	192
12.14	The Validity of Inference Schemata	192
12.15	Exercises	195
12.16	Inconsistent Premises	195
12.17	Exercises	196

12.18	A Short-Cut Test of Validity	197
12.19	Exercises	199
12.20	Dilemmas	201
12.21	Exercises	202
Chapter 13	<i>PROOFS IN PROPOSITIONAL LOGIC</i>	204
13.1	Proofs	204
13.2	Rules of Inference and Axioms for Propositional Logic	206
13.3	Sample Proofs of Theorems	210
13.4	Exercises	212
13.5	Proofs from Hypotheses	214
13.6	Exercises	215
13.7	Deductive Completeness	217
13.8	Exercises	219
13.9	Proving the Formal Validity of Arguments	220
13.10	Exercise	222
13.11	A Proof Strategy	222
13.12	Exercises	224
Chapter 14	<i>ELEMENTS OF QUANTIFICATIONAL LOGIC</i>	226
14.1	Basic Ideas and Notations	226
14.2	Exercises	229
14.3	Universal and Existential Quantification	230
14.4	Exercises	233
14.5	Axioms and Rules of Inference for Quantificational Logic	234
14.6	Proofs	242
14.7	Exercises	244
14.8	Q-Tautology and Validity	246
14.9	Exercises	250
14.10	Completeness and the Decision Problem in Quantificational Logic	251
14.11	Exercises	253
14.12	Verbal Arguments	253
14.13	Exercise	253
14.14	Revision of Syllogistic Logic	256
14.15	Exercises	258
14.16	Limitations of Quantificational Logic	258
14.17	Exercises	259
Chapter 15	<i>ELEMENTARY LOGIC OF SETS</i>	260
15.1	Sets and Elements	260
15.2	Exercises	261
15.3	Basic Relations among Sets	261
15.4	Exercises	264

15.5	Basic Operations on Sets	265
15.6	Exercises	268
15.7	Numerical Relations among Finite Sets	269
15.8	Exercises	271

## PART IV · INDUCTIVE LOGIC

Chapter 16	<i>ANALOGY</i>	275
16.1	Inductive Inference	275
16.2	Exercises	276
16.3	Argument by Analogy	276
16.4	Exercise	278
16.5	Criteria of Firmness of Arguments by Analogy	279
16.6	Exercises	281
16.7	False Analogies	283
16.8	Exercises	283
16.9	Induction by Simple Enumeration	284
16.10	Exercises	286
Chapter 17	<i>SCIENTIFIC METHOD</i>	287
17.1	The Scientific Enterprise	287
17.2	Scientific Theories	288
17.3	Exercises	290
17.4	Scientific Explanation	292
17.5	Exercises	293
17.6	Experimentation and Scientific Inquiry	293
17.7	Exercises	294
17.8	Pitfalls in Scientific Explanation	295
17.9	Exercises	297
Chapter 18	<i>MILL'S METHODS OF EXPERIMENTAL INQUIRY</i>	298
18.1	Causality	298
18.2	Exercises	299
18.3	Mill's Methods	300
18.4	Exercises	306
18.5	Pitfalls in the Application of Mill's Methods	309
18.6	Exercises	310
18.7	Negative Applications of Mill's Methods	311
18.8	Exercises	312
18.9	Tendency Connections	312
18.10	Exercises	313
18.11	The Limitations and Strengths of Mill's Methods	313
18.12	Exercise	314

Chapter 19	<i>STATISTICS AND STATISTICAL ARGUMENTS</i>	315
19.1	The Nature of Statistics	315
19.2	Some Basic Tools for Statistical Summaries	316
19.3	Exercises	317
19.4	The Pitfalls of Statistical Summaries	318
19.5	Exercises	319
19.6	Arguments Based on Statistical Sampling	320
19.7	Exercises	321
19.8	The Pitfalls of Statistical Sampling	321
19.9	Exercises	323
19.10	Cheating with Statistics	324
19.11	Summary	327
19.12	Exercises	327
Chapter 20	<i>PROBABILITY</i>	330
20.1	The Importance of Probability	330
20.2	Types of Probability-Determination	331
20.3	Exercises	333
20.4	Rules for Calculating Probabilities: Special Alternation and Negation	334
20.5	Exercises	335
20.6	Rules for Calculating Probabilities: Conjunction, General Alternation, and At-Least-One	335
20.7	Exercises	338
20.8	Expected Values and Fairness in Risk	339
20.9	Exercises	341
	<i>Index of Abbreviations and Symbols</i>	345
	<i>Index of Names</i>	347
	<i>Subject Index</i>	349
