INTRODUCTION

Principles of Genetics 3

Part I GENETICS IN DIAGNOSIS AND THERAPY OF DISEASE

1 Genetic Counseling 35

2 Eugenics, Euthenics, and Euphenics 49

3 Genetic Screening 65

4 Genetic Therapy 85

5 The Prenatal Diagnosis of Genetic Disease 107

Part II REPRODUCTIVE ENGINEERING

6 Artificial Insemination 131

7 Sex Determination 149

8 Ectogenesis 161

9 Parthenogenesis 185

10 Cloning 195

11 The Synthesis of Life From Nonliving Matter 207

Notes 215

Glossary 217
