

CONTENTS

Preface v

Part I: THE ANTECEDENTS OF MODERN PSYCHOLOGY

1. *The Intellectual Background* 3

The Roots of Systematic Psychologies 4

Is There a Universal Psychology? 6

Backgrounds in Greek Philosophy 7

Skepticism and Socrates' Answer 10

Plato and Aristotle 11

Backgrounds in the Renaissance 15

2. *The Seventeenth Century* 20

Descartes 20

Leibnitz 23

English Empiricism: Hobbes 24

Locke 29

3. *The Eighteenth Century* 32

Berkeley and Hume 32

Hartley and Associationism 34

The Scottish School 35

French Psychology 37

Humanitarianism, Hedonism, Utilitarianism 40

German Psychology: Kant 43

German Psychology: Romanticism 45

Hegel 46

4. *The Early Nineteenth Century* 49

Herbart 49

Herbart's Contemporaries 54

Phrenology 54

The French Revolt Against Mechanism 56

The Fusion of Scottish and English Psychology: Brown 57

Part II: THE RISE OF THE RESEARCH SPIRIT

5. *Some Intellectual Antecedents of Experimental Psychology* 65

French Science 66

German Science 67

The Biological Sciences 69

6. *The Beginnings of Psychological Experimentation* 76

Weber 76

Fechner and Psychophysics 80

Müller and Physiology 88

Beneke 92

7. *British Psychology in the Mid-Nineteenth Century* 95

Hamilton's Integration of Scottish and English Psychology 96

James Mill, John Stuart Mill 98

Bain 101

Spencer 104

8. *Physiological Psychology in the Second Half of the Nineteenth Century* 107

Helmholtz 107

Hering 112

Lotze and Local Signs 114
Anatomy and Physiology of the Nervous System 117

9. *The Theory of Evolution* 126

Lamarck 128
Darwin 130
Evolutionism and the Birth of Comparative Psychology 134
Early Comparative Psychology 134
Evolution and Human Behavior: Galton 138
Evolutionism in the Social Sciences 143

10. *Psychiatry from Pinel and Mesmer to Charcot* 148

Mental Deficiency 151
The Birth of Psychosomatic Medicine 152

11. *Wundt and the Spread of Experimental Psychology* 159

Wundt 160
Experimental Psychopathology 167
Folk Psychology 167
Cattell 169
Parallel Developments in German Physiological Psychology 173
French Psychology 176
Experimental Psychology in Britain 178

12. *Early Studies of Memory and Learning* 181

Ebbinghaus 181
The Expansion of the New Program 187
Motor Skills 188

13. *William James* 192

“The Principles of Psychology” 195
“The Varieties of Religious Experience” 201
Interest in Psychical Research 204
James’s Philosophy 205

Part III: GATEWAY TO THE PRESENT:
PSYCHOLOGICAL SYSTEMS IN THE
TWENTIETH CENTURY

14. *Structural and Functional Psychologies* 211

Titchener and Structural Psychology 214

Functionalism 216

15. *The Würzburg School* 222

Studies of Learning in Relation to Attitude and Thought 228

The Revision of Associationism 232

16. *Behaviorism* 237

New Mechanistic Conceptions 238

Conditioning: Pavlov and Bekhterev 240

Watson 245

Spread of the Conditioned-Response Method 250

17. *Gestalt and Field Theory* 254

Wertheimer 258

Köhler and Koffka 261

Lewin and Field Theory 264

The Spread of Gestalt Psychology 267

18. *Sigmund Freud and Psychoanalysis* 271

The Psychoanalytic Method 277

Psychoanalytic Ego Psychology 282

19. *The Response to Freud* 289

Jung 289

Adler 294

Fromm and Horney 298

"Humanistic" Psychologies 302

Erikson and Identity 304

Part IV: CURRENT TRENDS AND DISCIPLINES IN PSYCHOLOGY

20. *Psychology of Learning* 311

Thorndike's Reinforcement Theory and Guthrie's Conditioning
by Contiguity 314

Tolman's Sign-Gestalt Theory of Learning 317

Hull's Reinforcement Theory 319

Mathematical Models and Theories of Learning 322

Skinner's Operant Conditioning 325

21. *Sensory, Perceptual, and Cognitive Functions* 331

Sensory Deprivation and Enrichment 332

Sensory Cues and Perception 334

Nativism and Empiricism in Perception 337

Internal Dynamics of Perception 339

Feedback and Internal Stimuli in Perceptual Learning 342

The Thought Processes 344

22. *Comparative and Physiological Psychology* 349

Physiological Basis of Behavior 350

Physiological Theories of Learning 352

Phylogenetic Conceptions of Behavior: Comparative Psychology
and Ethology 356

Behavioral Development: Instincts, Motives, and Imprinting 362

Genetics and Behavior 366

Research on Stress 370

23. *Soviet Psychology* 377

Sociopolitical Events That Influenced the Growth of Soviet
Psychology 378

Dialectical Materialism and the Science of Behavior 382

Pavlov's System Within the Framework of Dialectical Materialism 385

The Orienting Reflex and the Second-Signal System 387

Conceptions of Neural Functioning and Feedback Mechanisms 388

Ecological Physiology 390

Conceptions of Human Development 392
 Typology 394

24. *Developmental Psychology: Childhood, Adolescence, and the Life Span* 399

Child Development 405
 Piaget 409
 Longitudinal Methods 413
 Adolescence and the Life Span 416

25. *Personality* 422

Wholeness, Structure, and Gestalt 424
 Personality and Learning Theory 426
 Clinical Psychology 429
 Issues in Personality Diagnosis 434
 The Cross-Cultural Approach 435

26. *Social Psychology* 440

The Rise of Experimental Method 445
 The Influence of Anthropology 447
 Sherif and "Frames of Reference" 449
 Sociometry 451
 Research in Natural Settings 452
 The Influence of Kurt Lewin 453
 Social Ecology 455
 New Perspectives in Social Deprivation and Enrichment 456
 Attitudes 459

27. *History in the Making: Marginalia and the Open Frontier* 466

Psychology and the Unity of Science 467
 Psychology and the Development of Science 469
 Psychology and Parapsychology 473
 The Protest of Humanistic Psychology 475
 Altered States of Consciousness 477
 National Psychologies 481

Notes on Further Reading 487
Index of Names 501
Index of Topics 513
